INTRODUCTION TO THE PUBLIC ACCOUNTS OF CANADA

Nature of the Public Accounts of Canada

The *Public Accounts of Canada* is the report of the Government of Canada prepared annually by the Receiver General, as required by section 64 of the *Financial Administration Act*. It covers the fiscal year of the Government, which ends on March 31.

The information contained in the report originates from two sources of data:

- the summarized financial transactions presented in the accounts of Canada, maintained by the Receiver General; and
- the detailed records, maintained by departments and agencies.

Each department and agency is responsible for reconciling its accounts to the control accounts of the Receiver General, and for maintaining detailed records of the transactions in their accounts.

The report covers the financial transactions of the Government during the year. In certain cases, parliamentary authority to undertake transactions was provided by legislation approved in earlier years.

Format of the Public Accounts of Canada

The *Public Accounts of Canada* is produced in three volumes.

Volume I presents the audited consolidated financial statements of the Government, as well as additional financial information and analyses;

Volume II presents the financial operations of the Government, segregated by ministry; and Volume III presents supplementary information and analyses.

The content of Volume II is summarized as follows:

Summary Tables and Appendices (Section 1)

Section 1 includes summary tables which provide the summaries of the financial transactions contained in the ministerial sections.

Section 1 also includes, as appendices, the full wording of all authorities granted in current year Appropriation Acts, of all authorities granted by statutes other than Appropriation Acts, of all authorities available from previous years, of all non-lapsing authorities granted/repealed in the current year, and of all authorities for the spending of proceeds from the disposal of surplus Crown assets.

Ministerial Sections (Sections 2 to 27)

There is one section for each ministry. The department and agencies, for which a Minister is responsible to Parliament, are grouped together to provide a total ministry presentation. Each ministerial section provides a statement of the strategic outcomes and program activity descriptions. Each ministerial section also includes, where applicable, a uniform set of statements to present each ministry's financial operations. These statements are:

• Ministry Summary

Displays by department and agencies the source and disposition of each budgetary and non-budgetary authority granted by

Parliament in Appropriation Acts and other statutes.

• Program Activity

Displays by department and agencies the total authorities available for use and the authorities used in the current year for each program activity under each type of expenditure (operating, capital, transfer payments and non-budgetary).

• Transfer Payments

Displays by department and agencies the source and disposition of authorities for each transfer payment.

• Details of Respendable Amounts

Displays by department and agencies the nature of revenues and receipts which increase the amounts which may be spent from appropriations having net voting authority.

• Revenues

Displays by department and agencies the nature of revenues under each main revenue classification.

The statements in the ministerial sections are designed so that the relevant totals and sub-totals may be traced directly to a preceding statement and then to the Summary Tables in Section 1 (e.g. data in the *Transfer Payments* statement can be traced to the *Program Activity* statement which in turn can be traced to the *Ministry Summary* statement; data in the *Ministry Summary* statement can be traced to the *Summary Tables* (5, 6 and 7) in Section 1.

Volume II is designed to reflect as closely as possible the form and content of Part II of the Main Estimates. Certain Summary Tables and Appendices and the *Ministry Summary* in the Ministerial Sections display the source and disposition of spending authorities. The level of details provided for the source and disposition of authorities is explained below:

• Source of Authorities

- Available from previous years

 Spending authorities allowed to be brought forward from the previous year. Includes only those authorities where there is a specified dollar limit on total spending, or on the accumulated outstanding balance of items where revenues and receipts are available for spending. Usually these items represent revolving funds, proceeds from the disposal of surplus Crown assets or loans authorities. These amounts are available for spending without further approval from Parliament.
- Main and Supplementary Estimates
 Include the spending authorities requested in
 the Estimates as well as forecasts included in
 the Estimates of spending under authorities
 granted in various other statutes including
 Appropriation Acts of previous years.
- Adjustments, warrants and transfers Include:
 - transfers from or to other ministries such as Treasury Board Votes 5, 10, 15, 25, 30 and 33 or changes in ministry responsibility;

- transfers within the ministry from one vote to another (under Parliamentary authority), or between transfer payments;
- changes to statutory amounts due to adjustments of spending forecasts included in the Estimates, due to cancellation or amendment to statutes or due to adjustments of Crown corporations borrowing authorities;
- amounts of previous years' overexpenditures paid or settled in the current year and proceeds from the disposal of surplus Crown assets;
- Governor General Special Warrants to cover payments that are required when Parliament is dissolved for a general election.
- Total available for use
 Authorities available for spending during the
 current year (net of forecasted revenues and
 receipts available for spending).

• Disposition of Authorities

- Used in the current year

 Amounts spent in the current year (net of actual revenues and receipts available for spending).
- Lapsed (variance under)
 The amount of the lapse is the total authority available for use in the current year less the total of a) amount used in the current year and b) the amount available for use in subsequent years.

- Overexpended (variance over)
 Excess of spending over authorities granted.
- Available for use in subsequent years
 Unused spending authorities which have not lapsed and which are carried forward to a subsequent year.
- Used in the previous year

Amounts spent in the previous year (net of actual revenues and receipts available for spending). For authorities or transfer payments that no longer exist in the current year, the related total net expenditures of the previous year are reported as a single amount in line with the notation "Appropriations (items) not required for the current year".

Note: If no amount is shown, either the expenditures were less than \$500 or none were reported.

(1) Transfer payments for employment insurance benefits are reported in Table 2a.

(2) Includes the guaranteed income supplement and the spouse's allowance.

(3) Transfer payments for Canada child tax benefits are reported in Table 2a.

1.10 SUMMARY TABLES PUBLIC ACCOUNTS OF CANADA, 2011-2012

TABLE 2a Recapitulation of External Expenses by Type

Table 2a reconciles total ministerial net expenditures (Table 2) with external expenses reported in Table 1 of this section and in the Consolidated Statement of Operations and Accumulated Deficit in Section 2 of Volume I. The reconciling items include the expenditures of the consolidated specified purpose accounts, the accrual and other adjustments, the expenses of the consolidated Crown corporations and other entities, the fax credits and repayments and the elimination of internal expenses.

TABLE 3

Ministerial Expenditures by Standard Object

Table 3 presents expenditures by standard object for each ministry on both a gross and net basis. The difference between gross and net expenditures is revenues netted against expenditures. The standard object presentation of expenditures is related to the goods and services acquired, and transfer payments made by the Government. The "Total gross expenditures" column represents the total of expenditures charged to standard objects 1 to 12 inclusively. The "Total ministerial net expenditures" column represents the result of total gross expenditures less total revenues netted against expenditures. The "Total ministerial net expenditures" column discloses the total expenditures reported for each ministry in the ministerial sections of this volume.

Table 3a reconciles total ministerial net expenditures with external expenses reported in Table 1 of this section and in the Consolidated Statement of Operations and Accumulated Deficit in Section 2 of Volume 1.

TABLE 3a

Reconciliation of External Expenditures by Standard Object to Expenses

Table 3a reconciles total ministerial net expenditures (Table 3) with total external expenses reported in Table 1 of this section and in the Consolidated Statement of Operations and Accumulated Deficit in Section 2 of Volume I. The reconciling items include the expenditures of the consolidated specified purpose accounts, the accrual and other adjustments, the expenses of the consolidated Crown corporations and other entities, the tax credits and repayments, and the elimination of internal expenses and internal revenues netted against expenses.

(in thousands of dollars)

TABLE 4

Ministerial Revenues

Table 4 presents revenues for each ministry. The "Total ministerial revenues" column represents revenues from all sources. This column represents tax and other revenues from both external and internal sources. It discloses total ministerial revenues as reported in the "Revenues" statement in each ministerial section of this volume.

Table 4a reconciles total ministerial revenues with external revenues reported in Table 1 of this section and in the Consolidated Statement of Operations and Accumulated Deficit in Section 2 of Volume 1.

⁽¹⁾ Additional details are provided in Section 10 of Volume III. The total amount includes \$967,415 of return on investements, \$1,683,278 related to foreign exchange revenues (\$1,672,216 for Exchange Fund Account and \$11,062 for International Monetary Fund), and \$4,677,607 related to enterprise Crown corporations. The amounts related to foreign exchange revenues and Crown corporation revenues have been respectively reclassified in Table 4a of this volume.

(2) Details of Sales of goods and services are presented in Table 4b of this volume.

⁽³⁾ Includes domestic coinage for \$106,722 and net gain on exchange for \$99,845. The amount of \$99,845 has been reclassified to foreign exchange revenues in Table 4a of this volume.

TABLE 4a

Recapitulation of External Revenues by Source

Table 4a reconciles total ministerial revenues (Table 4) with external revenues reported in Table 1 of this section and in the Consolidated Statement of Operations and Accumulated Deficit in Section 2 of Volume 1. The reconciling items include the revenues from the consolidated specified purpose accounts, the accrual of accounts receivable and the adjustment of the Exchange Fund Account to recognize the international reserves held in the Account, the accrual and deferral of other revenues, the revenues of Crown corporations and other entities, tax credits and repayments and the elimination of internal revenues.

TABLE 5

Source and Disposition of Budgetary Authorities by Ministry

Table 5 presents the source and disposition of budgetary authorities by ministry. The level of details provided for the source and disposition of authorities is explained in the Introduction to this volume. In addition, detailed information is provided in the "Ministry Summary" statement in each ministerial section of this volume.

(1) Certain comparative figures have been reclassified to conform to the current Government structure. Additional information is provided in the Ministerial Sections within this volume.

TABLE 6

Source and Disposition of Non-Budgetary Authorities by Ministry

Table 6 presents the source and disposition of non-budgetary authorities by ministry. The level of details provided for the source and disposition of authorities is explained in the Introduction to this volume. In addition, detailed information is provided in the "Ministry Summary" statement in each ministerial section of this volume.

(1) Certain comparative figures have been reclassified to conform to the current Government structure. Additional information is provided in the Ministerial Sections within this volume.

TABLE 7

Source and Disposition of Authorities by Type (Voted and Statutory)

Table 7 presents the source and disposition of budgetary and non-budgetary authorities by ministry and by type of authority (voted and statutory). The level of details provided for the source and disposition of authorities is explained in the Introduction to this volume. In addition, detailed information is provided in the "Ministry Summary" statement in each ministerial section of this volume.

The Government submits its spending proposals to Parliament in the annual Estimates. During the year, the Government may request further appropriations. The initial request is called the "Main Estimates" and additional requests are called "Supplementary Estimates". With these Estimates, the Government requests authority for that part of the proposed spending which is not already provided by other statutes. The amounts making up the total of such proposed spending are authorized in Appropriation Acts and are generally referred to as "annual" or "voted" authorities. The balance of the planned spending is made under authority of other statutes which authorize disbursements for specified purposes, and for such amounts and time periods as are set by those acts. The proposed or estimated uses of most of these "statutory" authorities for the current year are included in the Estimates for information purposes; however, they are not included in appropriation acts because they have already been authorized by Parliament.

Voted authorities, with few exceptions, lapse at the end of the year if not used, while statutory authorities, with few exceptions, are carried forward to future years. Those authorities which extend to subsequent years are referred to as "non-lapsing".

Budgetary appropriations provide spending authority for those transactions which enter into the calculation of the annual deficit or surplus of the Government. Non-budgetary appropriations provide spending authority for all transactions which result in the acquisition or disposal of loans, investments and advances. Balances of appropriations brought forward from the previous years are available for spending, together with current increases to such authorities.

The totals of these authorities are reduced by the amount of their current year use to determine the balances which lapse, are overexpended or are carried forward to future years, depending upon the type of authority. In cases where the spending of loan repayments is authorized, the non-budgetary spending is reported net of such repayments.

Note: If no amount is shown, either it is less than \$500 or no amount was reported.

(1) These adjustments, warrants and transfers include items such as:

(a) reserved allotments established to provide payment authority for the overexpenditure of previous year's appropriations which resulted from prior year's payables;

(b) adjustments to items displayed in the Estimates on an informational basis to reflect actual spending and of certain authorities carried forward to reflect authorities available; and,

(c) adjustments to authorities granted in statutes other than appropriation acts.

(2) Certain comparative figures have been reclassified to conform to the current Government structure. Additional information is provided in the Ministerial Sections within this volume.

APPENDIX 1

APPENDIX 5

Authorities for the Spending of Proceeds from the Disposal of Surplus Crown Assets

Appendix 5 provides details, by ministry, of the source and disposition of authorities related to the spending of proceeds from the disposal of surplus Crown assets.

Pursuant to sections 13(2) and 14 of the Surplus Crown Assets Act, departments as defined in section 2 of the Financial Administration Act (excluding the House of Commons, the Senate, the Library of Parliament, the Office of the Conflict of Interest and Ethics Commissioner, the Senate Ethics Officer and the International Joint Commission) are authorized to establish a spending authority equal to the proceeds received from the disposal of surplus Crown assets. The proceeds received in any fiscal year that have not been spent in that fiscal year are carried forward to the next fiscal year for use in that fiscal year only. The amount carried forward is however subject to a maximum limit.

Department

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Material services; Acquisition services; and Travel and other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Strategic Outcome

An environmentally sustainable agriculture, agri-food and agri-based products sector.

Program Activity Descriptions

On-farm action

Agriculture and Agri-Food supports farmers through direct on-farm programming that identifies environmental risks and opportunities and promotes the continuous growth of the stewardship ethic within the agriculture and agri-food industry. AAF supports farmers through agri-environmental risk assessment and planning; providing expertise, information and incentives to increase the adoption of sustainable agriculture practices at the farm and landscape levels; investigating and developing new approaches that encourage and support the adoption of sustainable agriculture practices; and increasing the recognition of the value of sustainable agriculture practices. This program supports environmental stewardship and helps reduce the sector's overall impact on the environment. It contributes to a cleaner environment and healthier living conditions for Canadian people, and a more profitable agriculture sector.

Environment knowledge, technology, information and measurement

Agriculture and Agri-Food (AAF) is focused on supporting the sector through initiatives that enable them to use a more systematic management approach to making decisions with respect to environmental risks and help identify suitable corrective actions. AAF is conducting basic and applied research to improve scientific understanding of agriculture's interactions with the environment on the key environmental challenges facing Canada and its regions; developing sustainable agricultural practices and validating environmental and economic performance at the farm and landscape levels; and developing, enhancing and using agri-environmental indicators, greenhouse gas accounting systems and economic indicators to assess the sector's environmental and economic sustainability. This program provides the platform for innovation and discovery of technologies and strategies which are used as the basis for application by the sector in order to improve the agri-environmental performance of the sector.

Strategic Outcome

A competitive agriculture, agri-food and agri-based products sector that proactively manages risk.

Program Activity Descriptions

Business risk management

Agriculture and Agri-Food has a comprehensive business risk management program to better equip producers with the tools and capacity to manage business risks. This program provides coverage for small income declines, margin-based support for larger income losses, a disaster relief framework for rapid assistance to producers and production insurance to protect farmers against production losses due to uncontrollable nat-

ural hazards. In addition, assistance to producers through the provision of financial guarantees facilitates the marketing of producers' crops when market conditions and prices may be more favourable.

Trade and market development

Agriculture and Agri-Food (AAF) acts as Canada's agricultural trade advocate, working to break down trade barriers at home and abroad and expand opportunities for the agriculture, agri-food and agri-based products sector. AAF assists the sector in identifying new domestic and global opportunities and ways to enhance productivity, competitiveness and prosperity. AAF also works to distinguish canadian products under Brand Canada International and the Domestic Branding Strategy to expand and deepen the sector's strengths in the marketplace.

Food safety and biosecurity risk management systems

Agriculture and Agri-Food supports producers and organizations in the development and implementation of food safety, biosecurity and traceability risk management systems to prevent and control risks to the animal and plant resource base thus strengthening the sector against widespread diseases and losses in domestic and foreign markets. The risk management systems are national, government-recognized on-farm and/or post-farm Hazard Analysis of Critical Control Points (HACCP) or HACCP-based food safety systems, National Biosecurity Systems and a National Agriculture and Food Traceability System. These systems also support emergency management to limit the spread of animal and plant diseases, thereby reducing economic, environmental and social impacts of a crisis. A National Animal and Plant Biosecurity Strategy provides overall policy direction ensuring efforts are targeted at the highest possible biosecurity risks. Eligible recipients include national or regional non-profit organizations, producers and industry stakeholders.

Regulatory efficiency facilitation

Agriculture and Agri-Food is undertaking initiatives to ensure that the regulatory environment promotes sector innovation, investment and competitiveness. The Department recognizes that with the rapid pace of technological advancement and emerging gaps between international and domestic regulatory policies, Canada's regulatory environment will need to increase capacities and accelerate modernization to be responsive. The initiatives will involve working with stakeholders along the value chain to enhance their ability to fulfill regulatory requirements, and collaborating with federal partners and industry to find ways of streamlining the regulatory burden through targeted actions on sector priorities, while at the same time maintaining Canada's strong regulatory system with respect to health and safety. Improving the timeliness and transparency of science-based regulatory decision-making will also contribute to improved public and stakeholder confidence.

Farm products council of Canada

Established through the Farm Products Agencies Act (the Act), the Farm Products Council of Canada (FPCC) is a quasi-judicial, regulatory agency which reports to Parliament through the Minister of Agriculture and Agri-Food (the Minister). The Act provides for the creation of national marketing and promotion research agencies. The FPCC supervises these agencies and works with them to ensure that the supply management system for poultry and eggs works in the balanced interest of all stakeholders, from producers to consumers. The FPCC is also an active proponent of portfolio management by providing advice to the Minister and maintaining relationships with provincial governments.

Strategic Outcome

An innovative agriculture, agri-food and agri-based products sector.

Program Activity Descriptions

Science, innovation and adoption

Agriculture and Agri-Food contributes to the competitiveness of the agriculture, agri-food and agri-based products sector by supporting innovation designed to improve profitability in new and existing products, services, processes and markets. Coordinated and informed decision-making is supported with strategic foresight, research, and information sharing contributing to integrated planning engaging industry, government and academia. Collaborative action is promoted to accelerate the flow of science and technology along the innovation continuum in support of industry defined strategies for future success. Farmers, agri-entrepreneurs and agri-based small and medium sized enterprises are supported in their efforts to adopt new technologies and commercialize new products and services. Pathfinding and transformational research, help to define future opportunities and prepare the sector for emerging opportunities and challenges.

Agri-business development

This program activity builds awareness of the benefits and encourages the use of sound business management practices, while also enabling businesses in the sector to be profitable and invest where needed to manage the natural resource base sustainably and to market and produce safe food and other products. The Agri-business development program funds provincial and territorial activities related to business management practices and skills that: strengthen the capacity of businesses in the sector to assess the financial implications of business improvements, including the impact of environmental plans, food safety systems and innovation projects on their business profitability; manage transformation, respond to change and adopt innovation in business operations; help the agri-business owner understand their financial situation, implement effective action and business management plans/practices and provide for enhanced participation by young or new entrants, First Nations clients, and clients in specific sub-sectors in transition.

Rural and co-operatives development

The Rural and co-operatives development program leads an integrated, government-wide approach, called the Canadian Rural Partnership, through which the government aims to coordinate its economic, social, environmental and cultural policies towards the goal of economic and social development and renewal of rural Canada. It develops partnerships with federal departments, provincial and rural stakeholders in areas such as knowledge building, policy development and the implementation of the government's rural development strategies. It also offers tools to enable rural communities to use their innovative capacity to capture the value of local amenities, and to achieve greater local or regional economic competitiveness. The program also promotes economic growth and social development of Canadian society through the development of co-operatives. It facilitates the development of co-operatives as an effective self-help tool helping Canadians and communities address their needs and capture economic opportunities. It provides advice across government on policies and programs affecting co-operatives and builds partnerships within the federal government and with the sector, the provinces and other key stakeholders in the implementation of initiatives, such as capacity and knowledge building, to support the development of co-operatives.

Canadian pari-mutuel agency

Section 204 of the Criminal Code of Canada designates the Minister of Agriculture and Agri-Food as the individual responsible for the policy and regulatory functions pertaining to pari-mutuel wagering on horse races. The Canadian Pari-Mutuel Agency (CPMA) is a special operating agency within AAF that regulates and supervises pari-mutuel betting on horse racing at racetracks across Canada, with the objective of ensuring that pari-mutuel betting is conducted in a way that

is fair to the betting public. Costs associated with the activities of the CPMA are recovered through a levy on every dollar bet on horse races in Canada. The levy is currently set at eight-tenths of a cent of every dollar bet. CPMA's strategic plans are focused on regulating and supervising pari-mutuel wagering on horse races in the most modern, effective and transparent manner.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Canadian Dairy Commission

Strategic Outcome

To enhance the vitality of the Canadian dairy industry for the benefit of all stakeholders.

Program Activity Descriptions

Administer milk supply management system

Set support prices for butter and skim milk powder. Determine and recommend national quota for industrial milk production. Facilitate within the dairy industry. Administer domestic seasonality (supply and demand) program.

Canadian Food Inspection Agency

Strategic Outcome

A safe and sustainable plant and animal resource base.

Program Activity Descriptions

Food safety program

The Food safety program aims to mitigate risks to public health associated with diseases and other health hazards in the food supply system and to manage food safety emergencies and incidents. The program achieves its objectives by promoting food safety awareness through public engagement and verification of compliance by industry with standards and science-based regulations. The program delivers initiatives to verify that consumers receive food safety and nutrition information and to mitigate unfair market practices targeting consumers and industry. Collaboration with other governments and stakeholders further enhances the Agency's ability to track, detect and mitigate risks associated with food and the food supply system, including food.borne illness. This program supports public health and instils confidence in Canada's food system.

Animal health and zoonotics program

The Animal health and zoonotics program aims to mitigate risks to Canada's animal resource base, animal feeds and animal products, which are integral to a safe and accessible food supply system as well as to public health. The program achieves its objectives by mitigating risks to Canada's animals (including livestock and aquatic animals) from regulated diseases, managing animal disease emergencies and incidents, mitigating and managing risks to livestock and derived food products associated with feed, promoting animal welfare and guarding against deliberate threats to the animal resource base. The program helps to mitigate risks associated with animal diseases that can be transmitted to humans by controlling diseases within animal populations. This program supports the health of Canada's animal resources and instils confidence in the safety of Canada's animals, animal products and by-products, and production systems.

Plant resources program

The Plant resources program aims to mitigate risks to Canada's plant resource base, which is integral to a safe and accessible food supply, as well as to public health and environmental sustainability. The program achieves its objectives by regulating agricultural and forestry products; mitigating risks to the plant resource base (including crops and forests) from regulated pests and diseases; regulating the safety and integrity of seeds, fertilizers and plant products; and managing plant health emergencies and incidents. The program also guards against deliberate threats to the plant resource base, facilitates the introduction of emerging plant technologies and protects the right of plant breeders. Achieving the objectives of the program instils confidence in Canada's plants, plant production systems and plant products, and contributes to the health of Canada's plant resources.

International collaboration and technical agreements

The Canadian Food Inspection Agency's International collaboration and technical agreements program contributes to a coherent, predictable, and science.based international regulatory framework that facilitates meeting regulatory requirements of importing countries' food, animals and plants, and their products, resulting in the facilitation of multi-billion dollar trade for the canadian economy. The program achieves its objectives through actively participating in international fora for the development of international science-based rules, standards, guidelines and policies and, the management of sanitary and phytosanitary committees established under international agreements. The CFIA's active promotion of the Canadian science-based regulatory system with foreign trading partners and negotiations to resolve scientific and technical issues contribute to market access.

Canadian Grain Commission

Strategic Outcome

Canada's grain is safe, reliable and marketable and Canadian grain producers are protected.

Program Activity Descriptions

Quality assurance program-Appropriations

Canada's grain quality assurance system (GQAS) assures consistent and reliable grain quality that meets the needs of international and domestic markets. Daily provision of grain inspection and grading services as mandated by the Canada Grain Act as well as strong scientific and technical support programs and services are integral components to the overall delivery of an effective GOAS. Canada's GOAS is continually adapted to the end.use needs of domestic and international buyers of Canadian grain, and to the ongoing structural changes within the grain industry to maintain Canada's reputation as a consistent supplier of quality grain. An effective GQAS is a key factor in permitting Canadian exporters to market successfully in competitive international grain markets and is essential for producers in order to realize maximum value from their grain.

Grain quality research program—Appropriations

The Canada Grain Act requires the Canadian Grain Commission (CGC) to undertake, sponsor and pro-

mote research related to grains. The CGC conducts research in support of the grain quality assurance system (GQAS) to address emerging issues and permit the effective marketing of Canadian grain in the interests of producers and the Canadian grain industry. The CGC's Grain Research Laboratory (GRL) researches methods to measure grain quality, new quality factors, and new grain standards. Grain quality research supports the continual improvement of the GQAS.

Quantity assurance program—Appropriations

The Canadian grain quantity assurance system assures the weight of grain loaded into or discharged from conveyances and in storage in the licensed terminal and transfer elevator system to meet the requirements of the grain industry from producers to customers. Daily provision of grain weighing services as mandated by the *Canada Grain Act* forms a major part of the Quantity Assurance System. To maintain relevancy and to address constantly changing industry demands, ongoing technical support is provided in support of the grain quantity assurance system.

Producer protection program-Appropriations

The CGC is mandated to serve producer interests by upholding the *Canada Grain Act* and as such has implemented a number of programs and safeguards to ensure the fair treatment of Canadian grain producers. These include the licensing and security program, allocation of producer cars for producers and producer groups that wish to ship their own grain, and producer liaison measures including a grain grade appeal system. In addition, the CGC collects and updates grain quality data and grain handling information to facilitate producer sales and marketing decisions.

Producer protection program-Revolving fund

The CGC is mandated to serve producer interests by upholding the *Canada Grain Act* and as such has implemented a number of programs and safeguards to en-

sure the fair treatment of Canadian grain producers. These include the licensing and security program, allocation of producer cars for producers and producer groups that wish to ship their own grain, and producer liaison measures including a grain grade appeal system. In addition, the CGC collects and updates grain quality data and grain handling information to facilitate producer sales and marketing decisions.

Quantity assurance program-Revolving fund

The Canadian grain quantity assurance system assures the weight of grain loaded into or discharged from conveyances and in storage in the licensed terminal and transfer elevator system to meet the requirements of the grain industry from producers to customers. Daily provision of grain weighing services as mandated by the *Canada Grain Act* forms a major part of the Quantity assurance system. To maintain relevancy and to address constantly changing industry demands, ongoing technical support is provided in support of the grain quantity assurance system.

Quality assurance program-Revolving fund

Canada's grain quality assurance system (GQAS) assures consistent and reliable grain quality that meets the needs of international and domestic markets. Daily provision of grain inspection and grading services as mandated by the Canada Grain Act as well as strong scientific and technical support programs and services are integral components to the overall delivery of an effective GQAS. Canada's GQAS is continually adapted to the end-use needs of domestic and international buyers of Canadian grain, and to the ongoing structural changes within the grain industry to maintain Canada's reputation as a consistent supplier of quality grain. An effective GQAS is a key factor in permitting Canadian exporters to market successfully in competitive international grain markets and is essential for producers in order to realize maximum value from their grain.

Farm Credit Canada

Strategic Outcome

Farm Credit Canada's mission is to enhance rural Canada by providing specialized and personalized business and financial services and products to farming operations, including family farms, and to those businesses in rural Canada, including small and medium-sized businesses, that are businesses related to farming. The primary focus of the activities of the corporation shall be on farming operations, including family farms.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Department

Strategic Outcome

A competitive Atlantic Canadian economy.

Program Activity Descriptions

Enterprise development

Notwithstanding recent overall economic progress, some significant challenges remain and great opportunities exist for development. One of the most telling indicators of this is that, in a number of sectors, productivity remains significantly lower than in leading countries and other regions of Canada. The Atlantic Canada Opportunities Agency (ACOA) will work in partnership with Atlantic Canadian enterprises, stakeholders, industry and institutions to improve the growth and productivity of Atlantic Canada's economy, leading to increased competitiveness, earned incomes and job creation.

ACOA works to improve the region's capacity for economic growth through a variety of strategically focused mechanisms, which includes: assisting enterprises, particularly small and medium-sized ones, to help them start, expand or modernize their businesses, and establish and expand export activities; partnering with universities and other institutions to increase the region's research and development capacity, commercialization and productivity; and promoting and participating in the region's transition to the knowledge economy.

Community development

The Atlantic economy is built on the region's many geographic, linguistic, and cultural communities. From small remote villages to larger urban centres, the opportunities and challenges vary significantly. Communities are the foundation of economic development and are critical for economic prosperity. The Atlantic Canada Opportunities Agency (ACOA) recognizes the importance of these communities in an economic development framework and supports their efforts to develop the resources they need to assume full responsibility for their own economic development. For those reasons, ACOA focuses targeted efforts and strategies toward community development and also aims to provide and maintain quality public infrastructure. ACOA works in co-operation with other levels of government, other federal government departments. non-government organizations, and community groups to lever support, coordinate economic development, react to economic challenges, and finally, work with Infrastructure Canada and the provinces to oversee/ ensure the flow of federal funds allocated to each region through the various infrastructure funding streams. This requires a flexible, holistic approach, based on the realities of a given community's capacities, strengths and challenges. Community development is a bottom-up process that helps develop the tools, resources and initiatives that support individual and unique strategic development.

Policy, advocacy and coordination

ACOA's Policy, advocacy and coordination (PAC) program activity is central to identifying and effectively responding to opportunities and challenges facing the regional economy. PAC provides intelligence, analysis and well-grounded advice on a broad range of issues and topics, and informs and supports decision making by the Agency and the Minister. In offering strategic, researched policy positions that reflect the region's potential; influencing national policies and programs that affect Atlantic Canada's development and interests; and in coordinating other policies and programs within the region to form integrated approaches to development, PAC helps carry the Agency's agenda forward and helps ensure that ACOA overall remains relevant and responsive to the opportunities and challenges in Atlantic Canada.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Enterprise Cape Breton Corporation

Strategic Outcome

A competitive and sustainable Cape Breton economy.

Program Activity Descriptions

Human resource obligations

The programs included under Human resource obligations are nondiscretionary items that the Enterprise Cape Breton Corporation (ECBC) is required to deliver to former Cape Breton Development Corporation (CBDC) employees following the dissolution of CBDC. They are ongoing liabilities, many of which will continue beyond 20 years. They are a result of post employment benefits and various human resource strategies (operation closure). They include early retirement incentive programs, liability for future employee benefits, workers compensation obligations, and a domestic coal subsidy program.

Environmental obligations

As part of the transfer of the Cape Breton Development Corporation's (CBDC) assets and liabilities to the Enterprise Cape Breton Corporation (ECBC), ECBC will assume stewardship responsibility for all former land holdings of the CBDC. This includes all environmental obligations related to these sites. ECBC is required to comply with environmental laws and regulations as they pertain to current activities, as well as activities of past operations. To properly meet these obligations, ECBC will enter into a strategic partnership arrangement with Public Works and Government Services Canada (PWGSC), similar to that previously in place between CBDC and PWGSC. As part of this relationship, projects are planned and managed by PWGSC with oversight, monitoring and funding provided by ECBC. It is anticipated that all of the long-term environmental obligations will be completed by 2055, except the mine water obligation, which may require

management in perpetuity. ECBC will also work with numerous partners, such as the Centre for Sustainability in Energy and the Environment at Cape Breton University, Sydney Tar Ponds Agency, the Province of Nova Scotia, Environment Canada, and the private sector to explore alternative sources of energy related to the former CBDC's land holdings that could potentially lead to commercial development opportunities. This includes research into the production of green fuel crops, geothermal energy from the mine water, as well as the carbon storage potential of the residual coal within the Sydney coal field.

Commercial development

Due to the size and make-up of the Cape Breton economy and its distance from major markets, access to capital remains one of the greatest challenges for businesses. The ability to access capital from traditional lenders, venture capitalists and other levels of government is limited. Recognizing the challenges faced by small and medium-size enterprises, the Enterprise Cape Breton Corporation, through this program activity, works with potential and existing entrepreneurs to assess and to provide as appropriate various forms of assistance including but not limited to equity, secured and unsecured loans, as well as non-repayable contributions. The assistance provides a source for capital investment in support of initiatives such as marketing, improved efficiency, innovation, human resource initiatives, trade development activities and capital assistance.

Community economic development

Structural adjustment has been taking place in the Cape Breton economy over the past decade due to the closure of the Island's major industries and the downsizing of the fishing industry. The economic climate on the Island has presented significant challenges for many communities in terms of attracting investment and realizing opportunities. Through this program activity, the

Enterprise Cape Breton Corporation works to engage and empower communities to take control of their destiny by pursuing opportunities leading to sustainable economic development. Working in cooperation with communities and community-led organizations, activities pursued in support of this program activity range from developing and implementing overall strategies for economic development to supporting the business environment, skill development activities, and new and/or improved community infrastructure.

Property development and management

Through this program activity, the Enterprise Cape Breton Corporation (ECBC) has the ability to purchase, lease, sell and hold mortgages. The development and management of property holdings are used by the corporation as a development tool to complement funding programs. Surplus revenues from real property leases and land sales go directly into economic development projects within ECBC's mandate area. In addition, as part of the land transfer/disposal process, the corporation makes lands available for lease or sale to businesses and organizations in an effort to foster economic development opportunities. Both activities serve to support the economic development mandate of the corporation. In addition to land holdings, ECBC's real property assets include the corporation's head office at Sydney, Nova Scotia, Point Edward Resource Centre (agricultural property), Port Hawkesbury business facility (office space), and the Northside facility (manufacturing space). As a result of the transfer of the assets and liabilities of the Cape Breton Development Corporation (CBDC) to ECBC upon CBDC's dissolution, ECBC will own and operate a number of water treatment and storage facilities, as well as the Dominion Coal Yard and Sydney Mines Coal Yard required to support the contractual obligation to sell coal to current and former employees.

Policy and advocacy

Fundamental to the Enterprise Cape Breton Corporation's (ECBC) mandate is the Corporation's policy and advocacy role that assists in identifying the opportunities and challenges facing the Island, as well as informing and supporting decision making both within and outside the Corporation. ECBC's policy and advocacy functions focus on a range of activities including research, analysis, planning and reporting, as well as working to advance the interests, priorities and concerns of Cape Breton Island in government decisions and actions. The policy and advocacy function exists to inform and support decision making by the Corporation and the Minister, providing intelligence, analysis and well-grounded advice on a number of issues and topics. The policy and advocacy function helps carry the Corporation's forward agenda, plays an integral role in developing focused and adaptable approaches to issues, and helps ensure that the Corporation overall remains relevant to the opportunities and challenges facing Cape Breton. In developing the advocacy agenda for Cape Breton, ECBC works to ensure that national and provincial officials are aware of the needs of the region and that Cape Breton interests, priorities and concerns are considered when policy is developed. Research and analysis are required to understand the economic challenges and opportunities facing Cape Breton and to guide the advocacy and policy making activities of the Corporation.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Department

Strategic Outcome

Taxpayers meet their obligations and Canada's revenue base is protected.

Program Activity Descriptions

$Reporting\ compliance$

Verifying the complete and accurate disclosure by taxpayers of all required information to establish tax liabilities and protect the tax base through audit, enforcement, and incentive administrative activities. Activities for enhancing compliance include; increasing taxpayers' understanding of their tax obligations through outreach activities, client service, and education; identifying and addressing non-compliance through risk assessment, audit and investigation; and establishing strategic partnerships with stakeholders to leverage compliance efforts. Assessment of returns and payment processing

Processing and validating taxpayer returns for both individuals and businesses through initial assessment, validation, accounting, and adjustments; registering businesses for the Business Number, establishing, and maintaining accounts; and receiving payments.

Accounts receivable and returns compliance

Identifying and addressing non-compliance with the registration, filing, remittance and payment requirements of the various Acts administered by the Canada Revenue Agency. The activities support the prevention, detection and early resolution of non-compliance with filing, reporting, and remitting obligations, as well as, the collection of accounts receivable relating to individual and corporate tax returns, employer source deductions, Goods and Services Tax/ Harmonized Sales Tax, other levies, and accounts receivable administered on behalf of other government departments. These activities are achieved by identifying opportunities for program improvements, developing, implementing and maintaining national systems, policies, procedures and guidelines, and the application of business intelligence and technology.

Taxpayer and business assistance

Assisting taxpayers and businesses in meeting their obligations under the self-assessment system through the provision of accurate and timely responses to their enquiries; information products through various media such as, Website, pamphlets and brochures; targeted outreach activities and services; income and commodity tax rulings and interpretations; *Canada Pension Plan* and *Employment Insurance Act* eligibility determinations; services relating to the registration of pension and other deferred income plans; and services relating to the registration of charities.

Appeals

Providing a timely and impartial dispute resolution process for taxpayers who disagree with decisions made by the CRA, by actively engaging in dialogue with the taxpayer and exploring alternative processes to resolve disputes when appropriate, as well as assisting the Department of Justice in handling appeals to the courts.

Strategic Outcome

Eligible families and individuals receive timely and correct benefit payments.

Program Activity Descriptions

Benefit programs

Providing Canadians with income-based benefits and other services that contribute directly to their economic and social well being through administration of the Canada Child Tax Benefit, Goods and services tax/Harmonized sales tax credit, Children's Special Allowances, the Disability Tax Credit, and the Universal Child Care Benefit, and Working Income Tax Benefit (WITB) advance payments as well as a range of ongoing benefits and one-time payment programs on behalf of the provinces and territories, and other federal government departments. Assisting benefit recipients in meeting their obligations through the provision of timely responses to their enquiries.

Strategic Outcome

Taxpayers and benefit recipients receive an independent and impartial review of their service-related complaints.

Program Activity Descriptions

Taxpayers' ombudsman

Taxpayers' Ombudsman reports directly to the Minister of National Revenue and operating independently at arm's length from the management of the CRA and CRA Board of Management, provides advice to the Minister of National Revenue about service matters in the CRA; address requests for reviews made by taxpayers and benefit recipients with respect to service matters including the service rights outlined in the *Taxpayer Bill of Rights*; and identifies and reviews systemic and emerging service-related issues within the CRA that have a negative impact on taxpayers and benefit recipients.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Department

Strategic Outcome

Canadians share, express and appreciate their Canadian identity.

Program Activity Descriptions

Official languages

Canadian Heritage is responsible for the planning, implementation and management of the Official languages support programs pertaining to the promotion of linguistic duality within Canada and the development of official-language minority communities, in accordance with Canadian Heritage's mandate pursuant to article 43 of the *Official Languages Act* (OLA). It connects to the Government Outcome "A diverse society that promotes linguistic duality and social inclusion". Canadian Heritage plays a coordination and support role among federal institutions in the implementation of their commitment to the development of official-language minority communities and to the pro-

motion of linguistic duality, as conferred by article 42 of the OLA. Canadian Heritage is also responsible for the horizontal coordination of the Official languages program (OLP) covering all activities of federal institutions subject to the OLA, including language of service or of work, support for linguistic duality within Canada and support for the development of official-language minority communities.

Promotion of and attachment to Canada

This program activity promotes Canadian identity through building trust, pride and sense of national purpose in Canadians. It represents and celebrates Canada to Canadians and Canada to the world, showcasing ingenuity, achievements, innovations, excellence and leadership; expresses shared values, cultural diversity and place in the global community. It also promotes civic education, participation among young Canadians through exchanges, forums and community service, as well as provides them with the opportunity to learn about and understand Canada's society, diversity, history and institutions.

Core Concept: Promoting Canadian values to Canadians and the world.

Engagement and community participation

This program activity aims to ensure that Canadians are engaged and have the opportunity to participate in the civil, social and cultural aspects of life in Canada and in their communities. This is accomplished through funding programs and initiatives that support the efforts of communities to: build stronger citizen engagement and social inclusion through the performing and visual arts; express, celebrate and preserve local heritage; contribute to increasing the respect for and awareness of human rights in Canada and develop innovative and culturally appropriate solutions to the social, cultural, economic and other obstacles that impede Aboriginal peoples' community and personal prospects.

This program has strong social benefits, as it contributes to the preservation of the history and identify of Canada's diverse communities, while offering a way for traditions and identifies to evolve over time. The program supports the Department's mandate to strengthen Canadian identify and values and building attachment to Canada.

Strategic Outcome

Canadian artistic expressions and cultural content are created and accessible at home and abroad.

Program Activity Descriptions

Cultural industries

This program activity supports the Canadian cultural sector to ensure that a range of Canadian cultural content is produced and is accessible to domestic and international audiences. It also creates conditions that foster sustainability of the Canadian cultural industries. This program activity aims to enable Canadian creators, entrepreneurs, cultural exporters, producers and cultural industries to develop, market and export Canadian cultural content. This is achieved through delivering programs and services in the form of grants, contributions, tax credits and, policies, regulatory and legislative measures.

Core Concept: Encouraging the creation of Canadian cultural content and its consumption both at home and abroad.

Arts

This program activity is necessary to improve Canadians' direct access to varied artistic experiences, and to contribute to the sustainability of the arts sector. This is accomplished through funding programs that support: the presentation of professional arts festivals or performing arts series; the improvement of arts and heritage infrastructure; the improvement of business and management capacity of arts and heritage organiza-

tions; a greater integration of arts and heritage within municipal planning; as well as institutions that offer training of the highest calibre, in preparation for professional artistic careers.

Core Concept: Encouraging access, sustainability, and excellence in the arts for all Canadians.

Heritage

This program activity is necessary to ensure that Canada's cultural heritage is preserved and accessible to Canadians today and in the future. It enables the heritage sector to improve professional knowledge, skills and practices, to preserve and present heritage collections and objects, and to create and circulate exhibitions and other forms of heritage content. This is accomplished by providing funding such as grants, contributions and tax incentives; expertise, information, training and other services; and regulatory and legislative measures.

Core concept: Promoting the preservation and presentation of Canada's cultural heritage.

Strategic Outcome

Canadians participate and excel in sports.

Program Activity Descriptions

Sport

This program activity promotes development and excellence in sports among Canadians and Canadian communities. This is accomplished through support for high-performance athletes in national and international sporting events, enhancing Canada's ability to host national and international sporting events and supporting the development of excellence in coaching and sports organizations. In recent years this program has been expanded to include promoting participation in sports by Canadians of all ages and abilities. This program activity provides funding, expertise and other services to

Canadian athletes, sport organizations and event organizers.

Core Concept: Enhancing and promoting Canadian participation and excellence in sports, sports organizations and sporting events.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Canada Council for the Arts

Strategic Outcome

A vibrant and dynamic arts sector in Canada.

Program Activity Descriptions

Grants and services to support creation, production and dissemination of arts for individuals and organizations

Provides grants and services to professional Canadian artists and arts organizations.

Arts promotion to foster public knowledge and appreciation of the Canadian arts and culture

To encompass all activities within the organization for the promotion of arts at the national and international levels including partnerships and networks with multiple stakeholders, rental of art works, recognizing artistic excellence with our different prizes.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Canadian Broadcasting Corporation

Strategic Outcome

A national public broadcasting service that is primarily Canadian in content and character.

Program Activity Descriptions

Television services

National, regional and local television broadcasting services in English and French.

Radio services

National, regional and local radio broadcasting services in English and French, and an international service, Radio Canada International.

Transmission and distribution of programs

The distribution of the national broadcasting service to virtually all parts of Canada through satellite, microwave and landlines. Included is the provision of the signal that delivers service to the individual radio and television receivers through CBC/SRC transmitters, payments to privately-owned affiliates carrying CBC/SRC programs, and facilities to delay or prerelease broadcasts as required in the different time zones of the country.

English news network

CBC Newsworld is an English-language news and information specialty service distributed through satellite and cable delivery. The incremental cost of its operations is funded from its revenues.

French news network

Le Réseau de l'information is a French-language news and information specialty service distributed through satellite and cable delivery. The incremental cost of its operations is funded from its revenues.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Canadian Museum for Human Rights

Strategic Outcome

Enhanced knowledge of human rights, with special but not exclusive reference to Canada, in order to enhance the public's understanding of human rights, to promote respect for others and to encourage reflection and dialogue.

Program Activity Descriptions

Accommodation

The focus of this activity in the early years will be to manage all stages of the capital construction project—including choosing the final design — leading to its commissioning and public opening. The Board will be fully accountable for overseeing all aspects of the

building project, including choosing the final design, establishing the time-frames for construction and managing risks throughout.

Prior to the opening of the facility, the museum will also be establishing the appropriate mechanisms to provide for effective, efficient operations and maintenance and its ongoing security, accessibility and sustainability.

Museum content and program

In becoming the world's first museum dedicated to the exploration of human rights, the Canadian Museum for Human Rights (CMHR) is breaking new ground; there is no precedent for a museum of this nature. In its early years, the primary focus of this activity will be on establishing an innovative and unique public program that includes developing a sound research and scholarship capacity; accessible and engaging exhibits and educational programming that promote reflection and dialogue; a strong capacity of national outreach, engagement and service to Canadians; and strong marketing and communications to ensure a high level of awareness about the CMHR and its programs and services.

Stewardship and corporate management

The Stewardship and corporate management activity is aimed at ensuring the private and public funds invested in the Museum are managed in a transparent, accountable manner; that resources are effectively deployed, developed, directed, administered and controlled; and that the corporation optimizes the value it contributes to Canadians and Canadian society.

Canadian Museum of Civilization

Strategic Outcome

Interest in, knowledge of and appreciation and respect for human cultural achievements and human behaviour through collections of historical and cultural objects, exhibitions, programs and research reflecting a Canadian perspective.

Program Activity Descriptions

Accommodation

Managing and maintaining all facilities and related security and hosting services.

Exhibit, educate and communicate

Develops, maintains, and communicates exhibits, programs and activities to further knowledge, critical understanding, appreciation and respect for human cultural achievements and human behaviour.

Collect and research

Manages, develops, conserves and undertakes research on the collections to enhance program delivery and augment the scientific knowledge base.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Canadian Museum of Immigration at Pier 21

Visitor experience and connections

Canadians have access to— and are engaged in build-ing—content and programming that reflects the diverse experiences and contributions of immigrants throughout Canada's history.

Accommodations

The Museum's facilities contribute to a rich, welcoming and engaging visitor experience, are safe and accessible for visitors, staff and volunteers, are maintained in a cost-effective manner and any renovations respect the heritage aspects of the site.

Internal services

See introductory text.

Canadian Museum of Nature

Strategic Outcome

Interest in, knowledge of and appreciation and respect for the natural world through collections of natural history objects, public education programmes and research reflecting a special but not exclusive perspective on Canada.

Program Activity Descriptions

Accommodation

Provides secure and functional facilities that meet all safety and building code requirements including a renovated museum facility that furthers the vision and mandate of the Museum.

Public education programmes

Develops and maintains exhibitions, programmes, electronic and print publications, the Museum's web site **nature.ca** and activities to foster an understanding of, and empathy with, nature.

Research

Explores the past and assists Canadians in preparing for the future by conducting both systematic and applied research, as well as by developing and maintaining networks and linkages with Canadian and international scientific communities.

Collections management

Develops, preserves and makes accessible collections of natural history specimens, objects and information materials to meet the growing needs of both the public and private sectors for research, education and informed decision-making about the natural world.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Canadian Radio-television and Telecommunications Commission

Strategic Outcome

Canadians have access to a wide variety of high quality Canadian produced programming and to reliable, affordable and high quality telecommunication services.

Program Activity Descriptions

Canadian telecommunications

The *Telecommunications Act* requires that the Canadian Radio-television and Telecommunications Commission regulate and supervise the telecommunications industry by approving tariffs and fostering competition. The Commission's regulation of the telecommunications industry is based on an increased reliance on market forces and, where required, effective and efficient regulation. As a result of the Commission's regu-

lation of the telecommunications industry, Canadians have access to reliable telephone and other high-quality telecommunications services at affordable prices.

Canadian broadcasting

The *Broadcasting Act* requires the Canadian Radio-television and Telecommunications Commission regulate and monitor broadcasters and broadcasting services, including radio, television, cable distribution and direct-to-home satellite systems, through the issuance of licences. This program is important in order to ensure the predominance of Canadian content and by providing Canadian with a full access to the broadcasting system, as participants in the industry and as audiences.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Library and Archives of Canada

Strategic Outcome

Canada's continuing memory is documented and made accessible to current and future generations.

Program Activity Descriptions

Documentation of the canadian experience

One of the pillars of LAC's mandate is to ensure that Canada's continuing memory reflects Canadian society and is of interest to current and future generations. The LAC collection consists of published and unpublished

materials in a variety of formats, both analog and digital. The majority of LAC's acquisitions take place within a legislative framework. For example, Canadian publishers must deposit published material with LAC in accordance with the Legal Deposit of Publications Regulations. As well, federal government records of archival value must be transferred to LAC when they cease being of operational value to the organization that produced them, in accordance with the *Library and Archives of Canada Act*. LAC builds its collection by acquiring material on the Canadian experience through donations and selective purchases, which are subject to rigorous criteria to ensure the collection's coherence and relevance.

Preservation of continuing memory

LAC manages a vast collection of materials in a wide range of formats, both digital and analog, to ensure their long-term preservation and accessibility to Canadians. Traditional and cutting-edge archival and preservation techniques ensure the long-term availability of both analog and relevant digital materials. The preservation of analog and digital materials includes all management activities and strategies aimed at ensuring the integrity, authenticity, and short and long-term availability of Canada's continuing memory. There are various types of preservation activities: those related to the physical management of the collection, such as storage and circulation; those involving restoration, which include preventing documents from deteriorating and repairing already damaged documents; and those associated with reproduction and the making of replacement copies, which ensure the preservation and availability of documents that would otherwise be too fragile to access. On the digital side, innovative strategies are implemented to maintain accessibility to documents in outdated formats and to ensure the originals are protected through backup and storage.

Exploration of documentary resources

This program is aimed at distributing Canadian documentary resources and making them available to Canadians or to anyone interested in Canada, its society or its experience. To this end, strategies are put in place to provide Canadians with easier access to these documentary resources and increase their use among the general public. By making available the documentary resources for which it or other heritage organizations are responsible, LAC contributes to the creation of new knowledge that will increase our understanding of Canada.

Strategic Outcome

Current government information is managed to support government accountability.

Program Activity Descriptions

Development of regulatory instruments and recordkeeping tools

Library and Archives Canada (LAC), working collaboratively with central agencies, federal departments and institutions, and other stakeholders, plays a lead role in developing standards, tools and best practices for information management and recordkeeping. LAC facilitates the management of information within federal institutions through the approval and issuance of Records Disposition Authorities and the development of recordkeeping tools, guides and guidelines that support the advancement of the government's Recordkeeping Initiative. LAC provides input on information management policy by chairing and participating in various intergovernmental committees.

Collaboration in the management of government records of business value to ensure their availability

LAC offers advice, support, services and training to federal institutions, which enables them to manage their information effectively and helps them comply

with the requirements of the Directive on Recordkeeping. LAC carries out these functions by providing direction to national and international institutions, presenting papers at conferences, symposiums and forums, and developing and delivering training and awareness sessions. LAC also facilitates the disposition of government records, providing guidance and support on their storage, preservation, destruction and transfer. In addition, LAC works with the federal library community to ensure access to relevant information to support the work of decision makers, while maintaining the excellence of the Government of Canada's library services. LAC conducts research on topics of interest to federal libraries, coordinates the procurement of electronic information resources for federal libraries, supports the ADM Task Force on the Future of Federal Library Services and manages relationships with federal library partners. Finally, LAC contributes significantly to the accessibility of the government records that originate from the various institutions, for which it has responsibility and legislated authority under the Access to Information Act.

See introductory text.

National Battlefields Commission

Strategic Outcome

The Battlefields Park of Quebec is a prestigious, accessible, safe and educational historic and urban site.

Program Activity Descriptions

Conservation and development

As part of this program activity, the National Battlefields Commission (NBC) preserves the legacy of the Battlefields Park for future generations. To do so, the NBC ensures infrastructures maintenance and improvement when required, the horticultural landscape, and offers a protected site for all Canadian and foreign users and visitors. Public education and services

The purpose of this program activity is to showcase the history of the site and its cultural, recreational and natural treasures so as to emphasize its dual role as a historical and a city park. In support of this program, the National Battlefields Commission welcomes visitors, puts on exhibits and educational activities, provides quality public services, and disseminates information to users and visitors from both Canada and abroad.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

National Film Board

Strategic Outcome

Canadian stories and perspectives are reflected in audiovisual media and accessible to Canadians and the world.

Program Activity Descriptions

Audiovisual production

This program activity contributes to Canadians' understanding of the issues facing our country and raises awareness of Canadian viewpoints around the world.

As a public sector producer, the National Film Board (NFB) produces original audiovisual works that reflect diverse Canadian perspectives, including cultural, regional and aboriginal, and emanate from the diverse creators and communities that make up the country. This program activity operates where the private sector

doesn't, allowing creators to explore artistic and technological advances in form and content. It also ensures the identification, development and nurturing of talent and creative skills, within film making and other creative communities.

NFB programming is necessary to ensure that Canadians have access to diverse voices and content in both official languages. It promotes Canadian culture and values in events of national historic and cultural significance.

As Canadians' media consumption migrates online, the NFB provides leadership in the creation of innovative digital content in both official languages.

Production activities include the conceptualization, research, development and production of documentaries, animation films, new media content and other emerging forms.

Accessibility and audience engagement

This program ensures that Canadians and world audiences are able to access, view, discuss and engage with innovative Canadian content that reflects Canadian stories and perspectives. As media consumption migrates online, Canadian content must be made available in all digital and mobile forms.

Delivery mechanisms include the distribution, marketing and commercialization of audiovisual works via a diverse catalogue, a well-established stock footage library, the development diversified markets (i.e.: theatrical, television, consumer and institutional) via online and traditional channels in Canada and abroad. These activities make works widely accessible across Canada, notably to under served and remote communities, Aboriginal and Official language minority communities.

NFB's accessibility and audience engagement activities contribute to a dynamic Canadian culture and heritage.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

National Gallery of Canada

Strategic Outcome

Interest in, knowledge of and appreciation and respect for visual art through collections of historic and contemporary works of art, programs and research that reflect a special but not exclusive perspective on Canada.

Program Activity Descriptions

Accommodation

To provide secure and suitable facilities, which are readily accessible to the public, for the preservation and exhibition of the national collections.

Collections

To acquire, preserve, research and document historic and contemporary works of art in order to represent and present arts heritage. It includes curatorial research, acquisitions and preservation.

Outreach

To foster broad access nationally and internationally to the Gallery's collection, research, exhibitions and expertise. It includes exhibitions, both in the National Capital Region and other venues in Canada and abroad, educational programming and publications, communications and marketing activities designed to reach as wide an audience as possible.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

National Museum of Science and Technology

Strategic Outcome

Interest in, knowledge of and appreciation and respect for science and technology through collections of scientific and technological objects, programs and research reflecting a Canadian perspective.

Program Activity Descriptions

$Sharing\ knowledge$

The Corporation seeks to engage Canadians in discovering, considering and questioning past and present developments in science and technology, and their impact on society and individuals. The Corporation fosters a sense of identity and belonging for all Canadians, as well as pride in Canada's scientific and technological history and achievements. It also encourages active and informed participation by Canadians in the future development of our technological society. The primary reason for interpreting Canada's scientific and technological heritage is to provide Canadians with meaningful information about themselves and Canada. Just as the Transformation of Canada theme directs research and collection activities, it likewise guides the Corporation in its knowledge dissemination activities. These typically depict the historical development of science and technology, provide information on the objects in the collection and review the relationships between science, technology and Canadian society. The Corporation disseminates knowledge to its audiences in three primary ways: through its public facilities, its Web sites and its publications.

Accommodation

Facilities are an integral part of museum operations. They do more than house staff; they also provide a venue for the public, and housing for the collection. Facilities have a profound effect on museum visitation. Appropriate museum architecture attracts visitors, contributes to the atmosphere and becomes a symbol of the institution's mandate. A large portion of comments by visitors allude to their satisfaction or dissatisfaction with the quality of the facilities and their related services.

Heritage preservation

Heritage preservation includes two main components, Collection management, which includes preservation and conservation, and Research, which comprises those activities contributing to the building of a knowledge base about the scientific and technological heritage of Canada. The Corporation, as the only comprehensive science- and technology-collecting institution in Canada, has a special responsibility for the development of a Canadian national collection. In view of the breadth of the potential subject matter to be covered, critical choices must be made in determining collection content and priorities. Collection development activities assist the Corporation in making informed decisions on collection content, while collection management activities encompass the activities required to manage the objects accessioned into the collection. The Corporation has identified seven major subject areas on which it will focus its research activities. These are: aviation, communications, manufacturing, natural resources, renewable resources including agriculture, scientific instrumentation and transportation.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Public Service Commission

Strategic Outcome

A highly competent, non-partisan and representative public service, able to provide service in both official languages, in which appointments are based on the values of fairness, access, representativeness and transparency.

Program Activity Descriptions

Staffing services and assessment

The Staffing services and assessment activity develops and maintains the systems that link Canadians and public servants seeking employment opportunities in the federal public service with hiring departments and agencies. It provides assessment-related products and services in the form of research and development, consultation, assessment operations and counselling for use in recruitment, selection and development throughout the federal public service. This activity also includes delivering staffing services, programs and products to departments and agencies, to Canadians and public servants, through client service units located across Canada.

Oversight of integrity of staffing

The Oversight of integrity of staffing activity provides an accountability regime for the implementation of the appointment policy and regulatory framework for safeguarding the integrity of public service staffing and ensuring political staffing is free from political influence. This activity includes monitoring departments' and agencies' staffing performance and compliance with legislative requirements; conducting audits and studies; carrying out investigations; and reporting to Parliament on the integrity of public service staffing.

Appointment integrity and political impartiality

The Appointment Integrity and Political Impartiality activity is focused on independently safeguarding merit and non.partisanship in the federal public service. This activity includes developing and advancing strategic policy positions and directions, conducting policy research, establishing PSC policies and standards, providing advice, interpretation and guidance, and administering delegated and non.delegated authorities.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

See introductory text.

Public Service Labour Relations Board

Strategic Outcome

Resolution of labour relations issues in the federal public service and in Parliament in an impartial manner.

Program Activity Descriptions

Adjudication, mediation and compensation analysis and research

The Public Service Labour Relations Board (PSLRB) is an independent quasi-judicial tribunal mandated by the *Public Service Labour Relations Act* and the *Parliamentary Employment and Staff Relations Act* to administer the collective bargaining and grievance adjudication systems in the federal Public Service and

Parliament. Board members hold hearings with respect to grievance adjudication, complaints and other types of proceedings, throughout Canada. The PSLRB provides conciliation and arbitration services to assist parties in the renewal and negotiation of new collective agreements; mediation services to help parties work together to resolve grievances and complaints; and, an interactive training session on interest-based negotiations and mediation. A compensation analysis and research function consists of delivering information on comparative rates of pay, employee earnings, conditions of employment and benefits in the public and private sectors. The Board is required by statute to provide physical and administrative support services to the National Joint Council (NJC), but plays no direct role in its operations.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Public Service Staffing Tribunal

Strategic Outcome

Fair and impartial resolution of disputes related to internal appointments and lay-offs in the Government of Canada.

Program Activity Descriptions

Adjudication and mediation of complaints filed under the Public Service Employment Act

Pursuant to the new *Public Service Employment Act*, the mandate of the Public Service Staffing Tribunal

(the Tribunal) is to consider and dispose of complaints stemming from an internal appointment, the implementation of a corrective measure ordered by the Tribunal, the revocation of an appointment or a lay-off. In considering whether a complaint relating to an internal appointment or a lay-off is substantiated, the Tribunal may interpret and apply the *Canadian Human Rights Act*. If the Tribunal finds that the complaint is founded, it may order that compensation be paid. The Tribunal may also provide mediation services at any stage of a proceeding in order to resolve a complaint.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Registry of the Public Servants Disclosure Protection Tribunal

Strategic Outcome

Remedial and disciplinary actions that ensure complainants to the Office of the Public Sector Integrity Commissioner are protected against reprisals.

Program Activity Descriptions

Reprisal hearings program

The Registry of the Public Servants Disclosure Protection Tribunal supports the Tribunal in fulfilling its mandate by supporting the effective management of the Tribunal's hearing processes, including by receiving documents, processing cases, maintaining Tribunal records, providing logistical support, providing legal and

policy support, orientation and training to Tribunal members and informing clients of Tribunal procedures and directives.

Telefilm Canada

Strategic Outcome

Canadians have access to high quality, popular Canadian audio-visual productions.

Program Activity Descriptions

Audience development for canadian audiovisual productions

The Canada Feature Film Fund (CFFF) is the primary instrument of the federal government's Canadian Feature Film Policy, entitled From Script to Screen: New Policy Directions for Canadian Feature Film. The objective of the Policy, and of the CFFF, is to capture 5% of the domestic box office. The CFFF provides assistance for screenwriting, project development, production, marketing and dubbing and subtitling of quality Canadian feature films and official co-productions that have high box office potential in Canada. In administering the CFFF, Telefilm seeks to support distinctively Canadian feature films that reflect Canadian society, including its cultural diversity. The financial assistance provided by Telefilm Canada is intended to contribute to the overall growth, and the professional and economic development of the Canadian film industry. Telefilm's financial participation may take various forms: investments, conditionally repayable advances, grants or performance envelopes. As an investor, Telefilm Canada shares the risks and eventual revenues of the productions it participates in financially. The CFFF is the subject of a Memorandum of Understanding (MOU) between Telefilm Canada and the Department of Canadian Heritage. Under the terms of the MOU, a minimum of one-third of funds are reserved for French-language projects.

Canadian audiovisual industry development

This program activity is intended to complement Telefilm Canada's assistance to the Canadian audiovisual industry-feature film, television and interactive media sectors, by supporting activities that enhance the overall environment and conditions in which Canadian content creators produce, promote, sell and distribute their productions. The objectives of these activities are: to provide opportunities for Canadian companies in the audiovisual industry to leverage other sources of financing in Canada and abroad; to increase their capacity through sales and business development at markets; to provide high quality training initiatives and events for industry professionals, and to provide career advancement opportunities for content creators from visible minority, aboriginal and official languages communities. Support in the form of grants is provided for the following: festivals and events that can raise the profile of Canadian productions with Canadian audiences; industry professionals who attend international festivals and markets; and professional development initiatives. In addition, Telefilm Canada certifies official treaty co-productions on behalf of the Minister of Canadian Heritage.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Department

Strategic Outcome

Migration of permanent and temporary residents that strengthens Canada's economy

Program Activity Descriptions

Permanent economic residents

Design Rooted in legislative requirements outlined in the *Immigration and Refugee Protection Act*, the focus of this program is on the selection and processing of immigrants who can become permanent residents and contribute to Canada's economic development. The acceptance of qualified permanent residents helps the government meet its economic objectives, such as building a skilled workforce, by addressing immediate and longer term labour market needs. The selection and processing involve the issuance of permanent resident visas to qualified applicants, as well as the refusal of unqualified applicants.

Temporary economic residents

Rooted in legislative requirements outlined in the *Immigration and Refugee Protection Act*, the focus of this program is on processing and facilitating the entry into Canada of temporary workers and students. Temporary economic migration benefits Canada's economic growth. The selection and processing involve the issuance of temporary resident visas, work permits and study permits to qualified applicants, as well as the refusal of unqualified applicants.

Strategic Outcome

Family and humanitarian migration that reunites families and offers protection to the displaced and persecuted.

Program Activity Descriptions

Family and discretionary immigration

Citizenship and Immigration (CIC) facilitates family reunification by enabling eligible foreign nationals to be sponsored by family members in Canada who are Canadian citizens or permanent residents. Spouses and partners, dependent children (including adopted children), and other eligible relatives such as parents and grandparents are welcomed to Canada under this program. CIC may also grant permanent resident or other status to persons who would not otherwise qualify in any immigration category, in cases where there are strong humanitarian and compassionate considerations, or for public policy reasons. Such exceptional and discretionary immigration measures provide the flexibility to approve deserving cases not anticipated in the legislation.

Refugee protection

The Refugee protection program is in the first instance about saving lives and offering protection to the displaced and persecuted. One arm of the program starts overseas where refugees and persons in refugee-like situations are selected by Canadian visa officers to be resettled as permanent residents to Canada. Flowing from Canada's international and domestic legal obligations, the in-Canada asylum system evaluates the claims of individuals seeking asylum in Canada and grants permanent residence when a positive decision is rendered by the Immigration and Refugee Board.

Strategic Outcome

Newcomers and citizens participate to their full potential in fostering an integrated society.

Program Activity Descriptions

Settlement and integration of newcomers

In accordance with the Canadian Multiculturalism Act, the Employment Equity Act and the Immigration and Refugee Protection Act, the settlement and integration program develops policies and programs to support the settlement, resettlement, adaptation and integration of newcomers into Canadian society focused on information/orientation, language/skills, labour market access and welcoming communities. All permanent residents are eligible for settlement and integration programs. Programming is delivered by third parties (including provincial and municipal governments, school boards and post-secondary institutions, settlement service organizations and other non-governmental actors, and the private sector) across the country. However, accountability for expended funds and attaining outcomes remains with Citizenship and Immigration Canada.

Citizenship for newcomers and all Canadians

The purpose of the Citizenship Program is to administer citizenship legislation and promote the rights and responsibilities of Canadian citizenship. CIC administers the acquisition of Canadian citizenship by developing, implementing, and applying legislation, regulations and policies that protect the integrity of

Canadian citizenship and allow eligible applicants to be granted citizenship or be provided with a proof of citizenship. In addition, the program promotes citizenship, to both newcomers and the Canadian-born, through various events, materials and projects. Promotional activities focus on enhancing knowledge of Canada's history, institutions, and values, as well as fostering an understanding of the rights and responsibilities of Canadian citizenship.

Multiculturalism for newcomers and all Canadians

The Multiculturalism Program is the principal means of carrying out the Minister's responsibilities under the Canadian Multiculturalism Act for promoting the full and equitable participation of individuals and communities of all origins. Grants and contributions to not-for-profit organizations, the private sector, provincial and municipal governments, non-federal public institutions and individuals seek to advance overarching Program objectives. These objectives are to: build an integrated, cohesive society (through intercultural understanding, civic memory and pride and democratic values, and equality of opportunity); improve the responsiveness of institutions to the needs of a diverse population; and, actively engage in discussions on multiculturalism and diversity at the international level. Direct public outreach and promotional activities by the Program primarily target young people. The Program assists federal partners to meet their obligations under the Act and ensures annual reporting to Parliament on its operation. It also engages with non-federal public institutions seeking to respond to diversity. The Program provides a forum for cooperation with provinces and territories and is the focus for Canada's participation in international agreements and institutions with respect to multiculturalism, anti-racism and related issues.

Strategic Outcome

Managed migration that promotes Canadian interests and protects the health, safety and security of Canadians

Program Activity Descriptions

Health management

This program aims to provide effective immigration health services to manage the health aspect of migrant access and settlement to Canada, and facilitate the arrival of resettled refugees to Canada and their integration while contributing to the protection of the health and safety of all Canadians and contributing to the maintenance of sustainable Canadian health and social services.

The program aims to evaluate health risks related to immigration and coordinate with international and Canadian health partners to develop risk management strategies and processes to assess the health of applicants wishing to immigrate to Canada and develop pre-departure, in-transit, and post arrival interventions. The strategies, processes and interventions are intended to reduce the impact of the risks identified on the health of Canadians and on Canada's health and social services.

Migration control and security management

In accordance with the *Immigration and Refugee Protection Act* (IRPA) and Regulations, this program activity aims to ensure the managed migration of people to Canada in order to protect the health, safety and security of Canadians. Even as CIC facilitates the travel of bona fide permanent residents, visitors, students and temporary workers, it also deploys an array of policy interventions to manage access and entry to Canada, including visa, admissibility, information sharing, travel document, and identity management policies. Effective partnerships with public safety-related departments

and organizations are an essential component of this program activity

Under IRPA, all visitors to Canada require a Temporary Resident Visa (TRV) except where an exemption has been granted under the Regulations. The TRV requirement is Canada's primary means of controlling migration and allows for the screening of individuals for health, safety and security risks before they begin travel to Canada.

CIC also aims to ensure that admissibility policy continues to provide flexibility to address compelling circumstances that warrant a foreign national's presence in Canada, while maintaining the integrity of Canada's immigration system. Information sharing agreements and mechanisms support immigration management and provide security advantage.

This program activity supports CIC's policy initiatives related to identity management and entry document requirements, including the expansion of biometrics to accurately identify foreign nationals entering Canada and the provision of a highly secure proof of status document to all permanent residents. The Permanent Resident Card also serves as a travel document and is required for all commercial travel to Canada.

Canadian influence in international migration and integration agenda

As part of its mandate, CIC aims to influence the international migration and integration policy agenda. This is done by developing and promoting, together with other public policy sectors, Canada's position on international migration, integration, and refugee protection issues and through participation in multilateral, regional and bilateral forums.

CIC works closely with partner countries to ensure the effective administration of immigration laws through the exchange of information, including biometric data. This international migration policy development helps

Canada advance its interests in the context of international migration as well as meet its international obligations and commitments.

CIC supports international engagement and partnerships through membership in the International Organization for Migration, and contribution arrangements with other international migration policy organizations.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Immigration and Refugee Board of Canada

Strategic Outcome

Resolve immigration and refugee cases before the Immigration and Refugee Board of Canada efficiently, fairly and in accordance with the law.

Program Activity Descriptions

Refugee protection

Renders quality decisions and otherwise resolves cases in a timely manner regarding refugee protection claims made by persons in Canada, and pre-removal risk assessments of persons subject to a removal order.

Immigration appeal

The Immigration appeal program renders quality decisions and otherwise resolves in a timely manner cases regarding sponsorship applications refused by the Department of Citizenship and Immigration; certain re-

moval orders made against permanent residents, refugees and other protected persons, and holders of permanent resident visas; permanent residents who have been found outside of Canada not to have fulfilled their residency obligation; and appeals by the Minister of Public Safety of decisions of the Immigration Division at admissibility hearings.

Refugee appeal

Renders quality decisions and otherwise resolves cases in a timely manner regarding appeals against a decision made on a refugee protection claim of the Refugee Protection Division.

Admissibility hearings and detention reviews

The Admissibility hearings and detention reviews program renders quality decisions and otherwise resolves in a timely manner cases regarding admissibility of foreign nationals or permanent residents who are alleged to be inadmissible to Canada pursuant to the provisions of the *Immigration and Refugee Protection Act* (IRPA); and detention reviews for foreign nationals or permanent residents who are detained under IRPA authority.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Strategic Outcome

A competitive and diversified economy for the regions of Quebec.

Program Activity Descriptions

Community development

This program activity enables Quebec regions and communities to maintain and develop their economic activity base by relying on their own assets. It has three underlying objectives. The first, Community mobilization, fosters community development and increased mobilization through the development of visions and large-scale local and regional projects. The second, Local development, supports communities through entrepreneurship assistance and the creation and maintenance of viable enterprises. The third, Attractive communities, raises communities' capabilities to attract tourists and skilled individuals. This program activity mainly targets small and medium-sized enterprises (SME) and non-profit organizations (NPO). Two grants and contributions programs support

it, namely the Community diversification program and the national Community futures program.

Enterprise competitiveness

This program activity enables enterprises to improve their performance and competitiveness through higher productivity, earned income, all of which help create conditions conducive to sustainable growth. Underpinning this program activity are two objectives: the first, Development of enterprises' skills, fosters an increase in capabilities with respect to management, innovation, adoption of advanced technology, market development, and integration with globalized production chains. Notably, it encourages support for organizations that are dedicated to improving the strategic capabilities of small and medium-sized enterprises (SME) in order to enhance their performance and facilitate their adjustment. The second objective, Strategic enterprises, supports the establishment and first expansion phases of enterprises in economic activities deemed strategic to a region's development in order to consolidate the economic base of the regions. This program activity mainly targets SMEs and non-profit organizations (NPO) and is supported by two grants and contributions programs, namely the Business and regional growth program and the Canadian apparel and textile industries program (CANtex).

Competitive positioning of sectors and regions

This program activity improves the international competitiveness of the regions by enhancing their knowledge and competitive advantages on the world stage. It has two objectives. The first, Growth Poles, develops and consolidates growth poles by fostering innovation and networking among knowledge players (universities and research institutes and centres, enterprises and groups of enterprises, and technology brokers), the development of a critical mass of knowledge, and the enhancement and transfer of technology. The second objective, International promotion of regions, en-

hances the international competitiveness of Quebec regions through integrated promotion of locational factors (labour force, market access, infrastructure, costs and political stability), and attraction of direct foreign investment and reinvestment by foreign enterprises already established in Quebec. This program activity mainly targets small and medium-sized enterprises (SME) and non-profit organizations (NPO) and is supported by the Business and regional growth grants and contributions program.

Policies, programs and initiatives

This program activity enables the regions and communities of Quebec to benefit from adapted, consistent, and effective federal action that produces positive socio-economic repercussions, notably by generating and disseminating regional economic development knowledge that is useful to development stakeholders and by seizing business and development opportunities. This program activity is backed by four objectives: analysis and research; policies and programs; representation and influence; and cooperation and collaboration.

Infrastructure

This program activity helps improve Quebec's urban and rural municipal infrastructure and enhance citizens' quality of life. This is realized by investing in projects that increase environmental quality, support long-term economic growth, upgrade community facilities and establish modern 21st-century infrastructure through the adoption of better technology, new approaches and best practices. The Government of Canada has implemented various joint infrastructure programs in collaboration with the provinces, territories, municipalities, First Nations and private sector. The Agency has the special mandate to manage the Canada-Quebec Infrastructure Program Agreement. Projects that contribute to meeting the objectives of this program include those that improve water quality,

solve problems posed by the release of wastewater effluent, promote the safe circulation of persons and merchandise, improve public transportation and enhance citizens' quality of life through the construction of infrastructure, facilities or buildings with urban or regional economic impact. This program activity mainly targets municipalities and non-profit organizations (NPO) and is supported by the Infrastructure Canada program (contributions program).

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Department

Strategic Outcome

Canada's natural environment is conserved and restored for present and future generations.

Program Activity Descriptions

Biodiversity-Wildlife and habitat

This program aims to prevent biodiversity loss while still enabling sustainable use by protecting and recovering species at risk, conserving, restoring and rehabilitating significant habitats, and conserving and managing migratory birds. It also aims to ensure a coordinated and coherent national assessment, planning and action to protect biodiversity, including viable populations of species, healthy and diverse ecosystems, and genetic resources. The program includes the formation of strategic partnerships for integrated management of Canada's natural capital including stewardship and the sustainable management of landscapes. Legal and statutory responsibilities for this program include

the Species at Risk Act; the Migratory Birds Convention Act, the Canada Wildlife Act; and the Wild Animal and Plant Protection and Regulation of International and Interprovincial Trade Act. International responsibilities include the United Nations Convention on Biological Diversity (1992), the Convention on International Trade in Endangered Species of Wild Flora and Fauna (CITES), and the Convention on Wetlands of International Importance, especially as Waterfowl Habitat (known as the Ramsar Convention). Contributions in support of Biodiversity-Wildlife and habitat are used as a component of this program.

Water resources

This program addresses the implications to water resources from economic growth, climate change and other factors, ensuring threats to Canada's water resources and aquatic ecosystems are minimized, and the sustainability of the resource is maintained. Conservation, protection and sustainable use of water resources are critical aspects of Canada's economic, social and ecological well-being. The program is delivered in collaboration with partners that include other federal departments, provinces and territories, and a range of non-governmental organizations. The program activity encompasses Environment Canada's contribution to addressing water issues and its role in collaborating with other departments to determine priorities for water quality, quantity, and aquatic ecosystem monitoring and research, by providing scientific information and advice to decision makers, and by building best management practices. The program supports the implementation of the Canada Water Act, the 1987 Federal Water Policy, the Canadian Environmental Protection Act, 1999, the Fisheries Act and the International Boundary Waters Treaty Act. Contributions in support of Water Resources are used as a component of this program.

Sustainable ecosystems

This program aims to sustain Canada's ecosystems over the long term by working with Canadians, their governments and the private sector on ecosystem initiatives and providing them with the environmental information and tools required to incorporate social, economic and environmental considerations into their decision making and action. The ecosystem approach to environmental management focuses on maintaining the capacity of a whole system to produce ecological goods and services, such as water resources, air and water quality, and genetic resources, which maintain our economy, security, health and well-being. This program is the focal point for the development and implementation of Environment Canada's sustainability policies and strategies, information to support integrated, ecosystem-scale priority setting, community engagement in remediation of sites, youth engagement, and research and reporting on environmental status and trends. The program facilitates inter-disciplinary and cross-sectoral planning and information sharing among partners. Contributions in support of Sustainable Ecosystems are used as a component of this program.

Compliance promotion and enforcement-Wildlife

This program serves to conserve and protect the natural environment through compliance promotion and enforcement of the following wildlife-related legislation administered by Environment Canada: the Species at Risk Act, the Migratory Birds Convention Act, 1994, the Wild Animal and Plant Protection and Regulation of International and Interprovincial Trade Act, and the Canada Wildlife Act. Measures to promote compliance include communication and publication of information, education, and consultation with parties affected by these statutes. The program maintains a contingent of enforcement officers, whose actions focus on ensuring and verifying conformity with laws, regulations and permits pertaining to wildlife, through several activities—which include gathering intelligence, con-

ducting inspections and pursuing investigations to take appropriate enforcement measures against alleged offenders. These actions ensure that damages and threats to biodiversity are reduced for the benefit of Canadians and the international community.

Strategic Outcome

Canadians are equipped to make informed decisions on changing weather; water and climate conditions

Program Activity Descriptions

Weather and environmental services for Canadians

The program activity provides weather warnings, forecasts and information to anticipate, manage and adapt to the risks and opportunities of changing weather, water and climate conditions. It involves monitoring, research and development, supercomputing, production and service delivery. Because a global effort is needed to monitor, understand and predict constantly changing weather, water and climate conditions, this program relies on various collaborators, in Canada and around the world; key ones include the World Meteorological Organization of the United Nations, as well as the media, academia and all levels of government within Canada. The program supports the Department in meeting obligations and responsibilities conferred by the Department of the Environment Act, the Weather Modification Information Act, the Emergency Management Act (2007) and memoranda of agreement with national meteorological and space agencies. This Government of Canada program is the only one with such a national mandate, and has the infrastructure and skills to deliver this service. Grants in support of weather and environmental services for Canadians and Contributions in support of Weather and environmental services for Canadians are used as components of this program.

Weather and environmental services for targeted users

The program activity provides essential decision-making tools and information to targeted sectors and their regulatory agencies to help them anticipate, manage and adapt to the risks and opportunities created by changing weather and climate conditions. This program activity involves monitoring, research, production and service delivery. It provides observations, forecasts and warnings 24 hours per day, 365 days per year and other tools tailored to users' specific needs. It requires various collaborations, within Canada (including other government departments and provincial agencies), and internationally with the World Meteorological Organization, United States Coast Guard and the International Civil Aviation Organization. This program supports the Department of the Environment Act; it helps other government departments meet their obligations under the Aeronautics Act, Oceans Act and the Fisheries Act; and supports Memoranda of Agreement with Transport Canada, National Defence and various provincial agencies. This program activity is unique, having the only national mandate, infrastructure or skills to deliver this service.

Strategic Outcome

Threats to Canadians and their environment from pollution are minimized.

Program Activity Descriptions

Climate change and clean air

This program is critical to protect the health of Canadians and the environment from the harmful effects of air pollutants and the impacts of greenhouse gas emissions. This will be achieved through regulating air pollutants and controlling greenhouse gas emissions; collaboration and partnerships with other levels of government and non-governmental organizations; awareness and promotion activities and programs for Canadians to reduce emissions and pollutants from ve-

hicles and consumer products; strengthening international cooperation (particularly with the United States), including implementation of international agreements related to greenhouse gas emissions and air pollutants; and advancing science-based approaches and innovative technologies in support of investment decisions, policy making, and regulations. Contributions in support of Climate change and clean air are used as a component of this program.

Substances and waste management

Activities in this program reduce threats to the environment posed by pollutant and toxic releases and waste from human activities. Pollutant and toxic releases and waste may exert a direct harmful effect on plants, animals, humans and the environment due to their nature, volume or manner of release. The program assesses environmental threats posed by harmful substances and other substances of concern in terms of their fate and effects, and develops and implements prevention, reduction, elimination and management measures to deal with these substances. Contributions in support of Substances and waste management are used as a component of this program.

Compliance promotion and enforcement - pollution

This program contributes to minimizing damages and threats to the natural environment and biodiversity, through the promotion and enforcement of Environment Canada—administered legislation. Program actions focus on pollution, including toxic substances, their release to air, water or land, and the import and export of hazardous waste that present a risk to the environment and/or human health. Compliance promotion initiatives provide information to regulatees on legislative requirements, the environmental benefits of compliance and the potential penalties of non-compliance. The program maintains a contingent of enforcement officers, whose activities include gathering intelligence, conducting inspections to verify compliance

with laws and regulations, and pursuing investigations to take appropriate enforcement measures against offenders. The program includes compliance analysis and planning to integrate data from all available sources in order to provide continuous feedback on program activities and results.

Strategic Outcome

Canadian Environmental Assessment Agency

Strategic Outcome

Environmental considerations are taken into account in federal government decisions respecting policies, plans, programs and projects.

Program Activity Descriptions

 $Environmental\ assessment\ support\ program$

This program comprises the Public participation program, James Bay Northern Quebec Agreement, the Training and guidance program and the Environmental assessment management program – the various means by which Canadians, industry, stakeholders and interested parties interact and encounter their various obligations pursuant to the *Canadian Environmental Assessment Act*. This includes public participation, information dissemination, guidance and record keeping. This is done with the goal of ensuring a transparent and rigorous environmental assessment process is applied under the auspices of the *Canadian Environmental Assessment Act*.

Environmental assessment development program

This program is aimed at developing and maintaining an effective, efficient and integrated environmental assessment process at the federal level, taking into full account the interactions with other environmental assessment, consultative and regulatory decision-making processes in Canada, as well as the trans-boundary context for environmental assessment. A sound environmental assessment process is vital to achieving the Strategic Outcome. Ensuring that environmental considerations are integrated into federal government decision-making through sound environmental assessment practices supports quality of life for Canadians, environmental sustainability and economic competitiveness.

National Round Table on the Environment and the Economy

Strategic Outcome

Federal policy development and decisions in other key sectors are influenced by advice on sustainable development issues pertaining to the environment and the economy.

Program Activity Descriptions

Advisory program on environment and economy issues

Raising awareness and understanding among Canadians and their governments about the challenges of sustainable development and promoting viable solutions, is vital to Canada's environmental and economic future. Through this program, the National Round Table on the Environment and Economy (NRTEE) strives to influence policy development and decision making on select sustainable development issues pertaining to the environment and the economy. The NTREE conducts research, analysis, and produces information and advice on selected sustainable development issues. The agency promotes its findings and recommendations through a variety of communications channels such as media relations, stakeholder briefings and other events, publications and the agency website to influence policy and decisions of policy-makers in the federal government and other key sectors such as other levels of government, industry and non-government organizations across the country.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Parks Canada Agency

Strategic Outcome

Canadians have a strong sense of connection, through meaningful experiences, to their national parks, national historic sites and national marine conservation areas and these protected places are enjoyed in ways that leave them unimpaired for present and future generations.

Program Activity Descriptions

Visitor experience

This program supports the opportunities provided for the approximately 22 million person visits that are made annually to Canada's national parks, national historic sites and national marine conservation areas by Canadians and international visitors. The visitor experience is the sum total of a visitor's personal interaction with the protected heritage place that helps them create meaning and establish connection with the place. The experience begins with awareness of the site, followed by planning the visit, travelling to and welcoming and orientation upon arrival. During the visitor's time on site, it includes participation in recreational and interpretive activities and the use of accommodation, trails, facilities, services and supporting infrastructure. This is followed by departure and the post-visit relationship. Investments in the different stages of the visitor experience cycle facilitate opportunities for enjoyment and learning, leading to a sense of personal connection and the continued relevance of Canada's protected heritage places for Canadians.

Heritage resources conservation

This program includes maintenance or restoration of ecological integrity in national parks through protection of natural resources and natural processes; ensuring the commemorative integrity of national historic sites managed by Parks Canada and influencing the commemorative integrity of those managed or owned by third parties; the protection and management of cultural resources under the administration of Parks Canada; and, the sustainable use of national marine conservation areas including protection of unique marine ecosystems. This program also includes fulfilling legal responsibilities assigned to Parks Canada by the *Species at Risk Act* and the *Canadian Environmental Assessment Act*. The protection of Canada's most special natural and cultural resources ensures that current and future generations will enjoy a system of protected heritage places.

Townsite and throughway infrastructure

This program involves managing, operating and providing municipal services to five townsite communities within Canada's national parks. It also involves the operation of provincial and inter-provincial highways and waterways that connect communities and pass through national parks and national historic sites.

Public appreciation and understanding

This program activity aims to increase Canadians' understanding, appreciation, support and engagement with respect to the natural and historical heritage of Parks Canada administered places. This is accomplished by reaching Canadians at home, at leisure, at school and in their communities through relevant and effective communication and public outreach education initiatives as well as by engaging many stakeholders and partners in the development and implementation of the Agency's future direction.

Heritage places establishment

This program includes systems planning, completing feasibility studies, research, consulting with stakeholders and the public, negotiating with other governments and Aboriginal organizations and obtaining Ministerial approval, resulting in established national parks and national marine conservation areas and designated national historic sites of Canada and other heritage places. Canada's national parks and national marine conservation areas, as well as the persons, places and events of national historic significance to Canada are symbols to the world and are part of the fabric of the nation. Preservation of Canada's natural and cultural heritage and making it available to Canadians for discovery and enjoyment is of key importance. Establishing heritage places is essential to enhancing pride, encouraging stewardship and giving expression to our identity as Canadians, and involving Canada in the internationally shared objective of protecting and commemorating the best of the world's natural and cultural heritage.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Department

Strategic Outcome

A strong and sustainable economy, resulting in increasing standards of living and improved quality of life for Canadians.

Program Activity Descriptions

Transfer and taxation payment programs

The Financial Administration Act created the Department of Finance with a mandate that includes the supervision, control and direction of all matters relating to the financial affairs of Canada not by law assigned to the Treasury Board or any other minister. This program activity administers transfer and taxation payments to provinces and territories in accordance with legislation and negotiated agreements to provide for fiscal equalization and support for health and social programs and other shared priorities. Also included are commitments and agreements with international financial institutions aimed at aiding in the economic advancement of devel-

oping countries. In addition, from time to time, the government will enter into agreements or enact legislation to respond to unforeseen pressures. These commitments can result in payments, generally statutory transfer payments, to a variety of recipients including individuals, organizations and other levels of government.

Treasury and financial affairs

Provides direction of Canada's debt management activities, including the funding of interest costs for the debt and service costs for new borrowings. In addition, the program manages investments in financial assets needed to establish a prudent liquidity position. This program supports the ongoing refinancing of government debt coming to maturity, the execution of the budget plan and other financial operations of the government, including governance of the borrowing activities of major government backed entities such as crown corporations. This program activity is also responsible for the system of circulating Canadian currency (bank notes and coins) to meet the needs of the economy.

Economic and fiscal policy framework

This program activity is the primary source of advice and recommendations to the Minister of Finance regarding issues, policies and programs of the Government of Canada related to the areas of economic and social policy, federal-provincial fiscal relations, financial affairs, tax matters and international trade and finance. The work conducted by this program activity involves extensive research, analysis, and consultation and collaboration with partners in both the public and private sectors including the government, Cabinet and Treasury Board, Parliament and parliamentary committees, the public and Canadian interest groups, departments, agencies and Crown Corporations, provincial and territorial governments, financial market participants, the international economic and fi-

nance community and the international trade community. In addition, this program manages the negotiation of agreements, drafting of legislation and sponsoring of bills through the parliamentary process that are subsequently administered by other program activities within the departments and by other government departments and agencies. The aim of this program activity is to create a sound and sustainable fiscal and economic framework that will generate sufficient revenues and provide for the management of expenditures in line with the Budget Plan and financial operations of the Government of Canada.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Auditor General

Strategic Outcome

Through legislative auditing, we contribute to a well-managed and accountable government for Canadians.

Program Activity Descriptions

Legislative auditing

We conduct independent audits and studies that provide objective information, advice and assurance to Parliament, government and Canadians.

Canada Deposit Insurance Corporation

Strategic Outcome

To provide, for the benefit of persons having deposits with member institutions, deposit insurance against loss of part or all of such deposits because of the insolvency of the member institution.

Canadian International Trade Tribunal

Strategic Outcome

Fair, timely and transparent disposition of international trade cases, procurement cases and government-mandated inquiries within the Tribunal's jurisdiction.

Program Activity Descriptions

Adjudication of trade cases (quasi-judicial role)

The Tribunal's adjudicative mandate is to provide a fair, timely and transparent trade remedies system to Canada's business sector, thereby preserving confidence in the Canadian market, to the benefit of Canadian businesses and consumers. The Tribunal acts as an independent, quasi-judicial, decision-making body that derives its adjudication authority from the Canadian International Trade Tribunal Act, the Special Import Measures Act (SIMA), the Customs Act and the Excise Tax Act. It operates within Canada's trade remedies system to apply existing policies and laws on trade agreements seeking to address unfair competition in the domestic market or provide emergency protection against imported items that are seen to cause injury to a domestic industry. The Tribunal also hears appeals from decisions of the Canada Revenue Agency (CRA) and Canada Border Services Agency (CBSA). It has also been designated as the bid challenge authority under the Agreement on Internal Trade (AIT), the North

American Free Trade Agreement (NAFTA) and the World Trade Organization (WTO) Agreement on Government Procurement (AGP) against the federal government procurement process.

In its quasi-judicial role, the Tribunal's caseload is comprised of the following:

Unfair trade cases – inquiries under SIMA into whether dumped and/or subsidized imports have caused or are threatening to cause injury to a Canadian industry;

Bid challenges – inquiries into complaints by potential suppliers concerning federal government procurement under NAFTA, the AIT and the AGP;

Appeals of decisions of the CBSA made under the *Customs Act* and SIMA, and decisions of the CRA under the *Excise Tax Act*; and

Safeguard cases – inquiries into whether the rapid build-up of imports from China, or from around the world, is causing injury to a Canadian industry.

General economic inquiries and references (advisory role)

In its advisory role, the Tribunal's caseload is comprised of three types of cases. First, the Tribunal plays an advisory role when requested by Government to recommend measures to alleviate injury to domestic producers pursuant to a safeguard inquiry. Periodically, the Government may also direct the Tribunal to inquire into general economic, trade or tariff matters. In such inquiries, the Tribunal has the power to conduct research, receive submissions, hold hearings and report with recommendations, as required, to the Government or the Minister of Finance. When these requests arise, the Tribunal faces a strain on its resources and must meet very strict government imposed deadlines.

Finally, the Tribunal has received a standing reference from the Minister of Finance to investigate requests from domestic producers for tariff (import tax) relief on imported textile inputs for use in their manufacturing operations and make recommendations to the Minister that would maximize the net economic benefits to Canada.

In its advisory role, the Tribunal's caseload is comprised of the following:

Safeguard cases – where the Tribunal finds injury to a Canadian industry, the Governor in Council may request the Tribunal to recommend appropriate measures for dealing with the build-up of imports;

General economic, trade and tariff inquiries referred by the Government – inquiries and advice on such economic, trade and tariff issues as are referred to the Tribunal by the Governor in Council or the Minister of Finance; and

Standing tariff reference referred by the Minister of Finance – investigations into requests from Canadian producers for tariff relief on imported textile inputs that they use in their production.

Financial Consumer Agency of Canada

Strategic Outcome

The Financial Consumer Agency of Canada (FCAC) has five objectives:

- supervise financial institutions to ensure they comply with federal consumer protection measures (known as consumer provisions) that apply to them;
- promote the adoption by financial institutions of policies and procedures designed to implement the consumer provisions;
- monitor the compliance of financial institutions with voluntary codes of conduct and any other public commitments they have made to protect the interests of consumers;
- promote awareness of the obligations of financial institutions; and
- foster an understanding of financial services and issues relating to financial services.

Program Activity Descriptions

Financial Consumer Agency of Canada

We provide consumer information and oversee financial institutions to ensure that they comply with federal consumer protection measures.

Financial Transactions and Reports Analysis Centre of Canada

Strategic Outcome

FINTRAC's detection and deterrence of money laundering and terrorist financing contributes to the public safety of Canadians and helps protect the integrity of Canada's financial system.

Program Activity Descriptions

Detection and deterrence of money laundering and terrorist financing

Within this program activity, FINTRAC undertakes activities related to the collection of financial information and the production and dissemination of financial intelligence. In addition, the Centre undertakes activities to ensure compliance by reporting entities with their obligations under Part I of the *Proceeds of Crime (Money Laundering) and Terrorist Financing Act.*

Strategic Outcome

Office of the Superintendent of Financial Institutions

Strategic Outcome

A safe and sound Canadian financial system.

Program Activity Descriptions

Regulation and supervision of federally regulated financial institutions

This program involves regulating and supervising federally regulated financial institutions (FRFIs) to determine whether they are in sound financial condition and are complying with their governing law and supervisory requirements; monitoring the financial and economic environment to identify issues that may impact these institutions negatively; and, intervening in a

timely manner to protect depositors and policyholders from undue loss, while recognizing that management and boards of directors are ultimately responsible, and that financial institutions can fail. Costs for this program are recovered through base assessments and user fees and charges paid by the federally regulated financial institutions covered under the Bank Act, Trust and Loan Companies Act, Insurance Companies Act and the Cooperative Credit Associations Act. The Office of the Superintendent of Financial Institutions also receives revenues for cost-recovered services to provinces, for which it provides supervision of their institutions on a fee for service basis.

Regulation and supervision of federally regulated private pension plans

This program involves regulating and supervising federally regulated private pension plans to determine whether they are meeting minimum plan funding requirements and are complying with their governing law and supervisory requirements. This program provides risk assessments of pension plans covering employees in federally regulated areas of employment; timely and effective intervention and feedback to protect the financial interests of plan members and beneficiaries from undue loss, while recognizing that plan administrators are ultimately responsible, and that plans can fail; a balanced relevant regulatory framework; and a prudentially effective and responsive approvals process. This program incorporate risk assessment and intervention, regulation and guidance, and approvals and precedents related to federally regulated private pension plans under the Pension Benefits Standards Act, 1985. The costs for this program are recovered from pension plan fees based on the number of members in each federally regulated pension plan.

Strategic Outcome

A financially sound and sustainable Canadian public retirement income system.

Program Activity Descriptions

Actuarial valuation and advisory services

The federal government and the provinces, through the Canada Pension Plan (CPP), public sector pension arrangements and other social programs have made commitments to Canadians and have taken on emanated responsibility for the financing of these commitments. Some are long-term and it is important that decision-makers, parliamentarians and the public understand these and the inherent risks. This program plays a vital and independent role in this process. It provides checks and balances on the future costs of the different pension plans under its responsibilities. This program provides a range of actuarial services, under legislation, to the CPP and some federal government departments. It conducts statutory actuarial valuations of the CPP, Old Age Security (OAS) and Canada Student Loans programs, and pension and benefits plans covering the Federal Public Service, the Canadian Forces, the Royal Canadian Mounted Police (RCMP), federally appointed judges, and Members of Parliament. The Office of the Chief Actuary (OCA) is funded by fees charged for its actuarial valuation and advisory services and by an annual parliamentary appropriation.

PPP Canada Inc.

Strategic Outcome

Transform Canada into a leader for public-private partnerships (P3).

Program Activity Descriptions

Federal public-private partnership initiatives

Through this program activity, PPP Canada Inc. will:

- manage a Public-Private Partnerships Fund (P3 Fund), a unique infrastructure program designed to support innovative public-private partnerships projects;
- assess public-private partnerships opportunities for contributions under other Government of Canada infrastructure programs to ensure consideration of such arrangements;
- assess public-private partnership opportunities and advise on the execution of public-private partnership projects at the federal level; and
- act as a source of expertise and advice for public-private partnership matters in order to encourage the further development of Canada's public-private partnerships market.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Strategic Outcome

Safe and Secure Waters

Program Activity Descriptions

Fleet operational readiness

The CCG Fleet operational readiness (FOR) program provides safe, reliable, available, and operationally capable vessels, air cushion vehicles, helicopters, and small craft with competent and professional crews ready to respond to on-water and maritime related requirements. This program involves fleet management and operations, fleet maintenance, and fleet asset procurement. Through the Fleet operational readiness program, the CCG Agency ensures that the Government of Canada's civilian fleet meets the current and emerging needs and priorities of Canadians and the Government of Canada. The FOR program supports Coast Guard programs, the science and fisheries and aquaculture management activities of Fisheries and Oceans Canada, and the activities of a number of other government departments needing on-water delivery in support of their mandates. The Canadian Coast Guard College is an important contributor to the delivery of this program. Legal basis and authority for this program and capability is found in the *Constitution Act*, 1867 and the *Oceans Act*.

Shore-based asset readiness

The CCG Shore-based asset readiness program ensures that the CCG's non-fleet assets (worth \$1.6 billion) are available and reliable to support delivery of CCG programs. These non-fleet assets include both fixed and floating aids, such as visual aids (e.g. lighthouses and buoys), aural aids (e.g. fog horns), radar aids (e.g. reflectors and beacons) and long-range marine aids, such as the Differential Global Positioning System (DGPS) as well as electronic communication and navigation systems and over 300 radio towers. The Shore-based asset readiness program ensures availability and reliability of these assets through provision of life-cycle investment planning, engineering, acquisition, maintenance and disposal services. The Canadian Coast Guard College is an important contributor to the delivery of this program. As required, this activity is delivered in coordination with Public Works and Government Services Canada (PWGSC). Activities associated with life cycle asset management of CCG shore-based assets are legislated and guided by a number of legal instruments such as the Financial Administration Act and Government Contract Regulations, as well as policies, directives, and guidelines provided by Treasury Board, Treasury Board Secretariat, Industry Canada and PWGSC. Legal basis or authority for this program is found in the Constitution Act, 1867 and the Oceans Act.

Marine communications and traffic services

The Marine communications and traffic services (MCTS) program is delivered by the CCG. Safety of mariners and marine environmental protection in Canadian waters is highly dependent on the efficient and timely communication of information. The MCTS program ensures a reliable communication system is available on a 24/7 basis to contribute to the safety of life at

sea, the protection of the marine environment, the safe and efficient navigation of shipping in Canadian waterways, and maritime domain awareness. Services include the provision of marine distress and general radio communications, the broadcasting of maritime safety information, the screening of vessels entering Canadian waters, the regulation of vessel traffic in selected Canadian waters, and the provision of marine information to other federal government departments and agencies and marine telephone call service on a cost recovery basis. CCG's Shore-based asset readiness and Canadian Coast Guard College activities are integral contributors to the delivery of this program. Legal basis or authority for the MCTS program is found in the Constitution Act. 1867, the Oceans Act, the Canada Shipping Act, 2001 and in virtue of an agreement with Transport Canada, the Arctic Waters Pollution Prevention Act, 2001.

Search and rescue services

The CCG maritime Search and rescue services program (SAR) leads, delivers and maintains preparedness for the 5.3 million square kilometer maritime component of the federal SAR system; it does so with the support of multiple stakeholders and partners, including the Canadian Coast Guard Auxiliary and the Department of National Defence. Through communication, coordination and delivering maritime search and rescue response and operational awareness, the CCG SAR program increases the chances of rescue for people caught in dangerous on-water situations. Coast Guard's Fleet operational readiness and Marine communications and traffic services are integral contributors to the delivery of this activity. Legal basis and authority for the Search and Rescue Services program is found in the Constitution Act, 1867, the Oceans Act, and the Canada Shipping Act, 2001.

Hydrographic products and services

The safe use of Canadian waterways requires knowledge of the physical limitations to navigation. The Canadian Hydrographic Service (CHS) contributes to safety on Canadian waterways by undertaking hydrographic surveys from primarily Canadian Coast Guard vessels to, measure, describe, and chart the physical features of Canada's oceans and navigable inland waters. As Canada's hydrographic authority, the CHS uses this data to produce up-to-date, timely and accurate navigational products in support of domestic and international marine transportation. In addition to supporting safe and secure waters, hydrographic information is made available for a spectrum of research and development applications in engineering, ocean research, and the renewable and non-renewable energy sectors.

Canadian Coast Guard College

Operating as Coast Guard's national, bilingual, degree conferring training institution, the Canadian Coast Guard College educates marine professionals necessary to deliver programs in support of Coast Guard's mission and mandate in marine safety, security and environmental protection. Coast Guard's Fleet operational readiness, Shore-based asset readiness, Marine communications and traffic services, Search and rescue and Environmental response are integral contributors to the delivery of this program. As required, this activity is delivered in partnerships with provincial marine education institutions. Legal basis or authority for this program is found in the *Constitution Act*, 1867 and the *Oceans Act*.

Maritime security

The Maritime security program is led by the Canadian Coast Guard. This program collaborates with federal departments and agencies with maritime security responsibilities, including the Royal Canadian Mounted Police, Canadian Forces, Canada Border Services Agency, Public Safety Canada and Transport Canada, by facilitating the provision of maritime expertise, vessel support and information. The Maritime security program provides these agencies with relevant Coast Guard information in support of their maritime and national security mandates. Coast Guard's Fleet operational readiness, Marine communications and traffic services and Shore-based asset readiness are integral contributors to the delivery of this activity. This activity is delivered in coordination with Fisheries and Oceans Canada's Conservation and enforcement program. Legal basis or authority for the Maritime Security program is found primarily in the *Oceans Act*.

Ocean forecasting

As a maritime nation bordered by three oceans and an extensive network of inland waters, Canada has a vested interest in understanding ocean processes to enable the prediction of ocean conditions and sea state as well as their influence on other earth systems such as global climate. This is accomplished through research and the long term monitoring of key ocean parameters (e.g. temperature, sea level, nutrients, tides, salinity, etc.) via space-based, aerial, autonomous vehicles, and vessel-based observations and the management of data to ensure its integrity and accessibility. This data is the foundation for ocean prediction products, services, and information that is used to inform safe navigation, emergency preparedness (e.g. tsunami warnings, storm surges), adaptation to climatic change, search and rescue, the mitigation of oil spills, and at-sea operations such as offshore oil and gas. Clients of the Program include internal users such as the Canadian Coast Guard, other federal government departments and agencies (e.g. Environment Canada, Department of National Defence, Transport Canada, Public Safety Canada), various maritime industries (e.g. commercial shipping, off.shore oil and gas, fishing industry) the Canadian and international marine science community, and interested Canadians.

Strategic Outcome

Economically prosperous maritime sectors and fisheries.

Program Activity Descriptions

Integrated fisheries resource management

The role of Integrated fisheries resource management is to deliver policies, programs and plans (i.e. Integrated Fisheries Management Plans and Conservation and Harvesting Plans, Rebuilding Plans, Recovery Strategies and Action Plans) under the Fisheries Act, the Species at Risk Act and related regulations, in consultation with Aboriginal groups, provinces and industry, to manage, protect and conserve fisheries resources. The program is necessary to ensure sustainability and provide for the allocation and distribution of harvestable resources among those dependent on the resource (Aboriginal, commercial and recreational fish harvesters). The program, informed by the scientific assessment of the status of fish, invertebrate and marine mammals, works to provide Canadians with a sustainable fishery resource that provides for an economically viable and diverse industry. Canadian Coast Guard (CCG) vessels are used in the delivery of the scientific assessments in support of the program. Fisheries and Oceans Canada's Policy Sector, Compliance and enforcement, Salmonid enhancement program, Aboriginal programs and governance, Habitat management, Species at risk management, Integrated oceans management, Aquatic invasive species, Ecosystem assessment programs, as well as the Department's scientific expertise are integral contributors to the delivery of this program. Components of the program are also coordinated with all Environment Canada, the Canadian Food Inspection Agency, Health Canada, Indian and Northern Affairs Canada, provincial, territorial and municipal governments.

Small craft harbours

The Small craft harbours (SCH) program, directly, or in cooperation with harbour authorities, operates and maintains a national network of harbours, in good working condition, capable of meeting the effective operation of the commercial fishing industry, including aquaculture. Public investment in small craft harbour infrastructure contributes to enhance the capacity of Canada's Maritime Sectors and Fisheries to derive economic benefits. The harbours offer support to businesses in the maritime sectors, including: fish harvesting; fish processing; transportation; commercial recreational operators; tourism; and, other marine users. The harbours are often the only federal presence in small coastal communities and provide the most direct and visible link between these communities and the Canadian government. Also, the Program transfers, where possible, the ownership of non-essential fishing harbours and recreational harbours to local communities through divestiture. Small Craft Harbours operates under the authority of the Fishing and Recreational Harbours Act and its corresponding regulations, and the Federal Real Property and Federal Immovables Act.

Aboriginal strategies and governance

This program provides policy advice on Aboriginal fishing issues, negotiates agreements on the management of Aboriginal fisheries, integrates agreements into overall management frameworks, and advises on land claims and self-government. The delivery of all programs by the Aboriginal Policy and Governance Directorate builds on and fosters linkages with other programs within the Ecosystems and Fisheries Management Sector, and is grounded in Fisheries and Oceans Canada's fisheries and aquaculture management expertise and experience. The program is necessary to build strong, stable relations with Aboriginal groups, to promote and foster Aboriginal and Treaty rights in the formulation and implementation of fisher-

ies management policies, programs and plans to deliver on fiduciary responsibilities and to promote fisheries-related economic opportunities for Aboriginal communities. The program is guided by a proactive approach in its relationship with Aboriginal groups based on assisting Aboriginal peoples to obtain the capacity to more effectively participate in the multi-stake-holders processes used for aquatic resource and oceans management and building their capacity to take advantage of opportunities to participate in commercial fisheries and aquaculture development.

Fisheries strategies and governance

This program leads the coordination, elaboration and implementation of plans, policies, tools and mechanisms necessary, as determined through engagement processes and policy reviews, to support a robust and diverse fisheries sector that is competitive, prosperous and sustainable. This work is done in collaboration with other directorates within the Ecosystems and Fisheries Management Sector, and Fisheries and Oceans Canada's Oceans and Science Sector. The program provides a single, over-arching vision, policy and governance framework to senior management at the national level, including the Minister, to direct and support fisheries resources decision-making initiatives. The objective of this work is a modern fisheries governance regime that is accountable, predictable and transparent to the people it governs, respects aboriginal treaty rights and promotes long-term sustainability and economic prosperity. In addition, this program is responsible for all related business, human resources and corporate planning. This program may also use either grants or contributions to support the department's research, development, management, and promotion of fisheries and ocean-related issues.

$Sustainable\ aquaculture\ program$

The mission of the Sustainable Aquaculture Program is to set the conditions for the success of a vibrant and in-

novative Canadian aquaculture sector that is economically viable, environmentally and socially sustainable, and internationally competitive, and that benefits all Canadians and builds public confidence in aquaculture. The regulatory mandate of the program is derived from the Fisheries Act, the Fisheries Development Act and the Oceans Act. Mainly via the establishing of regulations and extensive collaborations with private and public sector stakeholders, Fisheries and Oceans Canada, as the lead federal organization for aquaculture, provides a horizontally managed and integrated intradepartmental approach to create the optimal conditions for the sector. The program is delivered in collaboration with other federal departments, provincial and territorial governments, industry, the private sector, non-government organizations, and other stakeholders. The Department's scientific expertise plays an important role in supporting sustainable aquaculture production.

Aids to navigation

The Aids to Navigation program is delivered by the CGC. This program provides critical aids to navigation systems, services and operational awareness that support accessible, safe and efficient navigation in Canadian waters by Canadian and International commercial marine transportation sectors, fishers and pleasure craft operators. Aids to navigation systems include approximately 17,000 short-range marine aids including visual aids (fixed aids and buoys), aural aids (fog horns), as well as radar aids (reflectors and beacons); and a long-range marine aid (the Differential Global Positioning System (DGPS). The Aids to Navigation program also provides navigation systems information to mariners. The program reviews aids to navigation systems on a cyclical basis to ensure they meet user's needs. The Aids to Navigation program helps effective vessel transit in Canadian waters. Coast Guard's Fleet operational readiness and Shore-based asset readiness are integral contributors to the delivery of this program.

This program is delivered in coordination with the Canadian Hydrographic Service. Legal basis or authority for the Aids to Navigation program is found in the *Constitution Act*, 1867, the *Oceans Act*, and the *Canada Shipping Act*, 2001.

Icebreaking services

The Icebreaking services program is delivered by the CCG. This program provides critical ice-related information services and operational awareness and icebreaking support to facilitate efficient and safe navigation by Canadian and International commercial marine transportation sectors, fishers and pleasure craft operators through and around ice-covered Canadian waters. This program activity includes providing ice information and escorting ships through ice-covered waters, freeing beset vessels in ice, maintaining open tracks through shore-fast ice, conducting harbour breakouts, providing ice routing advice and reducing the risk of flooding on the St. Lawrence River through monitoring, prevention and breaking up of ice jams. Icebreaking Services also contributes to Arctic sovereignty by transporting goods/supplies to Northern communities, providing support to other government agencies and organizations in ice-infested waters, and being a visible federal government marine presence in the Canadian North. Coast Guard's Fleet operational readiness is an integral contributor to the delivery of this program. This program is delivered in coordination with Environment Canada's Ice Information services. Legal basis or authority for the icebreaking services program is found in the Oceans Act, the Canada Shipping Act, 2001, the Constitution Act, 1867 and in virtue of an agreement with Transport Canada, the Arctic Waters Pollution Prevention Act, 2001.

International affairs

Through multilateral, regional and bilateral engagements, this program promotes and protects the interests of Canadians by ensuring access for Canadians to fish

resources managed internationally, promotes and influences sustainable regional fisheries management and healthy global marine ecosystems, and contributes to a stable international trade regime for Canadian fish and seafood products. This is achieved through a coordinated and proactive approach that reflects domestic positions and interests, including Government of Canada's international priorities, building broad and constructive relationships with international partners based upon common goals and strategies, and are grounded in the Department's scientific expertise and best management practices. Many Canadians directly benefit from internationally managed fish stocks, and the Canadian seafood sector as a whole relies heavily on international trade. As Canada also shares three oceans, effective relations and collaboration with international, regional and domestic partners are essential to addressing fisheries and ecosystem challenges and to advancing international standards, agreements and management decisions that reflect Canadian approaches.

Territorial delineation

The definition and description of Canada's maritime boundaries is reliant on hydrographic data to international standards and expert testimony. In 2003, Canada ratified the United Nations Convention on the Law of the Sea (UNCLOS). As a result of the ratification, Canada has until 2013 to submit evidence to support of the the establishment of the outer limits of Canada's continental shelf beyond the current 200-mile Exclusive Economic Zone. As a contributor to the establishment of Canada's evidence submission, Fisheries and Oceans Canada is responsible for the provision of bathymetric data and marine geodetic expertise to prepare, present, and defend Canada's evidence submission to the United Nations Commission on the Limits of the Continental Shelf. The bathymetric data is obtained through various means including through-the-ice, autonomous vehicle, and vessel-based surveys. The Department works closely with Foreign Affairs and International Trade Canada and Natural Resources Canada in this endeavor. Through the delineation of the outer limits of Canada's continental shelf and the international recognition of these limits, Canada will be able to assert its sovereign rights to resources and secure our maritime boundaries.

Aquatic animal health

In collaboration with the Canadian Food Inspection Agency (CFIA), Fisheries and Oceans Canada (DFO) is responsible for co-delivering Canada's National Aquatic Animal Health Program. The objective of the Program is to protect against the introduction or spread of serious infectious disease in wild and cultured aquatic animals. Detection and reporting of aquatic animal diseases of national and international importance in wild and cultured aquatic animals is imperative to prevent and/or control serious disease outbreaks. The CFIA relies on DFO's scientific expertise to provide scientific advice and to conduct diagnostic testing and research. Knowledge derived through science informs certification of aquatic animal health status in support of the Canadian fish/seafood trade, market access and the delivery of federal responsibilities under the Health of Animals Act and the Fisheries Act.

Waterways management

The Waterways management program is delivered by the CCG. This program provides mariners with services, information and operational awareness that facilitates efficient movement of maritime commerce and helps ensure safe and accessible waterways in support of economic prosperity by: surveying certain commercial channels to identify the bottom conditions, restrictions or hazards to safe navigation and providing mariners with marine safety information, including available water depth forecasts in the St. Lawrence, Fraser, Detroit and Mackenzie Rivers; maintaining engineering guidelines for the design, maintenance and

utilization of main commercial channels; managing marine structures contributing to channel maintenance; providing channel dredging in the Great Lakes U.S./Canada connecting channels; managing dredging on the St. Lawrence River between Montreal and Cap Gribane on a cost-recovery basis, and operating the Canso Canal. The Waterways management program helps sustain navigable channels, reduce marine navigation risks and support environmental protection to ensure efficient and safe navigation of mariners. Coast Guard's Fleet operational readiness is an integral contributor to the delivery of this program. This program is delivered in coordination with the Canadian Hydrographic Service and Real Property Asset Management Services and with Public Works and Government Services Canada. Legal basis or authority for the Waterways management program is found in the Constitution Act, 1867, and the Oceans Act.

Biotechnology and genomics

Both knowledge and its application through innovative new technology are vital for fostering advances in sustainable development of aquatic resources. The Department is responsible for developing the knowledge necessary to inform the federal government's responsibility for regulation and the assessment of risk associated with fish products derived from biotechnology. Through the adoption of leading-edge genomics research and biotechnology tools and technique the Department also improves Fisheries and Oceans Canada's ability to protect endangered species, manage opening and closing of fisheries, avoid over exploitation of resources, prosecute poachers, improve aquaculture practices, control disease outbreaks, and remediate contaminated sites.

Strategic Outcome

Sustainable aquatic ecosystems

Program Activity Descriptions

Compliance and enforcement

The program promotes and maintains compliance with legislation, regulations and management measures implemented to achieve the conservation and sustainable use of Canada's aquatic resources, and the protection of species at risk, fish habitat and oceans. The program is delivered through a balanced regulatory management and enforcement approach including: promotion of compliance through education and shared stewardship; monitoring, control and surveillance activities; and management of major cases / special investigations in relation to complex compliance issues. The program also works closely with its Ecosystems and Fisheries Management Sector (EFM), Royal Canadian Mounted Police and industry partners to ensure peaceful and orderly fisheries, makes a significant contribution with the CCG to the protection of Canadian sovereignty, assists the Department of National Defence in the identification of potential marine security threats through our extensive marine surveillance activities, and plays a key role with EFM, Environment Canada and the CFIA in the administration of the Canadian Shellfish Sanitation Program to help ensure that the public is protected from consumption of contaminated fisheries products.

Habitat management

Given its responsibilities under the *Fisheries Act*, the *Species at Risk Act* and the *Canadian Environmental Assessment Act*, Fisheries and Oceans Canada's Habitat management program is a major federal regulator affecting most development projects occurring in or around fresh and marine fish-bearing waters across Canada. The program's activities contribute to its mandate to conserve and protect fish habitat that sustain

fisheries resources that Canadians value. In the context of government-wide initiatives for sustainable development and smart regulations, the program helps Canadians manage the impacts of non-fishery activities on fish habitat. The program uses scientific knowledge and understanding to develop regulations and policies; provide formal advice and direction; engage with individuals, organizations, and other levels of government; and manages compliance.

Integrated oceans management

The Oceans Act and its supporting policy, Canada's Oceans Strategy, affirm Fisheries and Oceans Canada's mandate and role as the lead federal authority for oceans and responsibility for coordinating federal policies and programs related to the oceans. As one of the central principles which underlies implementation of the Oceans Strategy, integrated management defines a comprehensive, ecosystem-based approach to support sustainable development of Large Ocean Management Areas in Canada's oceans. The Integrated oceans management program provides federal, and provincial government authorities, industry and Canadians with the tools (e.g., identification of Ecologically and Biologically Significant Areas, Marine Protected Areas) and for a needed to collaboratively develop Integrated Management Plans that incorporate social, economic, and environmental considerations in decision-making. Other methods of intervention used by the program include: developing Canada's ocean-related international legal commitments and the establishment of integrated management areas for all of Canada's marine regions. The Department's scientific expertise supports the development of tools and provides guidance to inform management decisions and policies, and international oceans positions and legal commitments.

Salmonid enhancement program

Backed by strong public support, Fisheries and Oceans Canada (DFO) first launched the Salmonid enhance-

ment program (SEP) in 1977 in response to chronic declines in salmon populations and fisheries. SEP continues to focus on the production of Pacific salmon in British Columbia and the Yukon to support vulnerable stocks and provide harvest opportunities for all harvest sectors (commercial, recreational and First Nation) under the Fisheries Act, and, on the participation of First Nations, local communities and external parties in cooperative fisheries and watershed stewardship activities under the Oceans Act. Public support remains strong, with thousands of volunteers participating in program activities. Broadly, the program's main methods of intervention include production of salmon from enhancement facilities (hatcheries and spawning channels), restoration and enhancement of habitat, including development of semi.natural spawning and rearing channels, and smaller technologies such as incubation boxes. The program also provides salmon stock assessment information to DFO's Oceans and Science Sector in support of Pacific Region harvest management and Pacific Salmon Treaty commitments and produces public education and awareness programs. Education and awareness, and partnerships with First Nations, communities and external parties enable citizen participation in fisheries and watershed stewardship activities, often with the support of the Community involvement program and the foundations funded through the contribution programs.

Species at risk management

The Species at Risk Act (SARA) is a key federal government commitment to prevent wildlife species at risk (SAR) from becoming extirpated or extinct and to help in the recovery of these species. It provides for the legal protection of wildlife SAR and the conservation of their biological diversity. As the competent Minister under SARA, the Minister of Fisheries and Oceans has the legislated responsibility and mandate for the protection and recovery of all aquatic species in Canada (except those on federal lands under the responsibility

of Parks Canada). The evidence-based SAR Management Program is informed by the Department's scientific expertise, and considers socio-economic, stakeholder, and community knowledge. Management of the program reflects key SARA principles, such as: stewardship and engagement; consultation and cooperation; and, compliance and enforcement. It supports activities in the SARA conservation cycle, including: assessment and listing of species; recovery and protection of SAR through the development of recovery strategies, action plans and management plans; identification and protection of species critical habitat; promoting recovery implementation; and monitoring and evaluation.

Aquatic invasive species

Aquatic invasive species are a major threat to aquatic biodiversity, ecosystem health, and the fisheries and aquaculture industries that healthy and productive ecosystems sustain. The World Conservation Union rates invasive alien species as the second worst threat to biodiversity, after habitat loss. Recognizing the seriousness of this threat, in 2004 the Canadian Council of Fisheries and Aquaculture Ministers developed the Canadian Action Plan to Address the Threat of Aquatic Invasive Species. The objective of the Action Plan is to prevent the introduction of new invasions, detect new invaders early, respond rapidly to new invaders, and, where necessary, manage established and spreading invaders. Knowledge derived through science activities, such as research on pathways of invasion, methodologies to detect new invasions, risk assessments, and control measures, supports Canadian and international regulation, agreements, and the development of management frameworks in support of Canada's Action Plan.

Environmental response services

The Canadian Coast Guard (CCG) is the lead federal agency for managing the response to all ship-source and mystery pollution spills occurring into the marine environment in waters under Canadian jurisdiction and for the support of countries under international agreements. The objectives of the Environmental Response program are to minimize the environmental, economic and public safety impacts of marine pollution incidents. Through the Environmental response program, CCG: establishes an appropriate and nationally consistent level of preparedness and response service in Canadian waters; monitors and investigates all reports of marine pollution in Canada in conjunction with other federal departments; and maintains communications with the program's partners, including Transport Canada and Environment Canada, to ensure a consistent approach to the response to marine pollution incidents. Coast Guard's Fleet operational readiness is an integral contributor to the delivery of this program. This program is delivered in coordination with other federal departments for surveillance information and scientific advice. Within Canada's Marine Oil Spill Preparedness Response Regime, response capacity arrangement between ship owners and commercial interests is an essential factor to support the regime. Legal basis and authority for the Environmental Response Services program is found in the Oceans Act, the Canada Shipping Act, 2001, the Constitution Act, 1867 and in virtue of an agreement with Transport Canada, the Arctic Waters Pollution Prevention Act, 2001.

Aboriginal inland habitat program

The Aboriginal inland habitat program (AHIP) is a contribution program within the Integrated Aboriginal Contribution Management Framework. One main over arching goal of the framework is to assist Aboriginal organizations to develop capacity to more effectively participate in aquatic resource and oceans management multi-stake holder processes. The Ab-

original inland habitat program funds capacity-building efforts within Aboriginal communities in Alberta, Saskatchewan, Manitoba, Ontario and Quebec for participation in collaborative management of habitat through contribution agreements. AHIP endeavours to enhance the ability of Aboriginal communities working together, to participate in decision-making related to habitat management regulatory and non-regulatory activities. Other methods of program intervention include community consultations to support Aboriginal communities' understanding and priorities for fish habitat management, developing Aboriginal fish habitat management plans, and collecting and documenting aboriginal traditional knowledge.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Freshwater Fish marketing Corporation

Strategic Outcome

To regulate interprovincial and export trade in freshwater fish.

Program Activity Descriptions

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Department

Strategic Outcome

The international agenda is shaped to Canada's benefit and advantage in accordance with Canadian interests and values.

Program Activity Descriptions

Diplomacy and advocacy

This program activity engages and influences international players and delivers international programs and diplomacy. It allows Canada to implement its international policies to foreign audiences inside and outside of Canada and thus fulfill the mandated roles and responsibilities that are associated with the diplomatic work of a foreign and international trade ministry. This work is done by liaising with decision makers at all levels in other countries and hosting events where key messages can be advocated. It includes utilizing provincial expertise in specific areas of interest to them to advance Canada's overall international policy.

Additionally, it uses strategic promotion activities, including public diplomacy, as vehicles to promote Canadian views on issues of concern to Canadians and uses a number of discretionary grant and contribution programs to further Canada's interests abroad. The main target groups are foreign decision makers in Canada and abroad, foreign publics, other levels of government within Canada, key constituencies within other countries (e.g. security and defence-related communities) and legislators.

International policy advice and integration

This program activity provides strategic direction, intelligence and advice, including integration and coordination of Canada's foreign and international economic policies. It allows the department to plan and strategically coordinate its international activities with a view to integrating Canada's foreign and international economic policies. This is carried out by working to improve coordination within DFAIT, with other government departments and relevant stakeholders, and by utilizing advice provided from missions to develop all-of-government approaches that integrate different organizational mandates and perspectives to advance Canadian interests and values. The main target groups are other government organizations, policy and program groups within DFAIT, heads of mission and key mission personnel.

Strategic Outcome

Canadians are satisfied with commercial, consular and passport services.

Program Activity Descriptions

International commerce

This program activity manages and delivers commerce services and advice to Canadian business. It helps Canadian business succeed in international markets by providing expert counsel and advice and managing and delivering value-added services to Canadian business pursuing international business opportunities. This work is conducted through support to qualified business clients. The main target groups are Canadian business clients who are currently operating abroad or who have demonstrated a capacity to do so.

Consular services and emergency management

This program activity manages and delivers consular services and advice to Canadians, and provides a coordinated Government of Canada response to emergencies abroad affecting Canadians. This work is done through consular agents and officers at missions abroad and through the use of the website, Travel.gc.ca. The program exists because Canadians travel, work, live, and die outside of Canada. This program activity prepares Canadians for international travel by informing them about safe travel habits and providing them with credible and timely information and advice to enable them to make responsible decisions about travel to foreign countries. In addition to helping Canadians prepare for international travel, this program activity assists Canadians outside Canada (24 hours a day, seven days a week) in handling individual cases of distress and routine requests for service and, in cooperation with partners and missions, provide a coordinated Government of Canada response to emergencies (such as natural disasters) affecting Canadians abroad. The main target groups are Canadians outside of Canada or Canadians planning to travel or live abroad.

Passport Canada special operating agency (Revolving Fund)

This program activity manages and delivers passport services through the use of the Passport Canada Revolving Fund. It enables the issuance of secure travel documents to Canadians, which facilitates their travel and contributes to international and domestic security. This work is done through the authentication of identity and entitlement of applicants using a diversity of service channels and the production of secure travel documents. The main target group is Canadian travelers.

Strategic Outcome

The Department of Foreign Affairs and International Trade maintains a mission network of infrastructure and services to enable the Government of Canada to achieve its international priorities.

Program Activity Descriptions

Governance, strategic direction, and common service delivery

This program activity governs, provides strategic direction and leadership, manages change, delivers services and provides infrastructure to the mission platform. The work is done in coordination with various branches, bureaus and divisions within DFAIT and with federal and provincial departments and agencies (31 partners in 2009-2010) located at missions abroad. The main target group is DFAIT's branches, bureaus and divisions, the Government of Canada's missions abroad, as well as federal and other partners operating at missions abroad.

Government of Canada Benefits

This program activity is the vehicle through which the International Platform and central agencies manage whole of government statutory payments on behalf of the Crown. These payments are made on behalf of Canadian and local employees. DFAIT manages the administration and payments for Foreign Service Directives as well as Locally Engaged Staff Pension Plans. This work is done through issuing timely benefit payments to Locally-Engaged and to Canada-Based staff. The main target group is the Government of Canada staff at missions abroad.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Canadian Commercial Corporation

Strategic Outcome

Enhanced market access for Canadian exporters to complex international public sector markets.

Program Activity Descriptions

Defence

This consists of export sales in the aerospace, defence and security sectors. These include sales to all levels of government.

Emerging and developing markets

This is non-Defence Protection Sharing Agreement (DPSA) and non-aerospace, defence and security business consisting of supply and construction projects in a variety of other sectors and can include sales to all levels of government, federal, state and municipal.

Canadian International Development Agency

Strategic Outcome

Reduction in poverty for those living in countries where the Canadian International Development Agency engages in international development.

Program Activity Descriptions

Global engagement and strategic policy

This program activity shapes international development policy in Canada and globally in support of Canadian International Development Agency's strategic direction, and Canada's broader international assistance objectives and commitments. It also engages with multilateral and global organizations for two main purposes: to contribute effectively to the achievement of development results, and to influence partner's policies, planning, strategic directions, and organizational governance in pursuit of greater development results.

Low-income countries

This program activity focuses on addressing pervasive poverty in countries having an annual gross national income (GNI) per capita equivalent to US\$935 or less (2007 data). This requires engagement in long-term development assistance supporting the national priorities of a selected number of low-income countries, as well as programming with regional institutions addressing trans-boundary issues. Canadian International Development Agency's support aims to help these countries achieve their priority development goals that differ from country to country, and region to region. Programming aims at achieving reduced poverty and increasing economic opportunities. It focuses in areas such as basic health and education, agriculture/food security, income generation and the foundations for good governance.

Fragile countries and crisis-affected communities

This program activity seeks to address developmental issues in selected countries identified as fragile. Fragile countries are defined as those that face particularly severe development challenges, with complex national and regional contexts, given weak institutional capacity, poor governance, political instability, and ongoing violence or a legacy of past conflict. Improving the situation in these countries is frequently considered strategic in meeting Canada's foreign policy objectives. Canadian International Development Agency's programming in these countries seeks to enhance long-term development by improving the effectiveness of

public institutions and society, fostering stability and security, as well as supporting the delivery of key services. This program activity also involves humanitarian assistance in response to man-made crises or natural disasters to ensure delivery and access of essential emergency services to crisis-affected populations. In both cases, various partnerships offer flexibility and expertise to provide the most effective response.

Middle-income countries

This program activity focuses on addressing specific challenges in attaining self-reliance for countries having an annual gross national income (GNI) per capita equivalent to more than US\$935 but less than US\$11,455 (2007 data). It involves strategic assistance in a selected number of middle-income countries, as well as programming with regional institutions addressing trans-boundary issues. These countries vary considerably in terms of their requirements, with Canadian International Development Agency programming tailored to respond as appropriate but mainly involves engaging in strategic areas of their national priorities to sustainably enhance economic growth and the capacity to deliver social services, as well as building accountable, democratic institutions.

Canadian engagement

This program activity involves supporting the overseas initiatives of Canadian organizations, promoting international development in Canada, and informing the Canadian public. The Canadian International Development Agency does this by co-investing through various delivery mechanisms with a range of Canadian civil society organizations and other partners. In turn, these organizations partner with developing country civil society counterparts, as well as governments and the private sector to strengthen their capacity to deliver programs and services in supporting the Canadian International Development Agency's strategic outcomes. Public engagement in Canada is achieved through the education and outreach activities

of Canadian non-governmental organizations, academic institutions, labour unions, and professional associations and through the Canadian International Development Agency's own efforts to reach the general public.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

International Development Research Centre

Strategic Outcome

Stronger capacity in developing countries to research and propose solutions that support sustainable and equitable development and poverty reduction.

Program Activity Descriptions

Research on development challenges

IDRC supports research in developing countries to promote growth and development. The challenges facing international development are varied and complex. Research and innovation are vitally important to grapple with these challenges. Under the Strategic Framework 2010-2015, IDRC focuses on agriculture and the environment, science and innovation; social and economic policy; and health and health systems. Within each focus, programs define the specific development problem and identify the most promising approaches to address them. These programs support applied research as well as activities that strengthen the particular fields of knowledge. IDRC continually assesses why, where,

and how to intervene to have the greatest impact. Program funding is allocated on an annual basis to reflect these changing priorities. IDRC works with researchers and innovators in the developing world, often in cooperation with researchers in Canada and elsewhere. Most projects are conducted by developing-world institutions themselves, including universities, research organizations, and civil society. IDRC also encourages sharing this knowledge with policymakers, other researchers, and communities around the world. The result is innovative, lasting local solutions that aim to bring choice and change to those who need it most.

Capacity to do, use and manage research

IDRC also invests in research intended to assist the developing world to solve its own problems. To contribute to their societies, researchers and innovators in the developing world need to access global knowledge, engage their peers, and share their work. In short, they need opportunities to build their capacity to do, use and manage research. This program supports projects and technical assistance related to research design and methodology, communication and evaluation. Training and experts help researchers to develop their own ideas, communicate their results, and contribute to the larger efforts to reduce poverty. IDRC also works on evaluation methodologies and tools, and supports professional communities of evaluators in the developing world. This program works with research, media and evaluation professionals in the developing world. It does so using a "grants-plus" approach to supporting research for development. This approach combines financial support to create new opportunities for research, engagement with recipients in the research process, and brokering that helps strengthen research-to-policy linkages. The work of IDRC is part of Canada's international assistance and is guided by the International Development Research Centre Act.

International Joint Commission (Canadian Section)

Strategic Outcome

Prompt and effective prevention and/or resolution of potential disputes under the Boundary Waters Treaty and Great Lakes Water Quality Agreement to ensure they have no negative impact on Canada-US relations.

Program Activity Descriptions

Boundary waters treaty

The issuing of orders of approval in response to applications for the use, obstruction or diversion of waters that flow along and/or across the boundary if such uses affect the natural water levels or flows on the other side; undertaking investigations of specific issues (references) when requested by governments; and the provision to make binding decisions on matters referred to it by the governments.

Great Lakes water quality agreement

To evaluate progress toward restoring and maintaining the chemical, physical and biological integrity of the waters of the Great Lakes basin ecosystem.

National Capital Commission

Strategic Outcome

Optimum contribution of federal lands and public programs in creating a Capital as a source of pride and of national significance.

Program Activity Descriptions

Real asset management

The NCC manages and protects physical assets of national significance in CCR as a legacy for future generations of Canadians. Its objectives are to enhance the rich cultural heritage and natural environment of Canada's Capital and to optimize the contribution of the NCC's extensive lands and buildings in support of the programs and mandate of the Corporation, while ensuring NCC assets are appropriately accessible to the public. Environmental assets and liabilities are managed in a sustainable and responsible manner. The NCC owns over 470 square kilometres or 10% of CCR, as well as 27 roads and parkways, 570 kilometres of pathways, 1,639 buildings and 110 bridges. The NCC also manages close to 650 leases and the ground operations for most federal organizations in CCR. The NCC manages its assets through the application of relevant policies and regulations and by means of a life-cycle maintenance and rehabilitation program. The NCC's duties with regard to its real asset base include: safeguarding and preserving the Capital's most treasured cultural, natural and heritage assets (including the Official Residences); the promotion and regulation of public activities on federal lands; natural resource protection and management; environmental stewardship; and the delivery of visitor and recreational services and programs. Where appropriate, the assets are used to generate a stream of revenues to complement federal appropriations in supporting the work of the

Corporation (e.g. leasing, land use permits). Land development projects are carried out to enhance the Capital for future generations. This activity is also responsible for the acquisition of national interest properties and disposal of surplus properties. These activities are carried out in close cooperation with the cities of Ottawa and Gatineau and federal organizations (e.g. Public Works and Government Services Canada, Royal Canadian Mounted Police). The NCC also pays Payments in Lieu of Taxes (PILT) to municipalities and school boards in Quebec. Clients include senior political figures (for Official Residences), government bodies at all levels, visitors to the Capital, local residents and all Canadians who benefit from a meaningful Capital.

Animating and promoting the Capital

The objective is to generate pride and promote unity through programming in the Capital. The main products are a series of high-impact events (notably Canada Day and Winterlude), interpretative programs and commemorations. As well, this activity works to increase Canada-wide awareness of the Capital by means of national marketing and communications campaigns that present the Capital as a place where Canadians can experience Canadian heritage, culture and achievements.

Planning, design and land use

This activity guides the use and physical development of federal lands, coordinates development and ensures excellence in design and planning on federal lands in order that it is appropriate to the role and significance of the Capital. Products include long-term visionary plans, prepared in consultation with other planning jurisdictions and departments, to guide land uses, development and management of Capital lands as well as the identification of the National Interest Land Mass to be

held in trust for future generations. Under the National Capital Act, the National Capital Commission (NCC) is responsible for the review and approval of all proposals for land-use changes, designs and land disposals on federal lands in Canada's Capital region (CCR) to ensure that they are appropriate to their significance, natural environment and heritage. The NCC develops strategies and facilitates federal involvement in CCR transportation and transit, and participates in joint studies with provincial and municipal partners to address inter-provincial and urban transportation issues. Programs also include management of the NCC's built heritage, cultural landscapes, archaeological assets and collections, as well as approval of heritage building designations in the Capital. Clients include the NCC, all government organizations with interests in CCR, Canadians, and other visitors, plus international and private agencies, all of whom benefit from a meaningful Capital of international quality.

Note: The full wording of all authorities granted in current year Appropriation Acts, of all authorities granted by statutes other than Appropriation Acts, of all non-lapsing authorities granted in the current year, and of all authorities available from previous years is given in Section 1 of this volume.

(S) Statutory authority.

(L) Non-budgetary authority (loan, investment or advance).

(1) Treasury Board Vote 5—Government contingencies.
Treasury Board Vote 10—Government-wide initiatives.
Treasury Board Vote 15—Compensation adjustments.

Treasury Board Vote 25—Operating budget carry forward. Treasury Board Vote 30—Paylist requirements.

Treasury Board Vote 33—Capital budget carry forward.

(2) Deemed appropriations to Vote 17, Shared Services Canada pursuant to section 31.1 of the Financial Administration Act (Order in Council 2011-1297).

(3) Vote 32c under the Canadian International Development Agency was approved by Parliament in Appropriation Act No. 5, 2009-2010. This vote provided legislative authority, pursuant to section 24.1 of the Financial Administration Act, to forgive an amount up to \$449,533,044 in subsequent years.

(4) Includes the equivalent in Canadian dollars of the total number of callable shares specified in all original agreements.

(5) Export Development Canada (Canada Account) was merged into Foreign Affairs and International Trade when the Department of Foreign Affairs and the Department of International Trade were amalgamated in 2006. Export Development Canada (Canada Account) should have remained a separate organization; therefore previous year's amounts have been restated by \$136,235,863 (budgetary) and \$(1,587,758,683) (non-budgetary).

(6) In accordance with sections 23 and 24 of the Export Development Act, the authorized limit of \$20 billion is for loans in support of export development. This authority is available for both budgetary and non-budgetary transactions.

However, since the authority is for loans, it is shown as non-budgetary for reporting purposes.

(7) Order in Council 2011-0583 designates the Minister of Foreign Affairs, a member of the Queen's Privy Council for Canada, as the appropriate Minister for the purposes of the National Capital Act, effective May 18, 2011. Prior to the transfer, expenditures of \$17,425,229 were approved by the Minister of Transport. Previous year's amounts have been restated by \$158,315,314.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Strategic Outcome

The Governor General, representing The Queen in Canada, is enabled to fulfill constitutional, state, ceremonial and public duties.

Program Activity Descriptions

Governor General support

The Office of the Secretary to the Governor General (OSGG) provides support and advice to the Governor General of Canada in his/her unique role as the representative of The Queen in Canada as well as commander-in-chief. OSGG assists the Governor General in carrying out constitutional responsibilities, in representing Canada at home and abroad, in bringing Canadians together, and in granting armorial bearings. OSGG also supports the Governor General in encouraging excellence through the administration of the Canadian Honours System and by organizing the presentations of national honours, decorations, medals

and awards. OSGG manages a visitor services program at both of the Governor General's official residences and oversees the day-to-day operations of these residences. OSGG also provides support to former Governors General, including pensions to former Governors General and their spouses.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Department

Strategic Outcome

A health system responsive to the needs of Canadians.

Program Activity Descriptions

Canadian health system

The goal of this program activity is to provide strategic policy advice, research and analysis, and program support to provinces and territories, partners and stakeholders on health care system issues. Mindful of long-term equity, sustainability and affordability considerations, Health Canada collaborates and targets its efforts with provinces and territories, national and international organizations, health care providers, professional associations, other key stakeholders and Canadians in order to support improvements to the health care system, such as improved access, quality and integration of health care services. These targeted efforts are in place to better meet the health needs of Canadians, wherever they live or whatever their finan-

cial circumstances. Moreover, ensuring that provinces and territories are provided with advice and recommendations, based on analysis, assists with compliance to the conditions of the *Canada Health Act* to qualify for full health care funding. Focusing on emerging health issues, such as Assisted Human Reproduction and nanotechnology enables Health Canada to strategically position itself as a proactive organization, and targeted Grants and Contribution funding to support international health partners helps to ensure Health Canada is an active player in tackling global health issues.

Official language minority community development

Official language minority community development involves the administration of Health Canada's responsibilities under Section 41 of the Official Languages Act committing the federal government to enhancing the vitality of English-speaking and French-speaking minority communities as well as fostering the full recognition and use of both English and French in Canadian Society and the provision of policy and program advice relating to the Act. Administration involves consulting with Canada's official language minority communities on a regular basis, supporting and enabling the delivery of contribution programs and services for official language minority communities, reporting to Parliament and Canadians on Health Canada's achievements under Section 41, and coordinating Health Canada's activities and awareness in engaging and responding to the health needs of official language minority communities.

Specialized health services

These specialized health services ensure continuity of services and occupational health services to public servants and works to ensure that Health Canada is prepared and able to continue services in the event of a national emergency. By working pro-actively to reduce the number of workdays lost to illness, Health Canada is promoting a productive public service thereby deliv-

ering results to Canadians. This Program Activity also ensures that Health Canada works internally and with partners to ensure that Health Canada has preparedness plans that are ready for execution in the event of a national emergency. By ensuring that organizations have plans in place that take into account all facets of their legislated responsibilities helps Health Canada continue to deliver services to Canadians at a time that it will be most needed. This includes coordination with other members of the Health Portfolio as well as partners across the Government of Canada. As part of this work Health Canada provides health services to internationally protected person when they are visiting Canada for International events such as the Olympics, G8/G20 meeting and Royal visits. Together, these specialized health services work to ensure continuity of services and capacity in day to day operations but as well as extraordinary and unpredictable circumstances such as a national emergency or disease outbreaks such as H1N1.

Strategic Outcome

Canadians are informed of and protected from health risks associated with food, products, substances and environments, and are informed of the benefits of healthy eating.

Program Activity Descriptions

Health products

This program activity is responsible for regulating a broad range of health products that affect the everyday lives of Canadians. Under the authority of the Food and Drugs Act and its Regulations, and the Department of Health Act, the program activity evaluates and monitors the safety, quality and efficacy of human and veterinary drugs, biologic and genetic therapies, radio-pharmaceuticals, medical devices, and natural health products so that Canadians have access to safe and effective health products. This program activity also verifies, through compliance monitoring and en-

forcement activities, that regulatory requirements for health products are met. In addition, the program provides timely, evidence-based and authoritative information to key stakeholders including, but not limited to, health care professionals such as physicians, pharmacists, natural health practitioners and members of the public to enable them to make informed decisions about the use of health products.

Substance use and abuse

Through regulatory, programming and educational activities, Health Canada seeks to improve health outcomes by reducing and preventing tobacco consumption and combating alcohol and drug abuse. Through the Tobacco Act and its regulations, Health Canada regulates the manufacture, sale, labelling, and promotion of tobacco products. It also leads the Federal Tobacco Control Strategy – the goal of which is to further reduce the prevalence of smoking through regulatory, programming and educational activities. Through the Controlled Drugs and Substances Act (CDSA) and its regulations, Health Canada regulates controlled substances and promotes initiatives that reduce or prevent the harm associated with these substances. It also provides expert advice and drug analysis services to law enforcement agencies across the country.

Food safety and nutrition

The Food Safety and Nutrition program activity establishes policies, regulations and standards related to the safety and nutritional quality of food. Food safety standards are enforced by the Canadian Food Inspection Agency and the program activity assesses the effectiveness of CFIA's activities related to food safety. The legislative framework for food is found in the *Food and Drugs Act* and Regulations, the Canadian Food Inspection Agency Act and the Department of Health Act. The program activity also promotes the nutritional health and well-being of Canadians by collaboratively defining, promoting and implementing evidence-based nutrition policies and standards. As the focal point and

authoritative source for nutrition and healthy eating policy and promotion, the program activity disseminates timely, evidence-based and authoritative information to Canadians and stakeholders to enable them to make informed decisions and healthy choices.

Environmental risks to health

The environment continues to be a key determinant of health for all Canadians. This program activity aims to promote and protect the health of Canadians by identifying, assessing and managing health risks posed by environmental factors. The scope of activities includes: research on climate change, air quality, drinking water quality, chemical substances, and contaminated sites; clean air programming and regulatory activities; risk assessment and management of chemical substances, products of biotechnology and products of other new and emerging technologies (including nanotechnology); and working with the passenger conveyance industry to protect the health of the travelling public.

Pesticide safety

Health Canada, through the Pest Management Regulatory Agency, administers the Pest Control Products Act (PCPA) and its regulations. The primary objective of the PCPA is to prevent unacceptable risks to people and the environment from the use of pest control products. Health Canada regulates the entire life cycle of a pesticide, including: determination of value, health and environmental risk assessment, characterization and mitigation, registration of products, monitoring and enforcement activities, re-evaluation of registered pesticides on a 15-year cycle, and phase-out or cancellation of products. Pest control products are regulated in a manner to encourage the development and implementation of innovative, sustainable pest management strategies and to facilitate access to pest control products that pose lower risks. Health Canada also encourages public awareness in relation to pest control products by informing the public, facilitating access to

relevant information and participating in the decision-making process. Health Canada plays a leading role in international efforts to integrate various regulatory systems around the world. International cooperation facilitates consistency and ensures the best science available supports our decision making.

Consumer products safety

Health Canada is committed to promoting the health and safety of Canadians by working to improve the safety of consumer products in the canadian marketplace. Under the Consumer products safety program activity, Health Canada works to identify, assess, manage and communicate to Canadians the health and safety risks associated with consumer products, which are those products that adults and children commonly use for personal (incl. cosmetics), family, household or garden use or in recreation or sports. This is achieved through areas of active prevention, targeted oversight and rapid response. Specifically, the Consumer products safety program activity, through active prevention, works with industry to help identify and systematically assess safety risks at early and ongoing stages of product development, develop standards and share best practices. Also, the program activity promotes awareness of new policy and regulatory activity, and provides guidance to industry on existing regulations through workshops and training. Through targeted oversight, this program activity keeps a close watch on products for which the risks are not yet fully understood or that pose the greatest potential risk to the public. Under rapid response, this program activity can act quickly to protect the public when a problem occurs – including the removal of unsafe consumer products from store shelves.

Radiation Protection

Health Canada aims to reduce the health and safety risks associated with different types of radiation, both naturally occurring and from artificial sources, in living and working environments. Health Canada: conducts research into the biological effects of environmental and occupational radiation; develops better methods for internal radiation dosimetry and its measurement; provides radiation safety inspections of federally regulated facilities containing radiation-emitting devices, the devices themselves, as well as training on the proper operation of the devices; develops regulations, guidelines, standards and safety codes pertaining to radiation-emitting devices; and provides radiation advice to other government departments, industry and the general public.

Strategic Outcome

First Nations and Inuit communities and individuals receive health services and benefits that are responsive to their needs so as to improve their health status.

Program Activity Descriptions

Supplementary health benefits for First Nations and Inuit

The Non-Insured Health Benefits (NIHB) Program provides a limited range of medically necessary health-related goods and services to registered Indians (according to the *Indian Act*) and Inuit (recognized by one of the Inuit Land Claim Organizations) regardless of residency in Canada where not otherwise covered under a separate agreement (e.g. a self-government agreement) with federal, provincial or territorial governments. The benefits under the NIHB Program include the following, where not otherwise provided to eligible clients through other private or provincial/territorial programs: pharmacy benefits (prescription drugs and some over-the-counter medication), medical supplies and equipment, dental care, vision care, short term crisis intervention mental health counselling, and medical transportation benefits to access medically reguired health services not available on reserve or in the community of residence. The Program also pays provincial health premiums on behalf of eligible clients in British Columbia.

First nations and Inuit primary health care

Primary Health Care funds a suite of programs, services and strategies provided primarily to First Nations and Inuit individuals, families and communities living on-reserve or in Inuit communities. It encompasses health promotion and disease prevention programs to improve health outcomes and reduce health risks, public health protection, including surveillance, to prevent and/or mitigate human health risks associated with communicable diseases and exposure to environmental hazards, and primary care where individuals are provided diagnostic, curative, rehabilitative, supportive, palliative/end-of-life care and referral services.

Health infrastructure support for First Nations and Inuit

The Health Infrastructure Support Activity underpins the long-term vision of an integrated health system with greater First Nations and Inuit control by enhancing their capacity to design, manage, deliver and evaluate quality health programs and services. It provides the foundation to support the delivery of programs and services in First Nations and Inuit communities and for individuals and promote innovation and partnerships in health care delivery to better meet the unique health needs of First Nations and Inuit. The funds are used for: planning and management for the delivery of quality health services; construction and maintenance of health facilities; research activities; encouraging Aboriginal people to pursue health careers; investments in technologies to modernize health services, and integrate and realign the governance of existing health services.

Canadian Institutes of Health Research

Strategic Outcome

A world-class health-research enterprise that creates, disseminates and applies new knowledge across all areas of health research.

Program Activity Descriptions

Health knowledge

These programs aim to support the creation of new knowledge across all areas of health research to improve health and the health system. This is achieved by managing CIHR's open competition and related peer review processes based on internationally accepted standards of scientific excellence.

Health and health services advances

Through the competitive peer review process based on internationally accepted standards of scientific excellence, these programs aim to support the creation of new knowledge in strategic priority areas and its translation into improved health and a strengthened health system.

Health researchers

These programs aim to build health research capacity to improve health and the health system by supporting the training and careers of excellent health researchers through a competitive peer review process based on internationally accepted standards of scientific excellence.

Health research commercialization

These programs aim to support and facilitate the commercialization of health research to improve health and the health system. This is achieved by managing funding competitions to provide grants, in partnership with the private sector, where relevant, and using peer review processes based on internationally accepted standards of scientific excellence, and by building and strengthening the capacity of Canadian health researchers to engage in the commercialization process.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Canadian Northern Economic Development Agency

Strategic Outcome

Developed and diversified territorial economies that support prosperity for all Northerners

Program Activity Descriptions

Community development

Supports community-level investments in infrastructure and organizations, and individual-level investments in skills and capacity development. The program activity's objective is the establishment of economically sustainable Northern communities with a high quality of life for residents.

Business development

Supports the growth and expansion of northern businesses, including small and medium enterprises, through training, advisory services, and grants and contributions. The program activity's objective is the encouragement of a competitive, diverse Northern business sector with a strengthened capacity for innovation.

Policy, advocacy and coordination

Supports research and analysis to guide programming and policy choices, the promotion of northern interests both inside and outside of the federal government, and the development of horizontal strategies, initiatives and projects to address economic development challenges in the North.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Hazardous Materials Information Review Commission

Strategic Outcome

Chemical trade secrets are protected and required health and safety information in Canadian workplaces is compliant.

Program Activity Descriptions

Statutory decisions and compliant information

The Workplace Hazardous Materials Information System (WHMIS) requires chemical manufacturers, importers, distributors, and employers to provide cautionary labelling and material safety data sheets (MSDSs) for every controlled product produced, used or intended for use by workers in Canadian workplaces. Pursuant to the Hazardous Materials Information Review Act, the Hazardous Materials Information Review Commission has the mandate to make decisions on the validity of claims for exemption from disclosure requirements under WHMIS, while ensuring that associated health and safety information made available to Canadian workers is compliant with the WHMIS standards. Specifically, to fulfill its program requirements, the Commission registers claims, issues decisions on claim validity and compliance, offers claimants an opportunity to comply voluntarily and when necessary, orders claimants to take actions to bring MSDSs and/or labels into compliance. In carrying out this program, the Commission fosters proactive compliance. It assists claimants in respecting relevant statutory requirements by providing the information, knowledge, tools and support they need to submit complete and accurate claims and bring associated MSDSs and/or labels into compliance.

Stakeholder engagement and strategic partnerships

The exclusive work completed by the Commission enables it to gather unique information and data holdings on hazard communications under the Workplace Hazardous Materials Information System in terms of completeness, accuracy, comprehensibility and accessibility. Through partnerships, the Commission at-

tempts to more fully a) mine, b) test and compare and c) share its knowledge so as to improve hazard communications for Canadian industry and Canadian workers. It also uses this knowledge to improve the understanding and proficiency of interested domestic and international public bodies in developing hazard communication approaches, tools and standards. Consequently, this program supports the establishment of mutually beneficial partnerships that contribute to the creation and distribution of information and knowledge that enhance the safe handling of hazardous chemicals.

Patented Medicine Prices Review Board

Strategic Outcome

Canadians and their health care system are protected from excessive pricing for patented drug products sold in Canada and are informed on pharmaceutical trends.

Program Activity Descriptions

Compliance and enforcement of non-excessive prices for patented drug products

The Patented Medicine Prices Review Board (PMPRB) is responsible for regulating the prices that patentees charge for patented drugs products sold in Canada for human and veterinary use. Through this program activity, the PMPRB reviews the prices that

patentees charge for patented drug products, based on the price review factors in the *Patent Act*, to ensure that these prices are not excessive. In the event that the Board finds, following a public hearing, that a price is excessive in any market, it may order the patentee to reduce the price and take measures to offset any excess revenues it may have received as a result of excessive prices.

Pharmaceutical trends reporting

Through this program activity, the PMPRB provides analysis of pharmaceutical price trends and research and development spending by pharmaceutical patentees. It also provides critical analyses of price, utilization and cost trends for prescription drugs, and information on non-patented prescription drug prices. The PMPRB reports on these analytical studies and its price review and enforcement activities as they relate to excessive pricing for patented drug products, annually to Parliament through the Minister of Health.

Public Health Agency of Canada

Strategic Outcome

Canada is able to promote health, reduce health inequalities, and prevent and mitigate disease and injury.

Program Activity Descriptions

Health promotion

This program provides leadership and support in promoting health and reducing health disparities among Canadians. It supports Canadians in making healthy choices throughout all life stages through initiatives focused on, for example, child development, families, lifestyles, and aging. It also facilitates the conditions that support these choices by working with and through others to address factors and determinants that influence health, such as health literacy, food security, social support networks and the built environment.

Public health preparedness and capacity

This program increases Canada's public health preparedness and capacity by: providing tools, training and practices that enhance the capabilities of organizations and people who have a role in Canada's public health; increasing public health human resource capacity; developing and maintaining Canada's ability to prepare for public health emergencies; and by establishing/maintaining networks both within and outside Canada. The program is necessary as public health skills, tools and networks are required for Canada to be able to keep Canadians healthy.

Disease and injury prevention and mitigation

This program develops and implements strategies, undertakes prevention initiatives, and supports stakeholders to prevent and mitigate chronic disease, injury, and prevent and control infectious disease. This work leads federal efforts and works collaboratively to mobilize domestic efforts. This program is necessary given the current and potential impact of injury and chronic and infectious disease on the health of Canadians and the sustainability of the Canadian health care system.

Science and technology for public health

This program deals with the development and application of leading edge national public health science and innovative tools, providing specialized diagnostic laboratory testing and reference services, and mobilizing Canadian scientific capacity and networks to enable Canada to improve public health and better respond to emerging health risks.

Surveillance and population health assessment

This program facilitates ongoing, systematic analysis, use and sharing of routinely-collected data with and among provinces, territories, and local health authorities, and other federal departments and agencies so that they can be in a better position to safeguard the health of Canadians. This program is necessary because of the continuous risk to the health of Canadians from emerging infectious and chronic diseases as well as other population health risk factors that are present in the population. The program is geared towards working with federal departments and agencies, other levels of government, health professionals, and hospitals and laboratories across the country to facilitate the development of surveillance systems and sharing of information.

Regulatory enforcement and emergency response

This program deals with providing regulatory enforcement; managing the Health Portfolio Operations Centers, the National Emergency Stockpile System (NESS) and the Health Emergency Response Teams (HERT); and responding to national and international public health emergencies including natural disasters, serious outbreaks of infectious disease, such as pandemic influenza, or human caused emergencies.

Note: The full wording of all authorities granted in current year Appropriation Acts, of all authorities granted by statutes other than Appropriation Acts, of all non-lapsing authorities granted in the current year, and of all authorities available from previous years is given in Section 1 of this volume.

⁽S) Statutory authority.

⁽S) Statutory authority.

(1) Treasury Board Vote 5—Government contingencies.
Treasury Board Vote 10—Government-wide initiatives.
Treasury Board Vote 15—Compensation adjustments.
Treasury Board Vote 25—Operating budget carry forward.
Treasury Board Vote 30—Paylist requirement.

Treasury Board Vote 33—Payist requirement.

Treasury Board Vote 33—Capital budget carry forward.

Deemed appropriations to Vote 17, Shared Services Canada pursuant to section 31.1 of the Financial Administration Act (Order in Council 2011-1297).

Order in Council P.C. 2011-0586 designates the Minister of Health as the appropriate Minister for the Canadian Northern Economic Development Agency for the purposes of the Financial Administration Act, effective May 18, 2011.

Prior to the transfer, non-statutory expenditures of \$1,326,454 were approved by the Minister of Indian Affairs and Northern Development. Previous year's amounts have been restated by \$64,260,553.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Department

Strategic Outcome

Income security, access to opportunities and well-being for individuals, families and communities.

Program Activity Descriptions

Income security

This program activity ensures that Canadians are provided with retirement pensions, survivor pensions, disability benefits and benefits for children, through the Old Age Security program, the Canada Pension Plan (CPP), the Canada Disability Savings program and the National Child Benefit program.

Social development

This program activity supports programs for the homeless or those individuals at risk of homelessness, as well as programs for children, families, seniors, communities, and people with disabilities. It provides these groups with the knowledge, information, and opportunities to move forward with their own solutions to social and economic challenges.

Strategic Outcome

A skilled, adaptable and inclusive labour force and an efficient labour market.

Program Activity Descriptions

Learning

This program activity helps Canadians participate in post-secondary education to acquire the skills and credentials that enable them to improve their labour market outcomes and adapt to changing labour market conditions. It reduces barriers to education by providing financial assistance to individuals as well as incentives to save for a child's post-secondary education. It also provides information and awareness about opportunities to acquire education and skills. The program contributes to the inclusiveness of the workforce by giving Canadians with the required academic abilities a more equal opportunity to participate in post-secondary education. The program works with the provinces and territories, voluntary sector, financial institutions, service providers and other key stakeholders to help Canadians pursue post-secondary education.

Skills and employment

Skills and employment is intended to ensure that Canadian labour market participants are able to access the supports that they need to enter or reposition themselves in the labour market to allow them to contribute to economic growth through full labour market participation. Initiatives within this program activity contribute to the common overall objectives of promoting skills development, labour market participation and ensuring labour market efficiency.

Strategic Outcome

Service Excellence for Canadians.

Citizen-centred service

This program activity aims to improve and integrate government service delivery by providing Canadians with a one-stop, easy-to-access, personalized service in person, by telephone, Internet and via mail. This program activity is supported by overarching client segment strategies and partnerships with other departments, levels of government and community-based partners. This program activity also includes client feedback mechanisms and the responsibility for increasing public awareness of Service Canada.

Strategic Outcome

Safe, fair and productive workplaces and cooperative workplace relations.

Labour

This program activity seeks to promote and sustain stable industrial relations and safe, fair, healthy, equitable, and productive workplaces within the federal jurisdiction (transportation, post office and courier companies, communications, banking, grain and nuclear facilities, federal Crown corporations, companies who have major contracts with the federal government and Aboriginal governments, their employees, Aboriginal communities and certain Aboriginal undertakings). It develops labour legislation and regulations to achieve an effective balance between workers' and employers' rights and responsibilities. The program ensures that workplaces under the federal jurisdiction respect the rights and obligations established under labour legislation. The program also manages Canada's international and intergovernmental labour affairs, as well as Aboriginal labour affairs responsibilities.

Program Activity Descriptions

Integrity and processing

This program activity enhances and strengthens the integrity of Service Canada services and programs to ensure that the right person receives the right service or benefit at the right time, and for the intended purpose.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Canada Industrial Relations Board

Strategic Outcome

Resolution of labour relations issues in sectors regulated by the Canada Labour Code in a timely, fair and consistent manner.

Program Activity Descriptions

Adjudicative and dispute resolution program

Through this program, the Canada Industrial Relations Board (CIRB) resolves labour relations issues by exercising its statutory powers relating to the application and interpretation of Part I (Industrial Relations) and certain provisions of Part II (Occupational Health and Safety) of the *Canada Labour Code*. Activities include the granting, modification and termination of bargaining rights; the investigation, mediation and adjudication of complaints alleging violation of Part I of the *Canada Labour Code*; the determination of levels of services required to be maintained during a work stop-

page; the exercise of ancillary remedial authority; the exercice of cease and desist powers in cases of unlawful strikes or lockouts; the settlement of the terms of a first collective agreement; the provision of administrative services to these ends.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Canada Mortgage and Housing Corporation

Strategic Outcome

Increased availability of safe, affordable housing for Canadians in need, including Aboriginal Canadians.

Program Activity Descriptions

Assisted housing programs

Financial assistance is provided to individuals and groups under long term agreements, which helps to provide suitable, adequate and affordable housing to low and moderate income Canadians. This program activity also includes funding provided to provinces/territories under Social Housing Agreements. Provinces and territories signing Social Housing Agreements with the Government of Canada are subject to national principles and an accountability framework that ensures targeted federal funding is used for housing low-income households.

Housing repair and improvement programs

Canada Mortgage and Housing Corporation's (CMHC) Residential Rehabilitation Assistance Program helps to bring housing occupied by low-income homeowners, renters and persons with disabilities up to basic health, safety and mobility standards, and facilitates the conversion of non-residential buildings to residential use. Housing Repair and Improvement programs also include the Emergency repair program, which offers financial assistance to low-income Canadians in rural areas to undertake emergency repairs to their homes, and the Home adaptations for seniors independence program, which provides low-income seniors with financial assistance to carry out minor home adaptations. The Shelter enhancement program provides financial assistance to rehabilitate, repair, improve or build emergency shelters for victims of family violence. The funding for these programs is primarily in the form of a forgivable loan. The total forgivable loan depends on the cost of the repairs and area of the country.

On-reserve housing programs

Financial assistance is provided to First Nations under long term agreements, which helps to provide suitable, adequate and affordable rental housing in reserve communities. In addition, assistance is provided to bring housing occupied by low-income households up to basic health, safety and mobility standards. This program activity also includes funding to facilitate the acquisition of knowledge, skills, training and resources that will allow Aboriginal people to work towards self-sufficiency in housing and take on more responsibility for the functioning of housing within their community. The funding for these programs is primarily in the form of a subsidy, for up to 25 years, to assist projects with their financing and operation.

Affordable housing initiative

The Affordable Housing Initiative is aimed at increasing the supply of affordable housing for low to moderate income households. Affordable housing may include interventions such as construction, renovation, rehabilitation, conversion, home ownership, new rent supplements and supportive housing programs. The provinces and territories deliver and administer the programs financed by this initiative. The funding for this program is in the form of a contribution and is provided for provincially/territorially-designed programs.

Strategic Outcome

Strengthened competitiveness and innovation of the housing sector in order to meet the housing needs of Canadians.

Program Activity Descriptions

Canadian housing market research and analysis

CMHC collects, analyzes and disseminates housing market information that facilitates informed housing-related decisions by those in the industry, the public at large and CMHC. This includes the provision of housing market data, analysis and forecasts through publications, conferences, seminars, industry roundtables and custom data services. To meet client information needs, CMHC undertakes various surveys of: starts and completions; market absorption; rental market; mortgage approvals; and consumer intentions to buy or renovate a home.

International activities

Housing sector well-being is further promoted through support to the industry, which enables Canadian companies to secure international business opportunities and diversify their share of housing export markets. CMHC will seek to increase Canadian housing exports by helping companies expand into promising markets, bring together key Canadian clients with pre-selected prospective buyers abroad, promote awareness and recognition of Canadian housing approaches, support foreign delegations seeking information on Canada's housing system and provide assistance to emerging economies to assess and improve their housing environment.

Research and information dissemination to promote desirable housing market outcomes and improve building performance

CMHC investigates ways to ensure the supply of affordable housing finance, make housing finance more inclusive, encourage the supply of affordable housing and move the housing system forward. CMHC also conducts technical research to address moisture and the indoor environment, the durability performance of residential buildings and disasters.

Strategic Outcome

The Canadian housing system remains one of the best in the world.

Program Activity Descriptions

Research and information dissemination to promote sustainable housing and communities, as well as lead the development and implementation of federal housing policy

CHMC conducts research on energy and environmental solutions for residential buildings, residential water quality and use, unique technical problems of remote and northern housing, sustainable community planning and design, and housing and population health. As mandated, CMHC develops and implements federal housing policy in support of Government of Canada priorities and objectives.

Research and information dissemination that addresses distinct housing needs, including those of Aboriginal people

CHMC conducts research and disseminates information on issues regarding specific populations with distinct housing needs, including Aboriginal people, homeless people, low-income people, newcomers (immigrants and refugees), people with disabilities and seniors.

Emergency planning

CMHC ensures that Business Resumption Plans are in place and tested to ensure effective and timely resumption of normal business operations following a business interruption impacting the Corporation's business operations and commitments to stakeholders, with particular emphasis on restoring mission-critical business functions first.

Canadian Artists and Producers Professional Relations Tribunal

Strategic Outcome

The rights of artists and producers under Part II of the *Status of the Artist Act* are protected and respected.

Program Activity Descriptions

 $Certification, complaints\ and\ determination\ program$

This program deals with applications for certification, revocation of certification, review, determination, and consent to prosecute, and with complaints of unfair practices, brought forward by artists, artists' associations or producers under Part II of the *Status of the Artist Act*, which governs professional relations between self-employed artists and producers.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Canadian Centre for Occupational Health and Safety

Strategic Outcome

Improved workplace conditions and practices that enhance the health, safety, and well being of working Canadians.

Program Activity Descriptions

Occupational health and safety information development, delivery services and tripartite collaboration

The goal of this program is to provide free information on occupational health and safety to support Canadians in their efforts to improve workplace safety and health. Citizens are provided with information through a free and impartial personalized service via telephone, e-mail, person-to-person, fax or mail. Alternatively they can independently access a broad range of electronic and print resources developed to support safety and health information needs of Canadians. This may include cost recovery products and services and is supported financially by contributions from various stakeholders. Through health and safety information development, the Canadian Centre for Occupational Health and Safety (CCOHS) collects, processes, analyzes, evaluates, creates and publishes authoritative information resources on occupational health and safety for the benefit of all working Canadians. This information is used for education and training, research, policy development, development of best practices, improvement of health and safety programs, achieving compliance and for personal use. Various levels of service are available from free to purchase of products and services. When the product or service provided by CCOHS is provided to identified external recipients with benefits beyond those enjoyed by the general taxpayer, a user fee is charged. CCOHS promotes and facilitates consultation and cooperation among federal, provincial and territorial jurisdictions and participation by labour, management and other stakeholders in the establishment and maintenance of high standards and occupational health and safety initiatives for the canadian context. The sharing of resources results in the coordinated and mutually beneficial development of unique programs, products and services. Collaborative projects are usually supported with a combination of financial and non-financial contributions to the programs by stakeholders and result in advancement of the health and safety initiatives.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Office of the Co-ordinator, Status of Women

Strategic Outcome

Equality for women and their full participation in the economic, social and democratic life of Canada.

Program Activity Descriptions

Women's participation in Canadian society

This program activity strengthens women's full participation by addressing their economic and social situations and their participation in democratic life through financial and professional assistance for projects and through strategic partnerships that leverage resources involving public institutions and non-governmental organizations.

Strategic policy analysis, planning and development

Status of Women develops strategic policy analysis, advice, and tools to support federal departments and central agencies in identification of policy priorities and in integrating gender-based analysis in existing and proposed policies, programs and initiatives. This is done through collaboration with other federal departments, provincial-territorial governments, civil society, and key international partners.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Department

Strategic Outcome

The People – Individual, family and community well-being for First Nations and Inuit.

Program Activity Descriptions

Education

This program activity provides First Nations and Inuit communities with tools to achieve educational outcomes comparable to those of other Canadians. Indian Affairs and Northern Development (INAC) has primary responsibility under the Indian Act for the elementary and secondary education of status-Indians living on reserve. As a matter of social policy, INAC also supports on-reserve status-Indians and Inuit students in the pursuit of post-secondary education. Support provided through the Education programs includes provisions for instructional services, special education services as well as targeted initiatives which aim to enhance First Nation education management,

improve teacher recruitment and retention, and encourage parental and community engagement. New targeted funds have been recently included to improve the provision of elementary and secondary education services through both a partnership and a student success program.

Social development

Supports the provision of: income assistance to meet basic needs for food, clothing and shelter to ensure the safety and well-being of individuals and families consistent with provincial programs and standards: First Nations child and family services to improve their well-being and security; assisted living for social support services of a non-medical nature such as in-home care, short term respite care, foster care and institutional care to improve their well-being and security; Family Violence Program to improve safety and security, particularly of women and children at-risk; National Child Benefit Re-investment to support low-income families with children to help prevent or reduce the depth of child poverty; and other social services to build self-reliant, sustainable, healthy and stable First Nation communities.

Residential schools resolution

Indian Residential schools were mostly operated by four religious denominations and funded by the federal government, from before Confederation to 1996. The courts in each jurisdiction approved the Indian Residential Schools Settlement Agreement, which was implemented on September 19, 2007, with final deliverables up to 2017. The administration of the Indian Residential Schools Settlement Agreement (IRSSA) seeks to further reconciliation with former student residents of Indian Residential Schools, their families and communities by providing financial compensation (through validation of their residency and an independent assessment of more serious harms they may have suffered), a disclosure forum and the provision of healing and commemorative services.

Managing individual affairs

The Managing Individual Affairs program activity ensures responsible Federal stewardship of the provisions of the *Indian Act* that pertain to Estates, Band moneys, registration and Band membership through direct client-services as well as partnerships with First Nations to deliver select services including the administration of Estates and the Indian Registration Program. The Program Activity is also responsible for administering the portions of the *First Nations Oil and Gas and Moneys Management Act* that pertain to Indian Moneys.

Strategic Outcome

The Government – Good governance and co-operative relationships for First Nations, Inuit and Northerners.

Program Activity Descriptions

Treaty management

By working in partnership, federal, provincial/territorial governments, and Aboriginal parties are able to create and maintain the necessary structures (such as education, child care, etc) to support ongoing and evolving relationships within a historical and modern context. Key activities include: the implementation of land claim, self-government agreements; special claims; comprehensive land claim transfers; Tables and Treaty Commissions. The Treaty Commission provides funds in the way of contributions to recipients. Although all Canadians are expected to benefit from the settlement and implementation of Comprehensive Land Claim Agreements, the primary beneficiaries are expected to be First Nations and Inuit communities, who will be better able to articulate their interests, participate in land and resource development and management (where applicable) as well as demonstrate the importance of treaties and the treaty relationship between the Crown and Aboriginal people. Funds are provided to the beneficiaries in the form of grants as per agreement.

Co-operative relationships

This program activity addresses constitutional and historic obligations, reduces conflict through negotiation and enables all parties to work together toward reconciliation. Co-operative Relationships are about mutual respect. They establish an atmosphere of trust, accountability and respectful partnerships among governments, First Nations and Inuit. This atmosphere, in turn, supports social, economic and cultural growth in First Nation and Inuit communities and increases their self-reliance. Co-operative Relationships are the basis for mutually reached resolution of claims and other rights issues. Through Co-operative Relationships, funds are provided to First Nations and Inuit in support of the activities within the program activity including negotiation of claims and self-government agreements, certainty is obtained over the ownership, use, and the management of land and resources. First Nations and Inuit are effectively represented in federal policy decisions and the Crown duty to consult is supported. Funds are transferred to Aboriginal recipients through contributions and loans agreements. Funding levels are determined based on proposals submitted by the Aboriginal and are based on program guidelines and terms and conditions.

Governance and institutions of government

The efforts related to this program activity assist in achieving social and economic vibrancy in First Nation and Inuit communities. It supports individual community and aggregate based governments and governance systems by assisting them establish effective governance and associated capacities, processes and mechanisms (such as by-law making authority, election processes). In particular, support is provided to First Nation and Inuit governments as well as their respective institutions of government. These institutions include but are not limited to those that provide services in the areas of governance, land claim organizations

and professional associations. This program activity also provides support to representative organizations with respect to policy legislation development.

Strategic Outcome

The Land and Economy – Full participation of First Nations, Inuit and Métis individuals and communities in the economy.

Program Activity Descriptions

Community infrastructure

This program activity supports the provision of funding for the acquisition, construction, operation and maintenance of community facilities such as roads, bridges, water and sewer, and administration offices; education facilities, such as schools and teacherages and on-reserve housing.

Aboriginal economic development

This program activity recognizes the synergies between economic development, lands activities, and business development. It recognizes that the federal government has a role to play in creating the conditions that will foster Aboriginal economic development. As INAC does not hold all the economic levers, it must forge strategic partnerships with other levels of government, the private sector, Aboriginal organizations and other stakeholders to succeed in increasing the participation of Aboriginal Canadians in the economy. The sub-activities and sub-sub-activities under this program activity contribute to the expected results: viable Aboriginal businesses and opportunity-ready communities. Strengthening business development capacity tools will encourage Aboriginal Canadians to start and/or expand their own businesses, thereby contributing to viable Aboriginal businesses. Increasing access to and control of Aboriginal lands and natural resources, and building community/institutional capacity, will enable Aboriginal communities to fully utilize their assets for economic development, contributing to opportunity-ready communities. The growing Aboriginal land and resource base will also increase economic opportunities for Aboriginal communities, contributing to an increased number of Aboriginal start-up businesses.

Federal administration of reserve land

This program activity encompasses the Crown's statutory and fiduciary obligations as the administrator of reserve lands held in trust for the use and benefit of Indians. Those obligations are fulfilled through the timely response to requests for land transactions and activation of land and resource assets, additions to reserve, environmental protection performed with due diligence which preserves the principles of communal use and benefit while meeting the aspirations of First Nations in building safe, healthy and successful communities.

Strategic Outcome

The North – Self-reliance, prosperity and well-being for the people and communities of the North.

Program Activity Descriptions

Northern governance and people

This program activity strengthens the North's communities and people by devolving to the people of the North province-like responsibilities for land and natural resources; reducing the costs of transporting nutritious perishable foods and other essential items to isolated Northern communities; providing grants to Territorial Governments for hospital and physician services; working with Northern communities to identify the risks and challenges posed by climate change and advancing interests of Canadians and Northerners through circumpolar forums.

Northern land, resources and environmental management

This program activity supports the management, sustainable development and regulatory oversight of the land, water, environment and natural resources of the North. Mineral and petroleum resource development, including offshore projects, are managed and coordinated; environmental management and stewardship is promoted through initiatives like the Protected Areas Strategy, Cumulative Impacts Monitoring Program and the continued development and improvement of the northern regulatory regime; resource management is effected through development of legislation, regulations and related policies as well as collaboration with and support of Northern Boards; contaminated sites are identified and cleaned-up; and northern land and resources are managed for the current and future benefit and prosperity of all Northerners.

Northern science and technology

This program activity supports scientific research and technology in the North. Research and monitoring of long-range contaminants and their impacts on the ecosystem and the traditional/country food chain is carried out through the Northern Contaminants Program. It also supports the work carried out under the International Polar Year initiative including the efforts to facilitate scientific research licensing and approvals as well as the establishment and management of scientific data. The establishment of the Canadian Arctic Research Station will position Canada as an international leader in Arctic science and technology.

Strategic Outcome

Office of the Federal Interlocutor – Socio-economic well being of Métis, non-status Indians and urban Aboriginal people.

Program Activity Descriptions

Métis and non-status Indian organizational capacity development

This program activity is carried out by the Office of the Federal Interlocutor, the Government of Canada's principal point of contact for Métis and Non-Status Indian organizations, and an advocate within government on their key issues. The main mandate of the Office is to support (financially and through other means) the work of these organizations, and help find practical ways to reduce dependency and improve the self-reliance, and social and economic conditions of Métis, Non-Status Indians and off-reserve Aboriginal people. The Office fulfills this mandate by helping Métis and Non-Status Indian organizations develop their organizational and professional capacity, so that they can build effective partnerships with federal and provincial governments, and the private sector.

Urban aboriginal strategy

This program activity helps respond to the needs of Aboriginal people living in urban centres. It promotes the self-reliance and economic participation of urban Aboriginal people and expands their life choices. Through the Urban Aboriginal Strategy, the federal government partners with other governments, community organizations and Aboriginal people to support (financially and through other means) projects that respond to local priorities. The Strategy enhances the federal government's ability to align expenditures directed toward urban Aboriginal people in key centres with provincial and municipal programming in a way that both advances federal objectives and responds effectively to local challenges and opportunities.

Métis rights management

This program activity is the federal response to the 2003 Supreme Court of Canada's Powley decision, which affirmed that Métis hold section 35 Aboriginal rights under the Canadian Constitution. The program works with (through financial support and other means) nonprofit, representative Aboriginal organizations that have substantial Métis memberships to develop objectively verifiable membership systems for Métis members and harvesters in accordance with the Supreme Court's direction.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

First Nations Statistical Institute

Strategic Outcome

First Nations, governments and other interested parties will have accurate, and relevant statistical information and analysis on the fiscal, economic and social conditions of First Nations.

Program Activity Descriptions

Data gathering and analysis

Provide statistics and analysis on the socio-economic conditions of Indians, First Nations, Aboriginal groups, and others residing on reserve or Aboriginal lands.

Sound quality and practices

Promote the quality, coherence and compatibility of First Nations statistics with accepted standards through collaboration with First Nations and other organizations, and build statistical capacity within First Nation governments.

Outreach

Work with, and provide advice to First Nations, federal departments and agencies and provincial departments and agencies on First Nation statistics.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Indian Residential Schools Truth and Reconciliation Commission

Strategic Outcome

Disclosure and recognition of the truth regarding Indian Residential Schools furthers healing and reconciliation for the individuals and communities affected.

Program Activity Descriptions

Truth and reconciliation

This program supports the research, truth, healing and commemoration undertakings of the Truth and Reconciliation Commission. This program, which is part of Canada's obligations under the Indian Residential Schools Settlement Agreement, will include the creation of a historic record of the Indian Residential Schools system and legacy, as well as truth taking, healing and commemoration events. This program has funding for five years, after which it will wind down.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Department

Strategic Outcome

Advancements in science and technology, knowledge, and innovation strengthen the Canadian economy

Program Activity Descriptions

Research and development financing

This program helps Canadian businesses increase research and development (R&D) by supplementing private sector investment for R&D and innovation projects with additional funds through means such as repayable contributions. Agreements normally specify which funding will come from the federal government and which from other sources. Projects are chosen based on their impact on the Canadian economy, their potential for maximizing innovation capacity and expertise, and their creation and retention of jobs in Canada.

Science, technology and innovation capacity

This program supports the Minister of Industry and the Minister of State (Science and Technology) in their responsibilities related to science, technology and innovation (ST&I). It sets the strategic direction of policies and programs to support and stimulate research, development and innovation in Canada. It works with portfolio partners, other government departments and external stakeholders from the private and public sectors to foster an environment that is conducive to innovation and to promote scientific excellence.

Information and communication technologies research and innovation

This program conducts research on advanced telecommunications and information technologies through the CRC to ensure an independent source of advice for public policy and to support the development of new products and services for the information and communications technologies (ICT) sector. Research projects are carried out through a combination of in-house activities, tasks performed for other government departments on a cost-recovery basis and partnerships with industrial and academic organizations. This work is undertaken to provide an insight into future technologies to assist Industry Canada in developing telecommunications policies, regulations and program delivery; to improve decision making related to ICT by other government departments; and to close the innovation gap by transferring new technologies to Canadian industry.

Strategic Outcome

Canadian businesses and communities are competitive

Program Activity Descriptions

Small business research, advocacy and services

The Department's work in the field of small business research, advocacy and services is aimed at enhancing the growth and competitiveness of small business and encouraging entrepreneurship. To support this program activity, Industry Canada raises awareness across government of the challenges facing small businesses; provides knowledge and expertise on small and medium-sized enterprises (SMEs) in a number of areas, including statistics, entrepreneurship, financing, innovation and growth firms; recommends policy options; delivers programs that help support SMEs and entrepreneurial activity across Canada; and provides advice and support related to the Business Development Bank of Canada.

Community economic development

This program advances the economic development of northern Ontario communities in the same manner that regional development agencies support similar activities in other regions of Canada. Its main goal is to strengthen the northern Ontario economy by providing financial support, through contribution agreements, to economic and community development projects led by the private, not-for-profit, and public sectors. This program also helps to increase public access to the Internet, increase computer access opportunities in schools, and improve IT skills and learning in community groups and communities across Canada.

Industrial competitiveness and capacity

This program was put in place to help Canadian industries develop the capacity to adapt to the ever-changing economic landscape, respond appropriately to external shocks, and innovate and compete internationally. It uses research and analysis to develop expertise on Canadian industries and Canada's position in the global economy. The overall goal is to strengthen Canada's industrial capacity by applying this expertise to develop and contribute to policy, legislation, and regulations and to engage various public and private stakeholders. Departmental officials engage with associations, governments and leading firms to help Canadian industries become more innovative and enter into global value chains, strengthen partnerships both

domestically and internationally, attract investment and promote Canadian expertise. Through this program, the Department also invests in private sector initiatives that are aimed at maximizing productivity and facilitating access to capital.

Strategic Outcome

The following program activity supports all strategic outcomes within its organization.

Program Activity Descriptions

Internal services

See introductory text.

Strategic Outcome

The Canadian marketplace is efficient and competitive

Program Activity Descriptions

Spectrum, telecommunications and the on-line economy

This program maximizes the public benefits of radio spectrum by allocating it efficiently and contributing to the orderly evolution of information and communications technologies, telecommunications networks and the online economy. This ensures that Canadians develop, use and benefit from them domestically and internationally. It achieves this by developing and administering domestic regulations, economic framework policies, procedures and standards that govern Canada's radiocommunication and telecommunications industries and online economy. This program also promotes global telecommunications through the development of international treaties and agreements and helps facilitate international online trade and commerce through participation in international bilateral and multilateral forums.

Marketplace frameworks and regulations

Industry Canada is responsible for the oversight and regulation of a number of aspects of the Canadian marketplace including bankruptcy, foreign direct investment, federal incorporation, intellectual property, and trade measurement. To deliver on its mandate, this program administers framework statutes, regulations, policies, and procedures; it develops, sets, and assures compliance with standards; performs reviews; and holds meetings with a variety of stakeholders. Overall, the program benefits Canadians by ensuring the integrity of the marketplace.

Competition law enforcement

This program is in place to maintain and encourage competition in order to achieve a number of objectives, including promoting the efficiency and adaptability of the Canadian economy and protecting competitive markets. This program also ensures that all businesses have equitable opportunities to participate in the Canadian economy in order to provide consumers with competitive prices and product choices. The Competition Bureau, an independent law enforcement agency, is responsible for the administration and enforcement of the Competition Act, the Consumer Packaging and Labelling Act, the Textile Labelling Act and the Precious Metals Marking Act. It seeks to ensure that businesses and individuals conform with the legislation under its jurisdiction through negotiated settlements, consent agreements and, where appropriate, prosecuting anti-competitive conduct through litigated proceedings. It protects competitive markets by detecting, disrupting and deterring anti-competitive conduct. The Competition Bureau also encourages reliance on market forces. It conducts market studies, provides advice to government legislators and policy-makers and intervenes and/or makes representations before federal and provincial boards, commissions and tribunals to encourage competition as a means of achieving policy or regulatory objectives.

Consumer affairs

This program gives consumers a voice in the development of government policies and enables them to be effective marketplace participants. It is an element of the Department's consumer affairs role under the Department of Industry Act, which directs the Minister to promote the interests and protection of consumers. The program provides research and analysis on marketplace issues in support of both policy development and the intergovernmental harmonization of consumer protection rules and measures. It contributes to effective consumer protection through collaboration with provincial and territorial consumer protection agencies under Chapter 8 of the Agreement on Internal Trade, and with other governments through the OECD Consumer Policy Committee. Industry Canada, through this program, identifies important consumer issues and develops and disseminates consumer information and awareness tools. These consumer protection information products and tools are developed either by the program itself or in collaboration with other consumer protection agencies. Finally, the program provides financial support to not-for-profit consumer and voluntary organizations through the Contributions Program for Non-profit Consumer and Voluntary Organizations. The purpose of the financial support is to encourage them to reach financial self-sufficiency and assist them in providing meaningful, evidence-based input to public policy in the consumer interest.

Canadian Space Agency

Strategic Outcome

Canada's exploration of space, provision of space services and development of its space capacity, meet the nation's needs for scientific knowledge, innovation and information.

Program Activity Descriptions

Space exploration

This program activity provides valuable Canadian science, signature technologies and qualified astronauts to international space exploration endeavours. This program activity is necessary to contribute to the government of Canada's Science and Technology Strategy. It could also generate spin-offs that contribute to a higher quality of life for Canadians and could foster nation-building. This program activity appeals to the science and technology communities and generates excitement within the population in general. It is targeted mostly towards Canadian academia and international space exploration partnerships. Canadian industry also benefits from the work generated within this program activity.

This program activity is delivered with the participation of foreign space agencies and Other Government Departments (OGDs). This collaborative effort is formalized under international partnership agreements, contracts, grants or contributions.

Space data, information and services

This program activity includes the provision of space-based solutions (data, information and services) and the expansion of their utilization. It also serves to install and run ground infrastructure that processes the data and operates satellites. This program activity is necessary because the space-based solutions assist Other Government Departments (OGDs) in delivering growing, diversified, or cost-effective programs and services within their mandate, which is related to key national priorities, such as sovereignty, defence, safety and security, resource management, environmental monitoring, and the North. It also provides academia with data required to perform its own research.

The services delivered through this program activity are rendered, and the data and information are generated and processed, with the participation of the Canadian space industry, academia, OGDs, national and international organizations such as foreign space agencies, not-for-profit organizations, as well as provincial and municipal governments. This collaborative effort is formalized under national and international partnership agreements, contracts, grants or contributions.

Future canadian space capacity

This program activity attracts, sustains and enhances the nation's critical mass of Canadian space specialists, fosters Canadian space innovation and know-how, and preserves the nation's space-related facilities capability. In doing so, it encourages private-public collaboration that requires a concerted approach to future space missions. This program activity is necessary to secure the nation's strategic and on-going presence in space in the future and to preserve Canada's capability to deliver internationally renowned space assets for future generations. It is targeted at Canadian academia, industry and youth, as well as users of Canadian space solutions (Other Government Departments (OGDs) and international partners).

This program activity is conducted with the participation of funding agencies, OGDs along with government facilities and infrastructure, foreign space agencies, not-for-profit organizations and provincial governments. This collaborative effort is formalized under contracts, grants, contributions or national and international partnership agreements.

Strategic Outcome

Canadian Tourism Commission

Strategic Outcome

Canadian economy benefits from strong tourism demand from Canadian Tourism Commission's (CTC) markets.

Program Activity Descriptions

Marketing and sales

The Marketing and sales program activity (PA) focuses on three major geographical market segments – the Americas, Europe and Asia/Pacific – in addition to targeting tourism activities associated with Meetings, Conventions, and Incentive Travel (MC&IT). Marketing and sales efforts are based on three channels: 'direct to consumer' advertising and marketing; travel trade; and media and public relations. This PA is fundamental to CTC's role as Canada's national tourism marketing organization and directly supports CTC's outcome of increasing awareness and consideration of Canada as a tourism destination in CTC markets and generating export revenues from the expenditures of international visitors to Canada.

Tourism research and communications

The Tourism research and communications program activity (PA) generates and communicates strategic business intelligence, market and consumer research, and tourism news and information that are vital to maintaining a competitive edge for Canada's tourism industry. This PA is necessary as the CTC is legislated to "provide information about Canadian tourism to the private sector and to the government of Canada, the provinces and the territories" (CTC Act, section 5d).

Experiential product development

The Experiential product development program activity (PA) influences the quality and quantity of diverse and competitive tourism experiences in Canada. This PA is necessary for the Canadian Tourism Small

and Medium Sizes Enterprises (SMEs), as it is the first point of entry for the SMEs to develop Canadian-branded, export ready, consumer relevant product experiences that are used in CTC sales, marketing and media relations initiatives. Products and tools developed under this PA, such as Experiences Toolkit (practical insight such as moving from a tourism product to an experience and customer trends), Brand Toolkit (an in-depth branding resource) and Digital Assets (videos, photos), are free for SMEs use and help SMEs increase their market readiness, viability and competitiveness both domestically and internationally.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

See introductory text.

Copyright Board

Strategic Outcome

Fair decision-making to provide proper incentives for the creation and use of copyrighted works.

Program Activity Descriptions

Copyright tariff setting and issuance of licences

The Board is an economic regulatory body empowered to establish, either mandatorily or at the request of an interested party, fair and equitable tariffs that remunerate rights owners for the use of copyrighted works, when the administration of such copyright is entrusted to a collective-administration society. The Board also has the right to supervise agreements between users and licensing bodies and issues licences when the copyright owner cannot be located.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

See introductory text.

Federal Economic Development Agency for Southern Ontario

Strategic Outcome

The economy of Southern Ontario is competitive and diversified

Program Activity Descriptions

Business and innovation development

FedDev Ontario will support communities and businesses in Southern Ontario, particularly those affected by structural economic change, by making the Southern Ontario economy more competitive, innovative and diversified. FedDev Ontario works to improve the region's capacity for economic growth by assisting enterprises, particularly small and medium-sized enterprises, to enhance their productivity and improve their competitiveness and by strengthening innovation capacity and the commercialization of knowledge. Through this program, FedDev Ontario delivers and administers contributions with businesses, not-for-profit organizations, and other levels of government. Transfer payments in support of this program are made under the authority of Southern Ontario Development Program, SODP.

Economic regional development and infrastructure

FedDev Ontario will support Southern Ontario communities, particularly those most affected by changes

in the economy and those whose economies are less diversified or are reliant on single employers. It will assist communities to transform and diversify their economies through investments that stimulate economic development, promote conditions that foster sustainable communities, increase economic opportunities and increase community capacity to respond to challenges. Through this program, FedDev Ontario delivers and administers contributions with not-for-profit organizations, other levels of government, businesses and business associations. These funds are used to support community economic planning, development and diversification initiatives. Transfer payments in support of this program are made under the authority of the Southern Ontario Development Program, SODP, the Eastern Ontario Development Program, EODP, and the Community Futures Program. FedDev Ontario also works with Infrastructure Canada and the provinces to oversee the flow of federal funds allocated to Ontario through various infrastructure funding streams.

Policy, advocacy and coordination

FedDev Ontario's Policy, advocacy and coordination (PAC) program activity is central to identifying and effectively responding to opportunities and challenges facing the Southern Ontario economy. PAC provides intelligence, analysis and well-grounded advice on a broad range of issues and topics, and informs and supports decision making by the Agency and the Minister of State. In offering strategic, researched policy positions that reflect the region's potential; influencing national policies and programs that affect Southern Ontario's development and interests; and in coordinating other policies and programs within the region to form integrated approaches to development, PAC helps carry the Agency's agenda forward and helps ensure that FedDev Ontario remains relevant and responsive to the opportunities and challenges in Southern Ontario. Transfer payments in support of this program are made under the authority of Southern Ontario Development Program, SODP.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

National Research Council of Canada

Strategic Outcome

Advancements in innovative technologies and increased innovation capacity in targeted Canadian industries and national priority areas.

Program Activity Descriptions

Industrial research assistance

This program provides a range of technical and business-oriented advisory services, as well as financial support for small and medium-sized (SME) Canadian businesses engaged in research and development of technological innovations. The program is important for enabling enterprises to generate significant economic activity for Canadian industry by augmenting the capacity and capability of enterprises to innovate and commercialize. Financial support is provided through a transfer payment program delivered by a cross-Canada network of more than 250 professionals, including over 230 Industrial Technology Advisors (ITAs), and located in approximately 100 communities. The field staff of professionals, recognized for their scientific, technical, engineering, business expertise, and knowledge of SMEs, provides clients with customized value-added advice, information, referrals and financial assistance. They work with clients at all stages of the innovation - commercialization continuum, including: project development; access to technical assistance, financial, business, marketing or

management advice; access to competitive technical information; patent searches; and access to local, regional, national or international linkages. NRC-IRAP Innovation Network Advisors (INAs) represent and promote NRC-IRAP in the community innovation system and build effective regional innovation system relationships for the benefit of SMEs. This includes working with organizations that receive NRC-IRAP contributions as well as with other organizations to facilitate the implementation of multi-sector, multi-partner initiatives that are relevant to SMEs regionally and nationally. As well, the program supports the placement of graduates in SMEs through its participation in the delivery of Human Resources and Social Development Canada's Youth Employment Strategy (YES).

Manufacturing technologies

This program performs multi-disciplinary research and development in consultation with industry, universities, government departments and other key innovation players to improve the global competitiveness of Canadian industry by transforming knowledge and innovation into real economic value and by transferring technologies into industrial solutions for the market-place. Companies have coordinated access to NRC's multi-disciplinary research expertise and state-of-the art facilities to ensure they are at the leading edge of innovation. This includes a facility that transforms concepts into custom precision mechanical prototypes for research applications.

Health and life science technologies

In support of the federal S&T strategy, this program mobilizes and partners with key university, government and private sector players, and forms major research collaborations to develop integrated research solutions for complex health and related life science issues for the benefit of Canadians. Areas of research focus include age-related and infectious diseases, human health and wellness, and the prevention, early diagnosis and improved treatment of diseases such as cancer.

Information and communications technologies and emerging technologies

In support of the federal S&T strategy, this program mobilizes and partners with key university, government and private sector players and forms major research collaborations to develop integrated research solutions in the areas of information and communications technologies and emerging technologies for the economic benefit of industrial sectors and Canadians generally. Areas of research focus include photonics, molecular science, information technology and enabling sustainable development.

Energy and environmental technologies

This program is carried out in partnership with other government departments, universities and industry and brings together the knowledge and expertise needed to make an impact on areas of critical importance to Canada in environmental and sustainable energy. The challenge is to reduce energy consumption while developing clean, sustainable energy alternatives. NRC is working to help alleviate the environmental impacts of activity in the energy, resources, transportation, construction and agri-food industry sectors. NRC performs R&D to develop processes and technologies for environmentally responsible manufacturing.

Strategic Outcome

Canadians have access to research and development information and infrastructure

Program Activity Descriptions

National science and technology infrastructure

This program manages national science and engineering facilities for Canadian scientific and technological communities. Facilities include astronomical observatories, the laboratory for national measurement standards, the TRIUMF sub-atomic research facility, and a suite of neutron-scattering spectrometers at Chalk River Laboratories. They also include astronomical ob-

servatories and the laboratory for national measurement standards as mandated by the *National Research Council Act*.

Scientific, technical and medical information

This program operates and maintains the national science library, specifically holding the national collection of Scientific Technical and Medical (STM) information. The program provides Canada's research and innovation communities with access to global STM information, to facilitate knowledge discovery, cross discipline research, innovation and commercialization.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Natural Sciences and Engineering Research Council

Strategic Outcome

Discovery: high quality Canadian-based competitive research in the natural sciences and engineering.

Program Activity Descriptions

Fund basic research

This program activity promotes and enables global excellence in discovery research in Canada. NSERC's discovery-based programs support long-term, ongoing programs of research as well as shorter-term research projects. In addition, NSERC provides substantial and timely additional resources to select researchers in or-

der to accelerate progress and maximize the impact of their research program. Having a solid capacity for basic research across a broad spectrum of natural sciences and engineering disciplines ensures that Canada remains at the leading edge of knowledge creation. It also ensures that Canada can access and exploit S&T developments from other countries and forms the foundation for training the next generation of scientists and engineers.

Support for research equipment and major resources

This program activity helps to support the acquisition, maintenance and operation of research equipment and major research resources. Funds are also used to facilitate researchers' access to major and unique research facilities in Canada and abroad. Grants are awarded through a competitive peer review process. This activity is necessary because, in addition to funds to carry out research, top scientists and engineers need state-of-the-art equipment and facilities to carry out research at world-class levels. Access to top facilities plays an important role in attracting the best minds to Canada and keeping them here.

Strategic Outcome

Innovation: Knowledge and skills in the natural sciences and engineering are transferred to and used productively by the user sector in Canada.

Program Activity Descriptions

Fund university-industry-government partnerships

This program activity fosters collaborations between university researchers and industry, as well as other sectors, to develop and transfer new knowledge to Canadian-based organizations. A range of industry-driven programs aim to stimulate innovation in the Canadian economy and encourage greater science and technology (S&T) investment by the private sector. These partnership programs and projects address real-world challenges that are relevant to industry, help

build sustainable relationships between the two sectors and connect people and skills.

Fund research in strategic areas

This program activity funds activities and research projects in selected areas of national importance and in emerging areas that are of potential significance to Canada. To take advantage of Canada's established excellence in research and innovation, and to build capacity in areas that are critical to the Canadian economy, NSERC invests in research areas that have been carefully selected as strategic priorities for the country. These investments support a range of activities such as research projects, networks and workshops. Funded activities share the common goal of connecting researchers with end users in order to enable the transfer or knowledge/technology and expertise to increase Canadian prosperity.

Support commercialization

This program activity supports the development of commercially promising technologies and promotes the transfer of knowledge and technologies to Canadian companies for commercialization. Strengthening Canada's record in commercialization is necessary to achieve business growth, job creation and a stronger, more resilient economy. By means of grants awarded through competitive peer review processes, NSERC aims to support the development of pre-competitive technologies and to help build the capacity of Canadian universities and colleges to work with industry and fuel economic growth. Federal investments serve to leverage significant amounts of private funding.

Strategic Outcome

People: highly skilled science and engineering professionals in Canada.

Program Activity Descriptions

Attract and retain faculty

This program activity aims to attract and retain some of the world's most accomplished and promising researchers for faculty positions in Canadian universities. Chairs are awarded through a competitive peer review process and support faculty positions within post-secondary and research institutions by providing funding for salaries and research activities. Chair holders conduct leading edge research that improves our knowledge and quality of life, strengthens Canada's international competitiveness, and helps train the next generation of highly skilled people. These top researchers serve as magnets to other high calibre researchers and students to come to, or to remain in, Canada. Ultimately this helps to cultivate centres of world class research excellence at Canadian universities, and to brand Canada as a top destination for research.

Support students and fellows

This program activity supports training of highly qualified people through programs of scholarships, fellowships and stipends. Support is provided to students during their research studies at all levels of university enrolment (undergraduate, master's and doctorate level graduate studies, postdoctoral work), providing opportunities for recipients to develop technical and professional skills, and to experience enriched and varied research environments both within Canada and abroad. Scholarship programs aim to ensure that Canada is able to attract, retain and develop a talented, highly skilled workforce. The recipients of scholarship and fellowship awards are selected through peer reviewed national competitions.

Promote science and engineering

This program activity stimulates the public's interest in science, math and engineering and encourages the next generation of students to consider careers in these fields, helping to ensure that Canada has an ongoing supply of future discoverers and innovators. These activities are necessary as Canada has fewer university students enrolled in the natural sciences and engineering disciplines and fewer PhDs graduating and working in these fields, relative to most OECD countries. NSERC awards grants to support activities of community-based organizations, museums, science centres and universities that stimulate the interest of young people and students and improve school performance in science and mathematics. In addition, NSERC offers several prizes that recognize and highlight Canadian achievements in training, research and innovation.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Registry of the Competition Tribunal

Strategic Outcome

Open, fair, transparent and expeditious hearings related to the Tribunal's jurisdiction.

Program Activity Descriptions

Process cases

The Registry of the Competition Tribunal provides all administrative support required for the proper conduct

of the Competition Tribunal's business and for the Tribunal to hold hearings anywhere in Canada.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Social Sciences and Humanities Research Council

Strategic Outcome

Institutional environment: a strong Canadian science and research environment.

Program Activity Descriptions

Indirect costs of research

In Canada, the provincial and federal governments jointly support academic research. The provinces provide the basic physical infrastructure and, supported in part by the Canada Health and Social Transfer, direct and indirect operating costs. The federal government funds the direct costs of research, mainly through the three national research granting agencies — the Canadian Institutes of Health Research, the Natural Sciences and Engineering Research Council, and the Social Sciences and Humanities Research Council. The term "indirect costs" refers to the central and departmental administrative costs that institutions incur to support research, but are not attributable to specific research projects.

In its 2003 budget, the Government of Canada announced a new program to support the indirect costs associated with the conduct of academic research in institutions that receive research grant funds from any

of the three federal granting agencies. This grant program recognizes the growing indirect costs of conducting publicly-funded academic research. The program was created to help post-secondary institutions maximize the investments in research in one of two ways: secure additional support for the indirect costs of conducting research or support their mandates to teach and provide community services. By financing a portion of the indirect costs incurred by post-secondary institutions and their affiliated research hospitals and institutes, the federal government both supports world-class research facilities and addresses the needs of smaller Canadian post-secondary institutions. The Indirect costs program is administered by the SSHRC-hosted Canada Research Chairs secretariat on behalf of the three national research granting agencies.

Strategic Outcome

People: A first-class research capacity in the social sciences and humanities.

Program Activity Descriptions

Fellowships, scholarships and prizes

The Social Sciences and Humanities Research Council (SSHRC) offers several award programs for advanced study and research in the social sciences and humanities at the master's, doctoral and post-doctoral level. These programs help train Canada's researchers and the leaders of tomorrow. In addition, SSHRC offers special fellowships to experienced researchers and supplementary awards to outstanding doctoral and postdoctoral fellowship recipients. Finally, two commemorative prizes recognize the extraordinary dedication and creativity of Canada's best researchers.

Research chairs

Chairs program support faculty positions within post-secondary and research institutions by providing funding for salaries and research activities. Chairs programs serve to attract the best and most productive re-

searchers to Canada, and to retain those already here. In turn, these top researchers attract and support the best and most promising new scholars and graduate students. Ultimately this helps to cultivate centres of world-class research excellence at Canadian universities, and to brand Canada as a top destination for research.

Strategic Outcome

Research: New knowledge based on excellent research in the social sciences and humanities.

Program Activity Descriptions

Investigator-framed research (theme area and subject defined by researcher(s))

SSHRC research grants support individual and team projects and programs of research for which the applicant(s) proposes/propose the research topic and methodology. These range from individuals or small groups working in libraries and archives to large, multi-disciplinary, collaborative projects with researchers, partners and assistants conducting fieldwork across the country.

Strategic research development

Strategic grants through programs in this program activity are available to faculty, post-secondary institutions, scholarly associations and non-profit organizations to explore, develop and define new perspectives, challenges, and priorities in conducting research, in disseminating research results, and in training new researchers. Strategic research development programs also help develop related research capacity through the promotion of new modes of research collaboration and partnerships.

Targeted research and training initiatives

SSHRC develops and funds programs to support strategic research programs, both on its own and in partnership with other fund providers, including government,

private and community organizations. These programs generate new knowledge on pressing social, economic and cultural issues of particular importance to Canadians. One particular stream of strategic programs supports research that will contribute to better understanding of the impacts of the knowledge-based economy on Canada's economic, social, political and cultural life, and will help to improve Canadians' ability to influence the future for the common good.

Strategic Outcome

Knowledge mobilization: Facilitating the use of social sciences and humanities knowledge within and beyond academia.

Program Activity Descriptions

Research networking

This sub-activity supports interactions between researchers within and across disciplines and among Canadian and international scholars. Through grants to researchers and research institutions, it supports the organization of events at which researchers meet to discuss, compare and plan research activities. These grants do not directly support research projects; rather, they fund a critical aspect of the broader research enterprise that facilitates the sharing of research results, the development of new, innovative and productive research, and the strengthening of connections among members of the research community.

Research dissemination and knowledge translation

This program activity supports the effective dissemination of social sciences and humanities research results, both within and beyond academia. Through grants to researchers and research institutions, it helps to ensure that research results are accessible to potential users, through both dissemination and engagement activities. Accessibility includes both the availability of research results to a range of audiences through publications (research publishing), as well as the tailoring of research

results to the needs of potential users (knowledge translation).

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Standards Council of Canada

Strategic Outcome

Canada has an effective and efficient National Standards System.

Program Activity Descriptions

Standards program

The Standards Council of Canada (SCC) accredits standards development organizations in Canada. The SCC determines conformity to accreditation requirements by performing oversight activities such as document review and on-site assessment. SCC also reviews standards submitted by standards development organizations for approval as National Standards of Canada (NSCs), a designation that indicates a standard is the official Canadian standard on a particular subject. NSCs may be developed in Canada or adopted, with or without changes, from international standards. Through its member program, SCC facilitates and coordinates Canadian participation in national, regional and international standards development and conformity assessment organizations. Through this program activity, SCC recruits individuals and organizations to participate in standards activities on Canada's behalf, in organizations such as: the International Organization for Standardization (ISO) and the International

Electrotechnical Commission (IEC), two of the world's largest voluntary standardization bodies. SCC also provides orientation, training and recognition for Canadian participants. Participation in these organizations provides Canadian government, industry and consumers with a competitive advantage.

Standards and conformity assessment policy

The Standards Council of Canada (SCC) advises federal, provincial and territorial governments, industry organizations, and non-governmental bodies on standards and conformity assessment-related aspects of trade and regulatory policy. Through input and review of standardization issues in trade agreements, the SCC, is a significant contributor to expanding international trade for Canada. Incorporating standardization practices into regulatory policy provides an added measure of protection for the health and safety of Canadians. SCC offers governments, businesses and consumers the latest and most comprehensive information on standards, technical regulations and conformity assessment in Canada and around the world through its Web site, Information and Research Service and Technical Document Centre. As the World Trade Organization North American Free Trade Agreement (WTO NAFTA) /Enquiry Point, SCC serves as the central point of contact in Canada for WTO member countries to obtain information on standardization-related market entry requirements.

Conformity assessment program

Through its conformity assessment program, the Standards Council of Canada (SCC) provides accreditation services for: testing and calibration laboratories; management systems certification bodies; personnel certification bodies; product and service certification bodies; greenhouse gas validation and verification bodies; and inspection bodies. Through assessments, audits and follow-up visits, SCC ensures that these conformity assessment organizations are competent in meeting the requirements of a particular standard, for a product, service or system. Accreditation by SCC can

increase an organization's competitiveness and ensure safer and more efficient methods and products are used in the Canadian marketplace. SCC's accreditation programs are based on internationally recognized guides and standards. SCC is also a member of several organizations that are developing agreements to ensure conformity assessment results are accepted internationally.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Statistics Canada

Strategic Outcome

Canadians have access to timely, relevant and quality statistical information on Canada's changing economy and society for informed debate, research and decision making on social and economic issues.

Program Activity Descriptions

Census, demography and aboriginal statistics

The program's purpose is to provide statistical information, analyses and services that measure changes in the Canadian population, its demographic characteristics and its conditions, and its agricultural sector, as well as the well-being of aboriginal peoples, in order to serve as a basis for public and private decision making, research and analysis in areas of concern to the people of Canada. The program includes the censuses of population and agriculture. The census of population provides detailed information on population sub-groups and for small geographical levels required to assess the

effects of specifically targeted policy initiatives and serves as a foundation for other statistical surveys. It also provides population estimates, projection and in-depth information on special populations, such as operators of agriculture holdings and Aboriginal Peoples. Population counts and estimates are used in determining electoral boundaries, distribution of federal transfer payments, and the transfer and allocation of funds among regional and municipal governments, school boards and other locally based agencies within provinces. It meets statistical requirements specified constitutionally, and supports those in statutory requirements and regulatory instruments. All per capita measures in fiscal policies and arrangements and other economic analysis, and in program and service planning, come from this program's statistical information. Statistics produced range from demographic, social and economic conditions of the population, annual and quarterly estimates of the population, households and families and their projections to number and types of farms and farm operators, and the socio-economic conditions and well-being of Aboriginal Peoples.

Economic statistics

The Economic statistics program's purpose is to create a trusted, relevant and comprehensive source of information on the entire spectrum of Canada's economy in order to: inform public debate on economic issues; support economic policy development, implementation and evaluation; and guide business decision making. It is the primary source of information for developing the country's fiscal and monetary policies and for studying the economic evolution of Canadian industries and of regions. The information provides for informed public debate on current economic issues of concern and interest. The outputs are vital to research and to economic policy development, implementation and evaluation by a number of federal departments, such as the Bank of Canada, Finance Canada, Industry Canada, Foreign Affairs and International Trade, and Transport Canada, as well as by provincial and territorial governments;

and they are extensively used by the private sector for business planning and decision making. The programs' data also support statutory requirements and regulatory instruments. Statistics produced range from gross domestic product, production, costs, sales, productivity and prices for industrial sectors to the flows and stocks of fixed and financial capital assets, international trade and finance, and the extent of foreign ownership in Canada's economy.

Social statistics

The Social statistics program's purpose is to provide integrated information and relevant analysis on the social and socio-economic characteristics of individuals. families and households and on the major factors that affect their well-being in order to: inform public debate on socio-economic issues; support social policy development, implementation and evaluation; and guide public and private decision making. It is the primary source for assessing the impact of changing economic circumstances on Canadians. Federal departments such as Human Resources and Skill Development Canada, Industry Canada, Justice Canada, Citizenship and Immigration Canada, Canadian Heritage, Indian and Northern Affairs Canada, Transport Canada and Infrastructure Canada, as well as provincial governments extensively use its information to evaluate and cost economic and social policy options and alternatives. Objective statistical information is essential in an open and democratic society and this information allows Canadians to participate knowledgeably in debates on topics of interest to them. It supports statistical requirements specified by legislation or regulations such as in areas of labour, immigration and employment equity. The program also provides information, analysis and measures on publicly funded facilities, agencies and systems designed to meet the socio-economic and physical needs of Canadians, on the characteristics of the individual Canadians and families they serve, and on the outcomes of the services they provide, such as justice, health, and education, as well as on cultural institutions and industries.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Department

Strategic Outcome

A fair, relevant and accessible justice system that reflects Canadian values.

Program Activity Descriptions

Justice policies, laws and programs

Under Canada's federal system, the administration of justice is an area of shared jurisdiction between the federal government and the provinces. Through this program activity, the Department fulfils its constitutional responsibility to ensure a bilingual and bijural national legal framework for the administration of justice by developing policies and laws and testing innovative approaches to strengthen the framework within the following domains: criminal law, youth criminal justice, sentencing, marriage and divorce, access to justice and Aboriginal justice. Through this program activity, the Department also provides significant ongoing funding to provinces and territories in support

of their constitutional responsibility for the day to day administration of justice.

Office of the federal ombudsman for victims of crime

This program activity raises awareness of the needs and concerns of victims in areas of federal responsibility, provides an independent resource that addresses complaints of victims about compliance with the provisions of the *Corrections and Conditional Release Act* that apply to victims of offenders under federal supervision, and assists victims to access existing federal programs and services.

Strategic Outcome

A federal government that is supported by effective and responsive legal services.

Program Activity Descriptions

Services to government

As a common service provider, the Department of Justice provides an integrated suite of legal advisory, litigation and legislative services to departments and agencies to help them meet their policy and programming priorities and advance the overall objectives of the government. Through this program activity, the Department also provides legal services to the Justice Portfolio and supports the Minister as legal advisor to the Cabinet on complex, whole of government issues.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Canadian Human Rights Commission

Strategic Outcome

Equality, respect for human rights and protection from discrimination by fostering understanding of, and compliance with, the *Canadian Human Rights Act* and the *Employment Equity Act* by federally regulated employers and service providers, as well as the public whom they serve.

Program Activity Descriptions

Human rights dispute resolution program

This program addresses discrimination by dealing with individual and systemic complaints and issues brought by individuals or groups of individuals against federally regulated employers and service providers. The Commission exercises its discretion in choosing the most appropriate dispute resolution method including investigation, mediation and conciliation. The Commission also serves as a screening body in determining whether further inquiry is warranted, participates in all pre-tribunal mediations and represents the public interest in appearing before the Tribunal.

Discrimination prevention program

This program helps foster and sustain a human rights culture in federally regulated organizations by promoting continuous improvement of an organization's human rights competencies. Prevention initiatives, employment equity audits, learning programs and events are among the program's tools to prevent discrimination, and achieve employment equity objectives. Stakeholder engagement involves federal departments and agencies, Crown corporations, private sector organizations, provincial and territorial government bodies, international agencies, unions and other non-governmental organizations.

Human rights knowledge development and dissemination program

This program helps foster both an understanding of and compliance with the Canadian Human Rights Act and the Employment Equity Act. Knowledge development also ensures that programs, interventions, and decisions are grounded in evidence and best practices. Knowledge products include research, policies, regulatory instruments, and special reports. Information and/or advice are provided to the Commission itself, Parliament, federal departments and agencies, crown corporations, federally regulated private sector organizations, and the public. Partnerships with other human rights commissions as well as governmental, non-governmental, research organizations and international organizations are formed and maintained to leverage knowledge development and dissemination activities in areas of common interest.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services.

See introductory text.

Canadian Human Rights Tribunal

Strategic Outcome

Individuals have access, as determined by the *Canadian Human Rights Act* and the *Employment Equity Act*, to fair and equitable adjudication of human rights and employment equity cases that are brought before the Canadian Human Rights Tribunal.

Program Activity Descriptions

Hearings of complaints before the Tribunal

This program inquires into complaints of discrimination to decide, following a hearing before Tribunal members, if particular practices have contravened the *Canadian Human Rights Act*. Tribunal members also conduct hearings into applications from the Canadian Human Rights Commission (CHRC) and requests from employers in order to adjudicate on decisions and directions given by the CHRC under the *Employment Equity Act*.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Commissioner for Federal Judicial Affairs

Strategic Outcome

An independent and efficient federal judiciary.

Program Activity Descriptions

Payments pursuant to the Judges Act

Payments of salaries, allowance and annuities to federally appointed judges, and their survivors, in the superior courts and courts of appeal in Canada.

Federal judicial affairs

Provides other services to federally appointed judges including language training, editing of the federal

courts reports, and services to the Minister of Justice through the Judicial Appointments Secretariat.

Canadian Judicial Council

Administrative support to the various committees established by the Council which is made up of all of the Chief and Associate Chief Justices in Canada as well as the senior judges from the superior courts in Nunavut, Yukon and the Northwest Territories.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Courts Administration Service

Strategic Outcome

The public has timely and fair access, to the litigation processes of the Federal Court of Appeal, the Federal Court, the Court Martial Appeal Court of Canada and the Tax Court of Canada.

Program Activity Descriptions

Registry services

The Registry services processes legal documents and applications for judicial review under the jurisdiction of the Federal Court of Appeal, the Federal Court, the Court Martial Appeal Court of Canada and the Tax Court of Canada. It also ensures the proper court records management and adequate operation of the litigation and court access process.

Judicial services

Judicial services provides direct support to all the Justices through the efforts of judicial assistants, law clerks, jurilinguists, chauffeurs and court attendants, and library personnel. The services provided include research, documentation, revision, editing, and linguistic and terminological advice, the object of which is to assist the judges in preparing their judgments and reasons for judgment.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Office of the Director of Public Prosecutions

Strategic Outcome

Criminal and regulatory offences under federal law are prosecuted in an independent, impartial and fair manner.

Program Activity Descriptions

Drug, Criminal Code, and terrorism prosecution program

This program supports the protection of society against crime through the provision of legal advice and litigation support during police investigations, and the prosecution of: all drug offences under the *Controlled Drugs and Substances Act* and any related organized crime offences throughout Canada, except in Quebec and New Brunswick, where the Office of the Director of Public Prosecutions prosecutes such offences only

where charges are laid by the Royal Canadian Mounted Police; proceeds of crime offences; pursuant to understanding with the provinces, *Criminal Code* offences where they are related to drug charges; all *Criminal Code* offences in the three territories; terrorism offences; and war crimes and crimes against humanity offences. This program activity also involves the promotion of federal/provincial/territorial cooperation on criminal justice issues of mutual concern.

Regulatory offences and economic crime prosecution program

This program supports the protection of society against crime through the provision of legal advice and litigation support to federal investigative agencies, and the prosecution of: offences under federal statues aimed at protecting the environment and natural resources as well as the country's economic and social health (e.g., Fisheries Act, Income Tax Act, Copyright Act, Canada Elections Act, Canadian Environmental Protection Act, Competition Act, Customs Act, Excise Act, and the Excise Tax Act); offences involving fraud against the government; capital market fraud offences; and any organized crime offences related to the foregoing offences. This program also includes the recovery of outstanding federal fines and the promotion of federal/provincial/territorial cooperation on criminal justice issues of mutual concern.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Offices of the Information and Privacy Commissioners of Canada

Strategic Outcome

The privacy rights of individuals are protected.

Program Activity Descriptions

Compliance activities

The OPC is responsible for investigating privacy-related complaints and responding to inquiries from individuals and organizations. Through audits and reviews, the OPC also assesses how well organizations are complying with requirements set out in the two federal privacy laws, and provides recommendations on Privacy Impact Assessments (PIAs) pursuant to Treasury Board Secretariat policy. This activity is supported by a legal team that provides specialized legal advice and litigation support, and a research team with senior technical and risk-assessment support.

Research and policy development

The OPC serves as a centre of expertise on emerging privacy issues in Canada and abroad by researching trends and technological developments, monitoring legislative and regulatory initiatives, providing legal, policy and technical analyses on key issues, and developing policy positions that advance the protection of privacy rights. An important part of the work involves supporting the Commissioner and senior officials in providing advice to Parliament on potential privacy implications of proposed legislation, government programs, and private-sector initiatives.

Public outreach

The OPC delivers public education and communications activities, including speaking engagements and special events, media relations, and the production and dissemination of promotional and educational material. Through public outreach activities, individuals have access to information about privacy and personal data protection to enable them to protect themselves and exercise their rights. The activities also allow organizations to understand their obligations under federal privacy legislation.

Strategic Outcome

Individual's rights under the *Access to Information Act* are safeguarded.

Program Activity Descriptions

Compliance with access to information obligations

The Access to Information Act is the legislative authority for the oversight activities of the Information Commissioner, which are: to investigate complaints from individuals and corporations; to review the performance of government institutions; to report the results of investigations/reviews and recommendations to complainants, government institutions, and Parliament; to pursue judicial enforcement; and to provide advice to Parliament on access to information matters.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Supreme Court of Canada

Strategic Outcome

The administration of Canada's final court of appeal is effective and independent.

Program Activity Descriptions

Court Operations

In order to render decisions, the Court requires the support of the Office of the Registrar in the management of cases from the receipt of an application for leave to appeal to the release of the judgment on appeal. This support includes providing services to the litigants, reviewing applications for leave to appeal and preparing advice as to whether leave to appeal should be granted; preparing summaries of the leave applications; providing procedural advice; reviewing and summarizing factums where leave to appeal is granted; receiving, controlling and preserving all incoming documentation; tracking time period to ensure compliance with the Rules of the Supreme Court of Canada; recording proceedings on appeals; answering queries with regard to cases; editing and summarizing decisions of the Court; publishing decisions in the Supreme Court Reports, in accordance with the Supreme Court Act; and providing library services to support the legal research and information access needs of users within the Court and members of the legal community. The Supreme Court Act requires the Registrar to, under the direction of the Chief Justice, manage and control the library of the Court and the purchase of all books therefor.

Process Payments of Various Allowances to the Supreme Court Judges Pursuant to the Judges Act

The *Judges Act* is an Act respecting all federally appointed judges, and thereby applies to the judges of the Supreme Court of Canada. With respect to the Office of the Registrar of the *Judges Act* specifies the salaries of the Supreme Court judges, and prescribes other payments to be made to judges, namely allowances, removal, meeting, conference and seminars and annuities. The Office of the Registrar processes these payments as required in the *Judges Act*.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Department

Strategic Outcome

Resources are acquired to meet government defence expectations.

Program Activity Descriptions

Equipment acquisition and disposal

This program acquires and disposes of equipment required for Canadian Forces operations. This includes the acquisition of new and replacement capabilities or capital improvements to in-service equipment and their disposal at the end of their service life. Equipment acquisition occurs primarily through collaboration with Public Works and Government Services (PWGSC), Industry Canada (IC) and the vendors. Equipment acquisition activities include defining requirements, engineering design, sourcing, validation of requirements, developing procurement strategy, contracting, contract negotiation and award, contract administration and management, project management of equipment acquisitions.

Recruiting of personnel and initial training

This program will promote National Defence as a preferred workplace with the general public and to recruit new hires for a broad range of trades and other general, professional and scientific occupations. This involves deepening Defence's connections to the various educational and ethnic communities to attract the right number and mix of people who have the skills needed to contribute to meeting the Defence Mission. Engaging in effective leadership, strategic planning, and targeted outreach activities will ensure that proactive measures are taken to address the challenges arising from current labour market pressures for specific skill sets within certain geographic locations. The program will attract, select and enrol personnel and conduct initial training (basic recruit and occupational training) to military members to the Operational Functional Point. This ensures that sufficient personnel are recruited and trained with the needed skills in the appropriate occupation, now and into the future, to meet Defence requirements. This is accomplished through the provision of recruitment centres, recruitment campaigns, advertising and other outreach activities as well as the necessary training staff, facilities and associated supports.

Real property and informatics infrastructure acquisition and disposal

An extensive portfolio of land, works, buildings and informatics required to support the delivery of defence operations. The real property and informatics infrastructure acquisition and disposal program aims to ensure that the right real property and informatics is acquired and disposed of, and is available where and when needed, while providing value for money, advancing objectives for the greening of government land and buildings, and adhering to best practices for asset life-cycle management. Program activities include working with stakeholders to define requirements; updating the real property and informatics development and management plans; managing projects for new and replacement construction; and identifying and eliminating excess facilities.

Real property and informatics are acquired through construction and recapitalization, purchase or capital leases, and disposed of through deconstruction, sale or transfer. The activity includes the Capital assistance program (CAP) which is a capital contribution program under which Defence makes financial contributions to support the transfer of infrastructure facilities to provinces, territories, municipalities and/or their agencies. CAP projects support real property goals and objectives by encouraging cost-effective solutions for the provision of infrastructure on bases and wings across Canada.

Defence science and technology

This program provides the Government of Canada with critical scientific knowledge and innovation to address defence & security challenges and needs. The S&T program includes direction setting, program planning, program management, and capability management, execution and assessment. The program comprises multi-year projects with activities in research, technology development, analysis and experimentation applied to inform, enable and respond to Canada's defence and security priorities over multiple time horizons extending up to a 20-year outlook. The scientific knowledge and innovation generated from these activities informs decisions on Defence capability acquisitions, readiness preparation and the conduct of operations in response to Government priorities. Activities under this program draw on internal capability and make extensive use of partnerships with Canadian industry and academia as well as international organizations.

Strategic Outcome

National Defence is ready to meet Government defence expectations.

Program Activity Descriptions

Land readiness

This program provides Canada with a combat-capable, multi-purpose army. The program will generate and sustain relevant, responsive, combat capable land forces that are effective across the spectrum of conflict, from peacekeeping and nation building to war fighting. This is accomplished by bringing land forces to a state of readiness for operations, assembling and organizing land personnel, supplies, and materiel as well as the provision of individual and collective training to prepare land forces to defend Canadian interests domestically, continentally and internationally.

Joint and common readiness

This program will ensure Defence is ready to operate in a joint capacity, as directed by Government, to respond to domestic, continental and international requirements within the required response time. The program will generate and sustain forces for activities, operations and organisations in which elements of at least two services (e.g. Navy, Army, Air Force) participate. This is accomplished through the provision of training of a joint and common nature, the equipping of forces and the provision of their means to deploy in a joint capacity.

Maritime readiness

This program provides Canada with a combat-capable, multi-purpose Navy. The program will generate and sustain relevant, responsive, combat capable maritime forces that are able to respond to a spectrum of tasks, as may be directed by the Government, within the required response time. This is accomplished by bringing maritime forces to a state of readiness for operations, by assembling, and organizing maritime personnel, supplies, and materiel. This includes the training and equipping of forces and the provision of their means of deployment, sustainment and recovery to defend Canadian interests domestically, continentally and internationally.

Aerospace readiness

This program will provide Canada with a combat-capable, multi-purpose Air Force. The program will generate and sustain relevant, responsible, combat capable aerospace forces that are able to respond to the spectrum of tasks, as may be directed by the Government, within the required response time. This is accomplished by bringing aerospace forces to a state of readiness for operations, by assembling, and organizing aerospace personnel, supplies, and materiel. This includes the training and equipping of aerospace forces and the provision of their means of deployment, sustainment and recovery to defend Canadian interests domestically, continentally and internationally.

Strategic Outcome

Defence operations improve peace, stability and security wherever deployed.

Program Activity Descriptions

International peace, stability and security

This program will contribute to global peace and security by conducting global CF operations, across the spectrum from humanitarian assistance to combat, in concert with national and international partners, to achieve timely and decisive results in support of Canada's national interests. This is accomplished through the mobilization and deployment of forces internationally. Canadian expeditionary force command is the operational command responsible for all Canadian Forces (CF) international operations, with the exception of operations conducted solely by special operations forces elements.

Situational awareness

The government of Canada and Defence require an accurate and timely security picture and comprehensive situational awareness and threat knowledge for Canada and abroad. This program will provide credible, reliable and

sustained intelligence services to Defence in support of decision making and military operations, as well as, support to other government departments in the defence and security of Canada. Work activities include geospatial intelligence, imagery intelligence, signals intelligence, and counter intelligence. The program also ensures the acquisition and use of information from the global information infrastructure to provide foreign intelligence to support Government of Canada intelligence priorities. This is accomplished through the collection, dissemination and analysis of electronic information. The program will ensure the provision of advice, guidance and services to help protect electronic information and information infrastructures of importance to the Government of Canada as well as technical and operational assistance to federal law enforcement and security agencies in the performance of their lawful duties.

Canadian peace, stability and security

This program employs the Canadian Forces in the conduct of operations to ensure the safety and security of Canadians and the defence of Canada. These operations include protecting Canada's sovereignty, responding to domestic disasters or humanitarian crisis, supporting domestic security requirements, and conducting search and rescue activities. This is accomplished through the mobilization and deployment of forces within Canada. Canada Command is responsible for the conduct of all Canadian forces domestic operations – routine and contingency – and is the national operational authority for the defence of Canada.

Continental peace, stability and security

This program employs the Canadian forces in the conduct of operations, both independently and in conjunction with allies, for the defence of North America and its approaches. Activities under this program include continental operations as required in accordance with Government of Canada policy. This is accomplished through the mobilization and deployment of forces for

the defence of North America and its approaches. Canada Command is responsible for the conduct of all continental operations – routine and contingency – and is the national operational authority for the defence of North America and its approaches.

Strategic Outcome

Care and support to the Canadian Forces and contribution to Canadian society.

Program Activity Descriptions

Defence team personnel support

The defence team personnel support program will provide a broad spectrum of support services such as financial support for education and housing and facilities services, as well as, benefits to military personnel and their families. The program will also provide learning support to Defence civilians. This program is necessary as the provision of fair and equitable support is a key element of the social contract between the national and its military personnel that is essential to enhance personnel readiness and deployability, and establish the Canadian Forces as an employer of choice and learning institution.

Canadian identity

This program preserves and promotes Canadian identity by providing youth programs, ceremonial activities and the preservation of military history. The program is necessary to demonstrate the military heritage and proficiency of the Canadian Forces (CF) to Canadians and inform them of the military profession and practice in Canada. This is realized through initiatives such as ceremonial and band performances, CF museums, CF history and heritage books, web content and the Cadets.

Environment protection and stewardship

This program promotes public health and safety and supports sustainable development on Defence lands and wherever Defence operates. It delivers multi-faceted real property/infrastructure environmental protection and stewardship compliant with applicable legislation and federal policy that extends through every level of departmental decision-making.

Non-security support

Defence is strongly committed to contributing to Canadian society in non-operational roles. The program will provide supports to develop national competency in defence issues and to the whole of government approach by sharing information with other government departments and non-governmental organizations. This may include the provision of grants to researchers to generate knowledge related to defence issues or provide meteorological or mapping information to other government departments in the interest of information sharing on horizontal initiatives.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Canadian Forces Grievance Board

Strategic Outcome

The Chief of the Defence Staff and members of the Canadian Forces have access to a fair, independent and timely review of military grievances.

Program Activity Descriptions

Review Canadian Forces grievances

The Chief of the Defence Staff refers grievances as prescribed under Queen's Regulations and Orders for the Canadian Forces as well as every grievance concerning a decision or an act of the Chief of the Defence Staff in respect of a particular officer or non-commissioned member to the Board for its findings and recommendations. The Board conducts objective and transparent reviews of grievances with due respect to fairness and equity for each member of the Canadian Forces, regardless of rank or position. It ensures that the rights of military personnel are considered fairly throughout the process and that its Board Members act in the best interest of the parties concerned. The findings and recommendations it issues are not only based in law but form precedents that may facilitate change within the Canadian Forces. As an administrative tribunal designed to review grievances, the Board must ensure that its recommendations comply with the law and can be implemented in accordance with its enabling legislation, relevant human rights legislation and the Canadian Charter of Rights and Freedoms.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Communications Security Establishment Strategic Outcome

CSEC's foreign signals intelligence and technical security capabilities advance and protect Canada's vital interests.

Program Activity Descriptions

Situational Awareness

The government of Canada and Defence require an accurate and timely security picture and comprehensive situational awareness and threat knowledge for Canada and abroad. This program will provide credible, reliable and sustained intelligence services to Defence in support of decision making and military operations, as well as, support to other government departments in the defence and security of Canada. Work activities include geospatial intelligence, imagery intelligence, signals intelligence, and counter intelligence. The program also ensures the acquisition and use of information from the global information infrastructure to provide foreign intelligence to support Government of Canada intelligence priorities. This is accomplished through the collection, dissemination and analysis of electronic information. The program will ensure the provision of advice, guidance and services to help protect electronic information and information infrastructures of importance to the Government of Canada as well as technical and operational assistance to federal law enforcement and security agencies in the performance of their lawful duties.

Military Police Complaints Commission Strategic Outcome

Conduct complaints against the Military Police and interference complaints by the Military Police are resolved in a fair and timely manner and recommendations made are implemented by the Department of National Defence and/or the Canadian Forces.

Program Activity Descriptions

Complaints resolution

This program aims to successfully resolve complaints about the conduct of military police members as well as complaints of interference with military police investigations by overseeing and reviewing all complaints received. This program is necessary to help the military police to be as effective and as professional as possible in their policing duties and functions.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Office of the Communications Security Establishment Commissioner

Strategic Outcome

The Communications Security Establishment Canada performs its duties and functions in accordance with the laws of Canada and with due regard for the privacy of Canadians.

Program Activity Descriptions

The Communications Security Establishment Canada review program

The program activity provides independent review by the Office of the Communications Security Establishment Commissioner of the lawfulness of the activities of the Communications Security Establishment Canada. The core functions of this program consist in reviewing the Communications Security Establishment Canada's

activities to ensure they comply with the laws of Canada in general and, in particular, the Canadian Charter of Rights and Freedoms, the National Defence Act, the Criminal Code and the Privacy Act. If the commissioner believes that an activity of the Communications Security Establishment of Canada carried out under its foreign intelligence or its information technology security mandates may not be in compliance with the law, he/she is required to inform the Minister of National Defence and the Attorney General of Canada, accordingly. Through this program activity, and in response to any complaint filed by Canadian citizens and permanent residents of Canada, the commissioner may undertake any investigation that he/she considers necessary. In addition, the commissioner has a duty under the Security of Information Act to receive information from persons who are permanently bound to secrecy if they wish to claim a public interest defence for divulging classified information (referred to in the Act as special operational information) about the Communications Security Establishment Canada.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Department

Strategic Outcome

Natural resources sectors are internationally competitive, economically productive, and contribute to the social well-being of Canadians.

Program Activity Descriptions

Economic opportunities for natural resources

The program activity contains programs designed to promote innovation, investment, and the enhancement of the competitiveness of Canada's natural resources and related products industries through the provision of know-how and tools, including base geo-science information, along with trade promotion and market acceptance, at home and abroad. This group of programs also delivers policies, regulations and legislative work to manage federal responsibilities associated with Canada's oil and natural gas supply, protecting the critical energy infrastructure, and managing statutory program for the Atlantic offshore.

Natural resource-based communities

The program activity is targeted to increasing Canada's knowledge of the impacts of natural resource sector evolution on communities that have a substantial reliance on resource-based industries and to improve the capacity and knowledge for increasing the number of opportunities through value-added products and services. This group of programs is designed to improve the social well-being of Canadians. It is also about promoting Aboriginal and non-Aboriginal participation, improving skills, capacity and community stability through, for example, the Forest community program, the First Nations forestry program, and the Mines Ministers federal/provincial and territorial framework for action.

Strategic Outcome

Canada is a world leader on environmental responsibility in the development and use of natural resources.

Program Activity Descriptions

Clean energy

The program activity includes the development and delivery of energy science and technology, policies, programs, legislation and regulations to mitigate air emissions and to reduce other environmental impacts associated with energy production and use. One of the major programs includes the suite of initiatives on clean energy announced under the banner of ecoENERGY, which is intended to increase production of low impact renewable energy; encourage and assist Canadians to improve their energy use in all of the major end-use sectors; and to accelerate the development and market readiness of technology solutions to reduce environmental impacts associated with the production and use of energy.

Ecosystem risk management

The program activity includes programs that help to understand the risks to our environment and the protection of critical resources such as groundwater. A major initiative is the federal response to the mountain pine beetle (MPB) infestation which aims to mitigate the spread of the MPB that threatens Canada's boreal forest.

Strategic Outcome

Natural resources knowledge, landmass knowledge and management systems strengthen the safety and security of Canadians and the stewardship of Canada's natural resources and lands.

Program Activity Descriptions

Natural resources and landmass knowledge and systems

The program activity carries out the Minister's obligation to provide a property rights infrastructure on all lands for which the department has this responsibility, along with the provision and access to accurate and precise geographic information on the Canadian landmass. This program also provides relevant, accurate, timely and accessible knowledge with a view to increasing collaborative efforts with other jurisdictions in key areas (i.e., regulatory efficiency) to generate improved approaches to shared issues and lead to significant benefits to advance the interests of natural resources sector both domestically and at the international level.

Adapting to a changing climate and hazard risk management

The program activity provides geoscience and geospatial information that contributes to the reduction of risks from natural hazards, such as earthquakes, tsunamis and flood, as well as hazards arising from human

activities, and works with front-line responders to provide geographical information in the event of an emergency. The program activity also provides information that will help Canadians mitigate and adapt to the effects of a changing climate.

Geomatics Canada Revolving Fund

The Geomatics Canada Revolving Fund was established under Appropriation Act No. 3 in 1993-94. The fund allows Geomatics Canada to shift the costs from taxpayers at large to specific users who benefit directly from the goods and services provided. This revenue retention mechanism gives Geomatics Canada the ability to recover full costs from Canadian customers and the freedom to charge market prices for international clients. It presents the opportunity to provide an increasing volume of products and services in response to the needs of Canadian clients as well as supporting the Canadian geomatics industry through the knowledge and expertise necessary to be competitive in the international market. As part of the Revolving Fund, NRCan produces accurate aeronautical charts and publications for NavCanada as an essential contribution to the safety and security of the traveling public and Canadians.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Atomic Energy of Canada Limited

Strategic Outcome

Be the top worldwide nuclear products and services company. Protect the health and safety of the public, our employees and the environment. Minimize nuclear legacy obligations for future generations.

Program Activity Descriptions

Facilities and nuclear operations

This program activity supports the operations of Atomic Energy of Canada Limited (AECL) and requires major facilities such as reactors, experimental loops, hot cells and waste management plants.

Research and development

Research and development undertaken to maintain and enhance Canada's scientific and technological expertise in support of the production of environmentally friendly and cost effective CANDU nuclear generated electricity as well as other important peaceful applications of nuclear technologies in areas such as medicine. In particular it involves the maintenance of the intellectual property that has been developed over a period of sixty years covering basic knowledge of: materials, reactor physics, chemistry, critical components, radiation, and the environment; that could have an impact on the safety, licensing and design basis of CANDU technology.

Canadian Nuclear Safety Commission

Strategic Outcome

Safe and secure nuclear installations and processes used solely for peaceful purposes and public confidence in the nuclear regulatory regime's effectiveness.

Program Activity Descriptions

Compliance program

The compliance program is in place to ensure that CNSC licensees exhibit a high level of compliance with the CNCS's regulatory framework. This program enables the CNCS to provide regulatory assurance to Canadians of the continuing compliance and safety performance of licensees.

This program activity's funding is used for the promotion of compliance, safety culture and common safety values, compliance audits, inspections, and enforcement actions.

Licensing and certification program

The licensing and certification program is in place to issue licenses or certify persons or organizations to conduct nuclear-related activities in Canada.

With this program activity's funding, the CNSC obtains evidence of applicant licensees' ability to operate safely and comply with all regulatory requirements, including nuclear safeguards and non-proliferation.

The CNSC undertakes this work to obtain assurance that nuclear activities and facilities in Canada are conducted with adequate provision for protection of health, safety, security and the environment and the fulfillment of commitments to the peaceful use of nuclear energy.

Regulatory framework program

The Regulatory framework program is in place to ensure that Canadians in general, and licensees in particular, have a clear and pragmatic regulatory framework for the nuclear industry in Canada.

Funds are used to develop and make amendments to the *Nuclear and Safety Control Act*, regulations under the Act, regulatory and guidance documents, the Safeguards Agreement and Additional Protocol between

Canada and the International Atomic Energy Agency, and Canada's bilateral Nuclear Cooperation Agreements to provide the basis for regulating the nuclear industry in order to protect the health, safety, security of Canadians and the environment, and to implement Canada's international commitments on the peaceful use of nuclear energy.

The CNSC also administers the *Nuclear Liability Act* and, as a responsible authority under the *Canadian Environmental Assessment Act*, carries out environmental assessments for nuclear projects in accordance with this legislation.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

National Energy Board

Strategic Outcome

Safe and secure pipelines and power lines built and operated in a manner that protects the environment and enables efficient energy markets.

Program Activity Descriptions

Energy regulation program

This program provides the Canadian public, project proponents and other government agencies with regulation of international and designated interprovincial power lines; construction, operations, and tolls and tariffs on international and interprovincial pipelines; energy trade; and exploration and development in certain frontier and offshore areas. The companies that are regulated by the Board create wealth for Canadians through the transport of oil, natural gas and natural gas liquids, and through the export of hydrocarbons and electricity. As a regulatory agency, the Board's role is to help create a framework which allows these economic activities to occur when they are in the public interest. The public interest is inclusive of all Canadians and refers to a balance of economic, environmental and social interests that change as society's values and preferences evolve over time.

Energy information program

The program provides the Board, industry, policy makers, and the Canadian public with energy industry and market surveillance, including the outlook for supply and demand of energy commodities in Canada, to assist in decision making regarding energy infrastructure and markets. This program meets requirements under Part II of the *National Energy Board Act* by informing Canadians on energy market developments and issues related to the Board's regulatory mandate, which are primarily in the gas, oil and electricity market sectors, and under Part VI of the *National Energy Board Act* by providing market analysis to determine whether Canadians are able to access energy at fair market prices.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Northern Pipeline Agency

Strategic Outcome

The planning and construction of the Canadian portion of the Alaska highway gas pipeline project is efficient and expeditious while ensuring environmental protection and social and economic benefits for Canadians.

Program Activity Descriptions

Oversee the planning and construction of the canadian portion of the Alaska highway gas pipeline

Regulate the planning and construction of the canadian portion of the Alaska highway gas pipeline.

Program Activity Descriptions

Internal services

See introductory text.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

The Senate

Strategic Outcome

To enable the Senate to carry out its constitutional role and to administer the affairs of the Senate.

Program Activity Descriptions

Senators and their offices

Provides Senators with the statutory services set out in the *Parliament of Canada Act* and the *Members of Parliament Retiring Allowances Act*. Operating costs of Senators' offices are provided in accordance with established policies and guidelines. Costs included under these two categories are: Senators' sessional indemnities and allowances as well as contributions to the Senators' pension plan; retiring allowances; travel and communication expenses; Senators' research and office expenses, including staff costs and the cost of goods and services incurred for the operations of Senators' offices; and Caucus research funds.

Administrative support

Provide the on-going support services required for the effective, efficient and economical delivery of operating programs outlined under the other three program activity of the Senate. Administrative support provides accommodation and other facilities and tools, information, goods and services, and expert advice on all aspects of operations. Costs included in this program activity are: financial services and materiel management; human resources; protective services; communications and information services; information technology management; accommodation planning, maintenance and upkeep of premises; postal, messenger and printing services; and repairs, trades and transportation services.

Committees and associations

Provide support for the work of Senators on standing, special and joint committees. Committees are delegated the task of conducting in-depth studies of bills and approving or amending legislation based on testimony from expert witnesses and advice and counsel from legal experts. They investigate policy matters and make recommendations as well as examine the Government's spending proposals. Senators also participate in parliamentary associations and friendship groups, representing Canada in international forums where issues of importance to Canadians are discussed. Costs included under this program activity are: committees and parliamentary associations; reporting of debates and publications service; and broadcasting committee proceedings.

Chamber operations

Provide the support and services Senators require for their work in the Senate Chamber, which includes debate and approval of legislation, presentation of petitions, discussion of Committee reports and ceremonial events. These functions are carried out in accordance with the Rules of the Senate, parliamentary procedure and precedents and the Speaker's rulings. Costs included under this program activity are: salaries for additional duties of the Officers of the Senate; staff costs and the costs of operating the offices of Officers of the Senate; salaries and other operating expenses of the Clerk of the Senate, Deputy Clerk, Parliamentary Counsel and Usher of the Black Rod; journals, reporting of debates and publications service in both official languages; Senate Pages; and parliamentary exchanges.

House of Commons

Strategic Outcome

Effective administrative and professional support of Members, both individually and collectively, in their roles as legislators and representatives of 308 constituencies, in the Chamber, in committee and in Caucus.

Program Activity Descriptions

Members and House officers

Members assume the roles of legislators and elected representatives of their constituency. In their constituencies. Members participate in events and activities and discuss with constituents about their concerns. In the Chamber, Members participate in debates, study and vote on legislation. Members sit on standing committees and special or joint committees, since the House of Commons delegates in-depth consideration of bills and the thorough scrutiny of the Government's programs and policies to its committees. Members also participate in parliamentary associations and interparliamentary groups, and are members of delegations in parliamentary exchanges. Finally, in caucus, Members develop strategy, discuss policy and examine important issues with fellow party members, and direct the work of party research offices. Some Members also assume additional functions such as: the Speaker, Deputy Speaker, House Leaders and Chief Whips.

House administration

House employees are responsible for providing services to the Members elected during a Parliament, and in addition, serve the House as an institution on a permanent basis by providing: continuity from one Parliament to another; access to parliamentary records; and a stable infrastructure to support Members in the democratic process. Advice and support are provided in a wide variety of services such as: procedural, legislative, legal, information technology and management, building management, security, food, finance, human resources, health and safety. The staff of the House of Commons strives to support the institution and the members in their roles as legislators and representatives of 308 constituencies, in the Chamber, in committee and in Caucus.

Library of Parliament

Strategic Outcome

An informed and accessible Parliament.

Program Activity Descriptions

Information support for Parliament

This program activity provides parliamentarians with information, documentation, research and analysis services to help them fulfil their roles as legislators and representatives and to support them in their efforts to make Parliament and information about Parliament accessible to the public.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Office of the Conflict of Interest and Ethics Commissioner

Strategic Outcome

The public can feel confident that public office holders and MPs are meeting the requirements of the conflict of interest compliance measures.

Program Activity Descriptions

Administration of the Conflict of Interest Act and the Conflict of Interest Code for Members of the House of Commons

The Commissioner provides confidential advice to Public Office Holders (POHs) and MPs about how to comply with the *Conflict of Interest Act* and the MP's Code respectively. She is also mandated to provide confidential advice to the Prime Minister about conflict of interest and ethics issues. The Commissioner may conduct an inquiry into whether a MP has contravened the Code or a present or former POH has breached the Act. This program activity benefits Canadians by minimizing the possibility of conflicts arising between the private interests and public duties of POHs and MPs and provide for the resolution of those conflicts in the public interest should they arise.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Senate Ethics Officer

Strategic Outcome

Senators meet their obligations under the Conflict of Interest Code in a manner that contributes to the integrity of the Senate as an institution.

Program Activity Descriptions

Administration

The mandate of the Senate Ethics Officer is to administer and interpret the Code for Senators that sets out standards of conduct for Members of the Senate. The primary functions of the Senate Ethics Officer are: to provide confidential opinions and advice on any matter respecting Senators' obligations under the Code; to review confidential annual disclosure statements (listing sources of income, assets, liabilities, government contracts, financial and other interests), advise Senators on possible conflicts and compliance measures, and prepare public disclosure summaries; to conduct inquiries and investigations, if necessary, regarding compliance with the Code.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Department

Strategic Outcome

The Government's agenda and decision making are supported and implemented and the institutions of government are supported and maintained.

Program Activity Descriptions

Prime Minister and portfolio ministers support and advice

The Privy Council Office (PCO) supports the Prime Minister in carrying out his unique responsibilities as Head of Government. PCO provides professional and non-partisan advice to the Prime Minister on policies, democratic reform, legislation and parliamentary issues facing the Government; appointments; and machinery of government issues. PCO, as appropriate, consults with stakeholders, conducts research, and performs a challenge function. PCO also supports Ministers in the Prime Minister's portfolio. PMO and the offices of the Portfolio Ministers have budgets to carry out their operations.

Cabinet and Cabinet committees' advice and support

To ensure the smooth functioning of Cabinet decision making, PCO provides policy advice and secretariat support to the Cabinet and Cabinet committees by preparing briefing material and distributing agendas and cabinet document. It facilitates integration across the federal community in support of the implementation of the Government's agenda by departments and agencies. PCO engages in consultation with departments and agencies, provides a challenge function during the policy development process and researches issues. PCO also ensures that proposals take into account issues related to implementation, communications, parliamentary affairs and federal-provincial-territorial relations.

Public Service leadership and direction

PCO sets strategic direction for the Public Service to foster a high-performing and accountable Public Service that has the talent, leadership capacity, and management frameworks to provide advice on and implement the Government's agenda, it also plays a key role in the management development and succession planning for senior leaders in the Public Service.

Commissions of inquiry

The Commissions of inquiry have budgets to carry out their operations. Additionally, PCO provides financial and administrative support as well as a broad range of expertise to assist commissions of inquiry in fulfilling their mandates.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Canadian Intergovernmental Conference Secretariat

Strategic Outcome

Multilateral meetings of First Ministers, Ministers and Deputy Ministers are planned and conducted flawlessly.

Program Activity Descriptions

Conference services

Provision of expert, impartial support services for the planning and conduct of First Ministers, Ministers and Deputy Ministers level of federal-provincial-territorial and provincial-territorial conferences.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Canadian Transportation Accident Investigation and Safety Board

Strategic Outcome

The mitigation of risks to the safety of the transportation system through independent accident investigations.

Program Activity Descriptions

Air investigations

Conduct independent investigations into occurrences in the federally regulated elements of the air transportation system to identify causes and contributing factors, publish investigation reports, formulate recommendations to improve safety, communicate safety information to stakeholders, undertake outreach activities with key change agents, as well as assess and follow-up on responses to recommendations. This includes the execution of specialized work in the fields of: engineering, macro analysis, human performance, legal services, communications, quality assurance, as well as publishing and linguistic services.

Marine investigations

Conduct independent investigations into occurrences in the federally regulated elements of the marine transportation system to identify causes and contributing factors, publish investigation reports, formulate recommendations to improve safety, communicate safety information to stakeholders, undertake outreach activities with key change agents, as well as assess and follow-up on responses to recommendations. This includes the execution of specialized work in the fields of: engineering, macro analysis, human performance, legal services, communications, quality assurance, as well as publishing and linguistic services.

Rail investigations

Conduct independent investigations into occurrences in the federally regulated elements of the rail transportation system to identify causes and contributing factors, publish investigation reports, formulate recommendations to improve safety, communicate safety information to stakeholders, undertake outreach activities with key change agents, as well as assess and follow-up on responses to recommendations. This includes the execution of specialized work in the fields of: engineering, macro analysis, human performance, legal services, communications, quality assurance, as well as publishing and linguistic services.

Pipeline investigations

Conduct independent investigations into occurrences in the federally regulated elements of the pipeline transportation system to identify causes and contributing factors, publish investigation reports, formulate recommendations to improve safety, communicate safety information to stakeholders, undertake outreach activities with key change agents, as well as assess and follow-up on responses to recommendations. This includes the execution of specialized work in the fields of: engineering, macro analysis, human performance, legal services, communications, quality assurance, as well as publishing and linguistic services.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Chief Electoral Officer

Strategic Outcome

An accessible electoral framework that Canadians trust and use.

Program Activity Descriptions

Regulation of electoral activities

This program activity provides Canadians with an electoral process that is fair, transparent and in compliance with the *Canada Elections Act*. Within this program activity, Elections Canada is responsible for administering the political financing provisions of the Act. This includes monitoring compliance, disclosure and reporting of financial activities, and enforcing electoral legislation.

Electoral operations

This program activity allows Elections Canada to deliver fair and efficient electoral events whenever they may be required so that Canadians are able to exercise their democratic right to vote during a federal general election, by-election or referendum by providing an accessible and constantly improved electoral process responsive to the needs of electors.

Electoral engagement

This program activity promotes and sustains the Canadian electoral process. It provides Canadians with electoral education and information programs so that they can make informed decisions about their engagement in the electoral process. It also aims to improve the electoral framework by consulting and sharing electoral practices with other stakeholders.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Office of the Commissioner of Official Languages

Strategic Outcome

Canadians' right under the *Official Languages Act* are protected and are respected by federal institutions and other organizations subject to the Act; and linguistic duality is promoted in Canadian society.

Program Activity Descriptions

Promotion of linguistic duality

Through this program activity, the Office of the Commissioner of Official Languages (OCOL) works with Parliamentarians, federal institutions and other organizations subject to the *Official Languages Act*, official language communities and the Canadian public in promoting linguistic duality. OCOL builds links between federal institutions, official language communities and the different levels of government to help them better understand the needs of official language communities, the importance of bilingualism and the value of respecting Canada's linguistic duality. To fulfill its promotion role, OCOL conducts research, studies and public awareness activities as well as intervenes with senior federal officials so that they instill a change in culture to fully integrate linguistic duality in their organizations.

Protection of linguistic rights

Through this program activity, the Office of the Commissioner of Official Languages (OCOL) investigates complaints filed by citizens who believe their language rights have not been respected, evaluates compliance with the *Official Languages Act* by federal institutions and other organizations subject to the Act through performance measurements and audits, and intervenes proactively to prevent non-compliance with the Act. As well, the Office may intervene before the courts in cases that deal with non-compliance to the *Official Languages Act*.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Public Appointments Commission Secretariat

Strategic Outcome

To ensure fair and competency-based processes are in place for the recruitment and selection of qualified individuals for Governor-in-Council appointments across agencies, boards, commissions and Crown Corporations.

Program Activity Descriptions

Oversight of the Governor-in-Council appointments

This covers the activities relating to and including support to develop and establish a code of practice for appointments by the Governor in Council and ministers to agencies, boards, commissions and Crown corporations; oversee, review and report on the selection process for appointments and reappointments by the Governor in Council to agencies, boards, commissions and Crown corporations, and to ensure that every such process is widely made public and conducted in a fair, open and transparent manner and that the appointments are based on merit; evaluate and approve the selection processes proposed by ministers to fill vacancies and determine reappointments within their portfolios, monitor and review those processes and ensure that they are implemented as approved; audit appointment policies and practices in order to determine whether the code of practice is being observed; report publicly on compliance with the code of practice; and provide public education and training of public servants involved in appointments and reappointments processes regarding the code of practice.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Security Intelligence Review Committee

Strategic Outcome

The Canadian Security Intelligence Service (CSIS) carries out its mandate to investigate and report on threats to national security in a manner that respects the rule of law and the rights of Canadians.

Program Activity Descriptions

Reviews

Conduct reviews of CSIS's duties and functions to examine questions of appropriateness, adequacy and effectiveness and ensure that CSIS is acting lawfully. Develop research plans to identify reviews to be conducted throughout the year. Through a comprehensive and multifaceted program of research, examine various aspects of CSIS's operations and activities to prepare a retrospective analysis for the Committee's approval. Each review assesses CSIS's performance and may include findings and non-binding recommendations. These reviews are submitted to the Director of CSIS, the Inspector General, CSIS and in special circumstances, the Minister of Public Safety. A declassified summary is included in the Security Intelligence Review Committee's Annual Report. The objective is to provide Parliament and Canadians with "snapshots" of past CSIS operations which over time, provide a comprehensive picture of CSIS's performance.

Complaints

Receive and inquire into complaints about CSIS brought by individuals or groups, as an independent, quasi-judicial administrative tribunal. Complaints may concern an "act or thing" done by CSIS; denials of security clearances; referrals from the Canadian Human Rights Commission; Minister's reports with the respect to the *Citizenship Act*; and complaints concerning an act or thing done by CSIS in relation to Transport Canada's Passenger protect program and Marine

transportation security clearance program. After accepting jurisdiction, the Committee conducts pre-hearing conferences, presides over complaints hearings and prepares complaints reports which include findings and non-binding recommendations. These reports are submitted to the Minister of Public Safety, the Director of CSIS and a vetted version is provided to the complainant. A declassified summary is included in the Security Intelligence Review Committee's Annual Report. The Committee's decisions are intended to provide a fair and timely resolution of complaints and are subject to judicial review by the Federal Court of Canada.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Department

Strategic Outcome

A safe and resilient Canada.

Program Activity Descriptions

Countering crime

Crime continues to be a significant preoccupation among Canadians and they recognize the importance of the federal government's role in responding to crime issues across the country. The Countering crime program activity provides federal policy leadership, coordination and program support on a continuum of activities related to the prevention of crime, the enforcement of law, and the rehabilitation of those who have committed criminal offences. The intent of this program activity is to reduce the likelihood of criminality working in close collaboration with partners in the provinces and territories to design and deliver programs that are specific and appropriate to regions and communities.

Emergency management

Without an all-hazards emergency management program. Canadians would be more vulnerable to a range of threats and disasters, and federal/provincial/territorial governments would be unable to plan for, and respond to, emergencies in a coordinated and systemic manner. Public Safety Canada works to protect Canada and Canadians by providing national leadership and setting a clear direction for emergency management and critical infrastructure protection for the Government of Canada as stipulated in the *Emergency* Management Act of 2007. This is achieved through emergency management policy and planning, provision of training and exercises and research activities that support a unified emergency management system. The Department develops and maintains the federal government's capacity to manage emergencies, monitors and coordinates the federal response and provides support to provinces and territories when federal assistance is needed. The Department also promotes public awareness of emergency management to Canadians and businesses directly. Working closely with international counterparts, federal departments, provinces, territories, the first responder community and industry to address all hazards (natural, technological and human induced), this program aims to foster a safe and resilient Canada through policy and program coordination across the four pillars of emergency management: prevention/mitigation, preparedness, response and recovery.

National security

The National security program at Public Safety Canada exists to ensure Canada is prepared for and can respond to a range of national security threats. The threat environment faced by Canadians is becoming increasingly complex, underlining the relevance of this program for the security of Canadians. The National security program undertakes to coordinate the efforts of the Public Safety Portfolio and broader government departments and agencies on matters relevant to national security. In

order to achieve this, the program works cooperatively with operational and policy partners to provide the Government with strategic advice on rapidly evolving and often sensitive issues. This advice complements the advice from Portfolio agencies that have operational expertise in such areas as intelligence collection and analysis, investigations or border control. The National security program also assists the Minister and Deputy Minister in fulfilling key statutory obligations, coordinates, analyses and develops policy on complex issues, including the listing and delisting of terrorist entities, radicalization leading to violence, the proliferation of weapons of mass destruction, and seeks to identify and close the gaps in Canada's ability to deal with national security related threats. Because of their complexity, importance, and potential impact on individual rights, national security legislation, programs and policies must be well founded, well governed, and well executed; this program plays a central role in supporting decision makers in achieving this goal on behalf of Canadians.

Border strategies

The Border strategies program at Public Safety Canada provides federal policy leadership, coordination and coherence on a variety of border issues such as customs, immigration, and cross-border law enforcement in order to ensure that security objectives are achieved in a manner that facilitates the flow of legitimate trade and travel and reduces security related risks. The intent of this program is to promote the safety and economic well being of Canadians through supporting secure and efficient management of Canada's borders. This program also advances critical infrastructure objectives through effective coordination among federal departments and agencies and partnerships with industry sectors. In order to achieve this result, the program develops and supports a focused border management agenda, leads ongoing dialogue between Canada and the United States on strategic and operational border policy issues, implements cross-border arrangements relating to the movement of goods and people during emergencies, and provides policy advice, leadership and horizontal coordination to Public Safety Portfolio agencies and other federal departments regarding border issues. This program plays a central role in supporting the Government in making fully informed decisions concerning border policy, border management and cross-border law enforcement for the benefit of Canadians.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Canada Border Services Agency

Strategic Outcome

International trade and travel is facilitated across Canada's border and Canada's population is protected from border-related risks.

Program Activity Descriptions

Admissibility determination

The Admissibility determination program develops, maintains and administers the policies, regulations, procedures and partnerships that enable border services officers to intercept people and goods that are inadmissible to Canada and to process legitimate people and goods seeking entry into Canada within established service standards, and to administer and enforce the policies and guidelines that govern the reporting and verification of goods exported from Canada.

In the traveller stream, border services officers question people upon arrival to determine if they and their personal goods meet the requirements of applicable legislation and regulations to enter Canada. Border services officers will then make a decision to grant entry or refer a person for further processing (e.g. payment of duties and taxes, issuance of a document), and/or for a physical examination.

In the commercial stream, carriers and importers are required to provide information to the CBSA at or prior to arrival in Canada. Border services officers review the status of pre-arrival decisions and/or the provided accompanying documentation to determine whether the goods meet the requirements of applicable legislation and regulations to enter Canada. Based on this determination, a border services officer may refer the goods for further processing, examination and/or scientific/engineering analysis. Upon further examination goods may be seized or penalties imposed.

Risk assessment

The Risk assessment program pushes the border out by seeking to identify high-risk people and shipments as early as possible in the travel and trade continuum to prevent their departure to Canada.

The CBSA maintains a network of migration integrity officers (MIOs) at posts abroad. MIOs play an important role overseas in the screening of applications for visas and in conducting related fraud investigations. MIOs also assist international transportation companies and local law-enforcement authorities in identifying document fraud and interdicting irregular migrants destined for Canada.

Immigration enforcement

The Immigration enforcement program determines whether foreign nationals and permanent residents who are or may be inadmissible to Canada are identified and investigated, detained, monitored and/or removed from Canada.

Foreign nationals and permanent residents of Canada believed to be inadmissible are investigated and may have a report written against them by a CBSA inland enforcement officer. Depending on the type of inadmissibility, the merits of the report are reviewed by either a Minister's Delegate or an independent decision maker at the Immigration and Refugee Board of Canada (IRB) where a CBSA hearings officer represents the Minister of Public Safety. Subsequent to this review, a removal order may be issued against the foreign national or permanent resident in question. Removal orders issued against refugee claimants are conditional and do not come into force until the claim is abandoned, withdrawn or denied by the IRB.

Secure and trusted partnerships

The Secure and trusted partnerships program works closely with clients, other government departments and international border management partners to enhance trade chain and traveller security while providing pre-approved, low-risk travellers and traders with streamlined and efficient border processes. The CBSA develops and administers programs and cooperative agreements with its partners to ensure alignment with international standards (e.g. World Customs Organization Safe Framework) and promote best practices in global border management. By increasing membership in trusted traveller and trader programs, the CBSA is able to improve its capacity to mitigate risk in advance and focus examination efforts on identifying travellers and traders of unknown or higher risk.

Revenue and trade management

The Revenue and trade management program ensures that duties and taxes owed to the Government of Canada are collected in compliance with Canadian trade and imports reporting requirements. For the purposes of this program description, "duties" means any duties or taxes levied or imposed on imported goods under certain Acts that the CBSA is responsible for ad-

ministering. The Program administers international and regional trade agreements and domestic legislation and regulations governing trade in commercial goods. Through its work on free trade negotiations, the Program helps to strengthen international rules related to trade and open new markets for Canadians.

Criminal investigations

The Criminal investigations program protects the integrity of border-related legislation and contributes to public safety and Canada's economic security by investigating and pursuing the prosecution of travellers, importers, exporters and/or other persons who commit criminal offences in contravention of Canada's border-related legislation.

CBSA investigators review potential border legislation violations and gather evidence using a variety of investigative techniques, including search warrants and production orders. These violations include criminal offences under the *Customs Act, Immigration and Refugee Protection Act* (IRPA), various food/plant/animal legislation, and other border-related legislation. In conjunction with the Public Prosecution Service of Canada, the CBSA pursues the prosecution of individuals or business entities who violate Canada's border-related legislation. Potential violations of the Criminal Code are normally referred to the Royal Canadian Mounted Police (RCMP).

Recourse

The Recourse program provides the business community and individuals with an accessible mechanism to seek an impartial review of service-related complaints, trade decisions and enforcement actions taken by the CBSA. The Program ensures that the decisions taken by CBSA officials are fair, transparent and accurately reflect the Agency's policies and the Acts administered by the CBSA. Individuals can complete a written submission if they disagree with an enforcement action or a trade decision made by the CBSA or wish to submit a complaint about services provided by the CBSA.

Once submitted, clients are provided with a timely acknowledgment of the appeal or complaint. CBSA officials then conduct a review of the appeal or complaint taking into consideration the legislation administered by the Agency, CBSA policies, the client's point of view and, where necessary, technical opinions from CBSA experts or legal advice from the Department of Justice. Individuals who are not satisfied with the CBSA's review can appeal to the appropriate court, tribunal or external review body.

The Recourse program also facilitates the review of external complaints of discrimination filed with the Canadian Human Rights Commission and assists the Department of Justice representing the Agency on appeals to the Federal Court, various tribunals and other external bodies.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services.

See introductory text.

Canadian Security Intelligence Service

Strategic Outcome

Intelligence is used to protect the security and safety of Canada and its citizens.

Program Activity Descriptions

Intelligence program

This program includes the collection, processing and analysis of information and intelligence, respecting activities that may be suspected of constituting threats to the security of Canada and safety of Canadians and, in relation thereto, reporting and advising the Government of Canada. In accordance with *Canadian Security Intelligence Service Act*, s.16, in supporting the missions of National Defence and Foreign Affairs, this intelligence program also provides assistance to the Minister of National Defence and the Minister of Foreign Affairs, within Canada, in the collection of information or intelligence.

Security screening program

The Security screening program is one of the main responsibilities of CSIS and among its most visible functions. The goals of the Security screening program are to prevent non-Canadians who pose security concerns or risks from entering or receiving permanent residence in Canada and to prevent anyone of concern from gaining access to sensitive government assets, locations or information. Through its foreign offices in Canadian missions abroad, CSIS performs in-depth examinations of applicants and prospective immigrants whose backgrounds present security concerns. CSIS also provides security assessments on behalf of all federal government departments and agencies (except the Royal Canadian Mounted Police (RCMP)) as part of the Government Security Policy (GSP). Security assessments fall into the following program activities: Government screening, Sensitive sites screening, Foreign screening, Immigration and citizenship screening, and Refugee screening.

Correctional Service of Canada

Strategic Outcome

The custody, correctional interventions, and supervision of offenders, in communities and institutions, contributes to public safety.

Program Activity Descriptions

Custody

This program activity ensures that offenders are provided with reasonable, safe, secure and human custody while serving their sentence. This program activity provides much of the day-to-day needs for offenders in custody including a wide range of activities that address health and safety issues as well as provide basics such as food, clothing, mental health services, and physical health care. It also includes security measures within institutions including drug interdiction, and appropriate control practices to prevent incidents.

Correctional interventions

The Correctional interventions program activity, which occurs in both institutions and communities, are necessary to help bring positive changes in behavior and to successfully reintegrate offenders. This program activity aims to address problems that are directly related to offenders' criminal behavior and that interfere with their ability to function as law-abiding members of society.

Community supervision

The Community supervision program activity ensures eligible offenders are safely reintegrated into communities through the provision of housing and health services, where required, as well as staff supervision for the duration of the offenders sentence. The expected results for this program activity are offenders who are

reintegrated into the community as law-abiding citizens while maintaining a level of supervision, which contributes to public safety.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

National Parole Board

Strategic Outcome

Conditional release and pardon decisions and decision processes that safeguard Canadian communities.

Program Activity Descriptions

Conditional release decisions

This program activity aims to ensure public safety by providing quality decisions on the timing and conditions of release of offenders into the community. Through this program activity, National Parole Board (NPB) provides timely, accurate information for Board member decision-making and develops effective training and policies that are essential tools for the quality risk assessment and decision-making. Effectiveness is assessed through the monitoring of the outcomes for offenders released on parole.

Conditional release openness and accountability

This program activity is designed to ensure that NPB operates in an open and accountable manner, consistent with the provisions of the *Corrections and Conditional Release Act*. Therefore this program activity consists of

the provision of information for victims of crime; assistance for observers at hearings and those who seek access to the National Parole Board's decision registry; dissemination of public information; encouragement of citizen engagement; investigation of tragic incidents in the community; as well as performance monitoring and reporting on conditional release decision processes. Results for this program activity are assessed by monitoring the timeliness of information shared and selected surveys of those who receive information and assistance from the National Parole Board.

Pardon decisions/clemency recommendations

This program activity is designed to support rehabilitation and community reintegration by providing quality pardon decisions and elemency recommendations. In support of quality decisions and recommendations, NPB screens applications for eligibility and completeness, collects appropriate information for decision-making and develops policy to guide decision processes. The results of this program are assessed through ongoing review of the average time required to process pardon applications, and the rates of revocation of pardons granted.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Office of the Correctional Investigator

Strategic Outcome

The problems of offenders in the federal correctional system are identified and addressed in a timely and reasonable fashion.

Program Activity Descriptions

Ombudsman for federal offenders

Through this program activity, the Office of the Correctional Investigator (OCI) conducts investigations of individual offender complaints regarding acts, omissions, decisions and recommendations of the Correctional Service of Canada (CSC). It also has a responsibility to review and make recommendations on CSC's policies and procedures associated with the areas of individual complaints, to ensure that systemic areas of complaint are identified and appropriately addressed, and to review all Section 19 investigations performed by CSC following the death of or serious injury to an inmate.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Royal Canadian Mounted Police

Strategic Outcome

Criminal activity affecting Canadians is reduced.

Program Activity Descriptions

Police operations

Under the authority of the RCMP Act, this Program activity provides Canadians with policing services at the federal, provincial and municipal levels and within Aboriginal communities. This program contributes to safe homes and communities by providing general law enforcement activities in addition to education and awareness activities delivered by employees of the RCMP to the public, businesses and other agencies/organizations within Canada. The RCMP's education and awareness activities, for example information sessions on financial crime, national security, drugs and organized crime, are aimed at reducing victimization of Canadians. Additionally, this program ensures the protection of designated persons and security at major events which in turn mitigates any potential threats to Canada's population. The program also delivers a high level of technical and operational support to ensure that the RCMP reaches its overarching goal of reducing criminal activity which affects Canadians.

Canadian law enforcement services

This Program activity provides the Canadian law enforcement community with the necessary scientific, technical, investigative and educational support to deliver proactive, intelligence based policing and law enforcement services to their respective communities and partners. Additionally, this program provides educational opportunities to members of the Canadian law enforcement community to enable them to develop their skills thus increasing their effectiveness in contributing to a safer Canada. This program is necessary to ensure that Canadian law enforcement communities have access to the required tools, systems, technologies

(i.e. forensic support and expertise, criminal intelligence and firearms registry and databases, etc) and education which in turn will contribute to the reduction of criminal activity affecting Canadians.

Strategic Outcome

Incomes are secure for RCMP members and their survivors affected by disability or death

Program Activity Descriptions

Statutory payments

This Program ensures that RCMP employees and their families are provided income security in the event of disability or death. This program is necessary to ensure that an appropriate level of support is afforded to those who are affected by circumstances beyond their control and as a result of their employment with the RCMP. The activities within this program are regulated by statutory payments, for example, the RCMP *Pension Continuation Act* payments.

Strategic Outcome

Canada's police provide international collaboration and assistance while maintaining a rich police heritage nationally

Program Activity Descriptions

International operations

This Program activity furthers Canada's global peace agenda through cooperation and support of the international law-enforcement community, thereby ensuring that both Canadians and the global community are safer. This program is necessary as it addresses the transnational scope of terrorist criminal activity and other criminal activity through building relationships with international policing partners, participating in the INTERPOL global information sharing network and conducting extra-territorial criminal investigations.

Additionally, the RCMP actively participates in multiple missions abroad in a peacekeeping role and by providing support to nations at risk in building their law enforcement capacity. Through this international cooperation and collaboration, this program contributes directly to a more secure world and Canada.

Canadian police culture and heritage

This Program activity promotes Canada, the RCMP, its communities and partners by delivering its ceremonial services to all Canadians as well as the international community. Ceremonial support activities are delivered by the Musical Ride who tour Canada and abroad four to six months each year showcasing Canada's proud heritage and culture. This Program responds to both domestic and international requests for historical information about the RCMP. Additionally, the RCMP supports and develops government partners by providing RCMP members in Ceremonial dress at Special events (ex. Olympics, Expos, Summits) both domestically and internationally. Through the activities of this program, the RCMP contributes to Canada's vibrant culture and heritage.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Royal Canadian Mounted Police External Review Committee

Strategic Outcome

Independent, impartial and thorough analysis, findings and recommendations for transparency in Royal Canadian Mounted Police (RCMP) grievances and appeals.

Program Activity Descriptions

Independent and impartial case review

The Royal Canadian Mounted Police External Review Committee (ERC) conducts an independent review of appeals in disciplinary, and discharge and demotion matters, as well as certain categories of grievances that are referred to it by the Commissioner of the RCMP pursuant to s. 33 of the RCMP Act and s. 36 of the RCMP Regulations. The ERC ensures that the principles of administrative and labour law are respected and that the remedial approach indicated by the Act is followed. The ERC issues reports of its findings and recommendations in each case to the Commissioner of the RCMP and to the parties. Access to the ERC's reports is made available to all stakeholders (including the parties, RCMP adjudicators, supervisors, members' representatives, staff relations representatives, and labour and employment experts in other jurisdictions) by means of its website, publications and presentations.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Royal Canadian Mounted Police Public Complaints Commission

Strategic Outcome

RCMP members are held publicly accountable for their conduct in the performance of their duties.

Program Activity Descriptions

Civilian review of RCMP members' conduct in the performance of their duties

The Commission conducts reviews of complaints received from the public about the conduct of RCMP members in the performance of their duties. When complainants are not satisfied with the RCMP's handling of their complaints, they can request a review of their case by the Commission. In reviewing these complaints, the Commission may conduct hearings and investigations, and reports on its findings and makes recommendations to the RCMP Commissioner and Minister of Public Safety.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Department

Strategic Outcome

High quality, central programs and services that ensure sound stewardship on behalf of Canadians and meet the program needs of federal institutions.

Program Activity Descriptions

 $Accommodation\ and\ real\ property\ assets\ management$

PWGSC provides federal departments and agencies with safe, healthy and affordable office and common use accommodation that support the effective delivery of their programs and services. The department acts as steward for various public works such as buildings, bridges and dams, and national treasures such as the Parliamentary Precinct and other heritage assets across Canada. PWGSC also provides other federal departments and agencies with responsive and cost-effective real property services.

Acquisitions

This program activity shows PWGSC as the government's primary procurement service provider offering federal organizations a broad base of procurement solutions such as specialized contracts, standing offers and supply arrangements. The role of PWGSC in this area is to provide timely value-added acquisitions and related common services to Canadians and the federal government.

Receiver General for Canada

This program activity manages the operations of the federal treasury and maintains the Accounts of Canada. It provides federal departments with an optional financial management system, bill payments services and document imaging.

Linguistic management and services

This program activity shows the Translation Bureau as the manager of the government's terminology and linguistic authority mandated with the development, standardization and distribution of Terminology. It also ensures that there is a sustainable, qualified and secure supply of linguistic resources available to support any linguistic requirements of the Government and to support Canada's economic and social agenda. The Translation Bureau is the sole internal linguistic services provider offering federal organizations a broad base of linguistic solutions such as translation, interpretation and terminology. The program is mandated under the *Translation Bureau Act*.

Specialized programs and services

This program activity ensures high quality, timely and accessible specialized services and programs to federal institutions in support of sound, prudent and ethical management and operations.

Federal pay and pension administration

This program activity provides reliable central systems and processes for pay and pension administration to other federal organizations. Through our pay and pension services, PWGSC ensures that federal government employees and pensioners are paid accurately and on time.

Information technology infrastructure services

This program activity provides leadership in supporting government-wide Information technology (IT) initiatives. It works closely with client federal organizations to understand and respond to their IT requirements, while delivering secure IT services and solutions. It includes the brokering, developing and/or managing of products and services for distributed computing environments, data centres, telecommunications and IT security.

Procurement ombudsman

This program activity, operating at an arms length from the government, reviews procurement practices across federal departments and agencies, investigates complaints from potential suppliers with respect to awards of contracts for goods and services below certain thresholds, and complaints concerning the administration of contracts; and ensures the provision of an alternative dispute resolution program for contracts. This activity helps to promote fairness and transparency of the procurement process.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Old Port of Montreal Corporation Inc.

Strategic Outcome

An urban park dedicated to recreational, tourist and cultural activities that safeguard and promote the Old Port of Montreal's cultural heritage while facilitating public access to the waterfront.

Program Activity Descriptions

Management of the Old Port of Montreal as an urban park, a tourist destination offering recreational and cultural activities

The Old Port of Montreal Corporation Inc. (OPMC) is mandated to promote and develop the lands of the Old Port of Montreal in accordance with the approved Master Development Plan. The Plan is, among other things, to ensure free pedestrian access to the site, public sector control on its development and development of the historical, maritime and port character of the site. The OPMC administers, manages, and maintains the property at the Old Port site on behalf of Her Majesty.

Strategic Outcome

Mandated services are delivered in a consolidated and standardized manner to support the delivery of Government of Canada programs and services for Canadians.

Program Activity Descriptions

Efficient and effective information technology infrastructure services are delivered across Government of Canada

Enterprise-wide consolidation in the areas of email, data centres and telecommunications improves the overall efficiency, reliability and security of information technology infrastructure.

Shared Services Canada

Strategic Outcome

Mandated services are delivered in a consolidated and standardized manner to support the delivery of Government of Canada programs and services for Canadians.

Program Activity Descriptions

Efficient and effective information technology infrastructure services are delivered across Government of Canada

Enterprise-wide consolidation in the areas of email, data centres and telecommunications improves the overall efficiency, reliability and security of information technology infrastructure.

Note: The full wording of all authorities granted in current year Appropriation Acts, of all authorities granted by statutes other than Appropriation Acts, of all non-lapsing authorities granted in current year, and of all authorities available from previous years is given in Section 1 of this volume.

(S) Statutory authority.

(L) Non-budgetary authority (loan, investment or advance).

(1) Treasury Board Vote 5—Government contingencies.

Treasury Board Vote 10—Government-wide initiatives.

Treasury Board Vote 15—Compensation adjustments.
Treasury Board Vote 25—Operating budget carry forward.
Treasury Board Vote 30—Paylist requirements.

Treasury Board Vote 33—Capital budget carry forward.

(2) Deemed appropriations to Vote 17, Shared Services Canada pursuant to section 31.1 of the *Financial Administration Act* (Order in Council 2011-1297).
(3) In accordance with the Treasury Board decision January 19, 1995, the year-end accumulated surplus in excess of \$5,000,000 amounted to a \$5,915,957 reduction to the Fund's authority.

(5) Order in Council 2011-0877, orders that the Minister of Public Works and Government Services shall preside over Shared Services Canada, effective August 4, 2011. Order in Council 2011-1297, His Excellency the Governor General in Council, on the recommendation of the Prime Minister, pursuant to paragraph 2(a) of the Public Service Rearrangement and Transfer of Duties Act, hereby transfers to Shared Services Canada, effective November 15, 2011, the control and supervision of the following portions of the federal public administration in each department and portion of the federal public administration set out in the schedule known as: (a) the Email, Data Centre and Network Services Unit; and (b) the Email, Data Centre and Network Services Support Unit.

⁽⁴⁾ Order in Council 2011-0585 designates the Minister of Public Works and Government Services, a member of the Queen's Privy Council for Canada, as the appropriate Minister for the Canada Lands Company Limited, including its subsidiary the Old Port of Montreal Corporation Inc., effective May 18, 2011. Prior to the transfer, expenditures of \$3,546,625 were approved by the Leader of the Government in the House of Commons. Previous year's amounts have been restated by \$28,986,795.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Department

Strategic Outcome

An efficient transportation system.

Program Activity Descriptions

Gateways and corridors

Guided by the National Policy Framework for Strategic Gateways and Trade Corridors, the Gateways and corridors program activity aims at supporting Canada's international trade and international supply chains by creating more efficient, reliable and seamless trade-related transport systems in Canada. The program: sets strategies and frameworks for improving and integrating transportation networks in key regions; fosters partnerships between all levels of government and the private sector; supports and oversees projects that contribute to the increased capacity and efficiency of gateway and corridor infrastructure; develops and puts in place measures that remove impediments to the effective development of gateways and corridors; and promotes the use of gateways and corridors.

Transportation infrastructure

The Transportation infrastructure program looks after transportation infrastructure for Canada to improve efficiency and ensure service. It: acts as the steward of certain commercial transportation assets operated by third parties on behalf of the federal government (airport authorities, port authorities, federal bridges, Via Rail, Seaway, Marine Atlantic); provides funding for Canada's strategic transportation infrastructure, targeted to support federal objectives; supports essential services to some remote communities; manages legacy commitments; and divests assets and contracts out operations, where needed.

Transportation innovation

The Transportation innovation program activity aims to make the Canadian transportation system more efficient and competitive. Working in partnership with stakeholders, the program aims to enhance the capacity of the transportation sector to research and implement innovative solutions to current and emerging transportation challenges. The program sets and implements policy and strategic direction for technology research, development and deployment (R&DD) and develops and manages collaborative departmental R&D programs. This includes: advancing and disseminating scientific knowledge and the application of transportation technologies; partnering and collaborating with other federal government departments, provinces and territories, the academic community and other national and international stakeholders; supporting skills development and capacity building initiatives for a highly qualified transportation workforce.

${\it Transportation\ marketplace\ frameworks}$

The Transportation marketplace framework program activity encourages transportation efficiency by fostering a competitive and viable transportation sector. Program activities include: setting the regimes governing the economic behavior of carriers in all modes of transportation; setting the rules of governance for all the

transportation infrastructure providers falling under the authority of Parliament; monitoring the transportation system; and, representing the interests of Canada in international transportation for aand other international bodies.

Strategic Outcome

A safe transportation system.

Program Activity Descriptions

Aviation safety

The Aviation safety program activity develops, administers and oversees the policies, regulations and standards necessary for the safe conduct of civil aviation within Canada's borders in a manner harmonized with the international aviation community.

Marine safety

The Marine safety program activity, under the authority of the Canada Shipping Act, 2001, the Navigable Waters Protection Act, the Safe Containers Act, the Pilotage Act, the Coasting Trade Act and the Arctic Waters Pollution Prevention Act develops, implements and administers regulations, policies and standards necessary for the safe, environmentally sound conduct of marine activities in a manner harmonized with the International Maritime Organization. This program promotes safety and provides safety oversight of the marine industry including domestic and foreign vessels as well as pleasure craft; enforces international conventions signed by Canada; protects the marine environment and the public right to navigate on Canadian waterways.

Rail safety

Under the authority of the *Railway Safety Act*, the Rail safety program activity develops, implements and promotes safety policy, regulations, standards and research. The program provides oversight of the rail industry and promotes public safety at crossings and

identifies the risks of trespassing. It also provides funds to improve safety at grade crossings.

Road safety

Guided by the *Motor Vehicle Safety Act* and the *Motor Vehicle Transport Act*, the Road safety program activity develops standards and regulations, provides oversight and engages in public outreach in order to: reduce the deaths, injuries and social costs caused by motor vehicle use; and improve public confidence in the safety of Canada's road transportation system.

Transportation of dangerous goods

Required by the *Transportation of Dangerous Goods Act*, 1992, the Transportation of dangerous goods (TDG) program activity, based on risk, develops safety standards and regulations, provides oversight and gives expert advice (e.g. Canadian Transport Emergency Centre (CANUTEC)) on dangerous goods incidents to: promote public safety in the transportation of dangerous goods by all modes of transport in Canada; identify threats to public safety and enforce the Act and its regulations; guide emergency response and limit the impact of incidents involving the transportation of dangerous goods; and develop policy and conduct research to enhance safety.

Strategic Outcome

A secure transportation system.

Program Activity Descriptions

Aviation security

The Aviation security program activity develops, administers and oversees policies, programs, regulations and standards necessary for a secure Canadian aviation system in a manner harmonized with the international aviation community.

Marine security

The Marine security program activity, with partners, enforces the *Marine Transportation Security Act* to protect Canada and Canadians in a way that respects Canadian values. It safeguards the integrity and security; and preserves the efficiency of Canada's Marine transportation system against unlawful interference, terrorist attacks or from being used as a means to attack our allies.

Surface and intermodal security

Guided by the Railway Safety Act, the International Bridges and Tunnels Act, the Transportation of Dangerous Goods Act and the federal government's transportation security mandate, the Surface and Intermodal Security Program Activity enhances the security of surface and intermodal transportation – such as rail and urban transit and international bridges and tunnels. Working with partners to protect Canada and Canadians in a way that respects Canadian values and preserves the efficiency of the transportation system, the program provides federal leadership; and develops and enforces regulatory and voluntary frameworks (regulations, codes of practice, memoranda of understanding).

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Strategic Outcome

A clean transportation system.

Program Activity Descriptions

Environmental stewardship of transportation

The Environmental stewardship program fulfills Transport Canada's responsibilities in working towards a cleaner and healthier environment for Canadians, with regard to its own operations. These responsibilities include: developing a departmental Sustainable Development Strategy (SDS); managing contaminated sites; fulfilling environmental responsibilities at TC owned or operated ports and airports; and greening TC operations (internal).

The program: develops and implements policies and programs for TC activities that further environmental objectives and promote sustainable transportation; provides functional support for environmental assessments, including for major resource projects, and; promotes compliance with environmental laws, federal government policies and best practices in Transport Canada's stewardship activities.

Clean water from transportation

Guided by the Canada Shipping Act, the Arctic Waters Pollution Prevention Act, the Marine Liability Act and international conventions, the Clean water from transportation program helps to protect the marine environment and the health of Canadians by reducing the pollution of water from transportation sources. The program: Regulates and monitors the impact of discharges from marine vessels into the marine environment; Regulates ballast water; and Contributes to setting domestic and international rules that govern limits to liability of marine pollution incidents.

Clean air from transportation

Transport Canada's Clean air from transportation program activity advances the federal government's clean air agenda in the transportation sector and complements other federal programs designed to reduce air emissions for the health of Canadians and the environment for generations to come. The program: Regulates air emissions from the transportation sector; Oversees TC clean air program obligations and commitments; Demonstrates and promotes clean transportation technologies; Promotes environmentally responsible best practices and behaviours; and Builds stakeholder knowledge and capacity to reduce air emissions.

Canada Post Corporation

Strategic Outcome

Provision of parliamentary mailing privileges, services to the blind and declining transitional funding for the Canada Post Corporation pension plan.

Program Activity Descriptions

Concessionary governmental services

Payment associated with services provided at rates free of postage by the Corporation in support of government policy programs: Government Free Mail and Materials for the use of the Blind.

Canadian Air Transport Security Authority

Strategic Outcome

Critical elements of the air transportation system as assigned by the Government are secured.

Program Activity Descriptions

Securing critical elements of the Canadian air transportation system

The Canadian Air Transport Security Authority (CATSA) is a parent Crown corporation that provides effective and efficient screening of persons who access aircraft or restricted areas, the property in their possession or control, and the belongings or baggage that they give to an air carrier for transport.

Canadian Transportation Agency

Strategic Outcome

Transparent, fair and timely dispute resolution and economic regulation of the national transportation system.

Program Activity Descriptions

Economic regulation

The Agency helps to protect the interests of users, service providers and others affected by the federal transportation system through economic regulation of air, rail and marine transportation. It regulates air transportation and helps to protect the interests of the travelling public, shippers and Canadian air carriers by enforcing the Canada Transportation Act and related regulations, administering a licensing system, helping to negotiate bilateral agreements, and ensuring that terms and conditions of carriage are consistent with Canadian legislation. It develops regulations, codes of practice, standards, and educational and outreach programs to ensure that undue obstacles to the mobility of persons with disabilities are removed from the federal transportation system. It regulates the national rail system by issuing certificates of fitness allowing carriers to operate, approving rail line construction and overseeing the discontinuance of service, and it is involved in economic duties, such as the determination of interswitching

rates and revenue caps for the movement of Western grain. It acts mainly as an economic regulator in marine transportation by administering legislation governing shipping conferences and allowing the use of foreign ships for coasting trade only when Canadian vessels are not available.

Adjudication and alternative dispute resolution

The Agency helps to protect the interests of users, service providers and others affected by the national transportation system through access to a specialized dispute resolution system of formal and informal processes for rail, air and marine transportation matters within the national transportation system. Where possible, the Agency encourages the resolution of disputes through informal processes such as facilitation, mediation, and arbitration. As a quasi-judicial tribunal, the Agency also has the authority to issue decisions and orders on matters within its jurisdiction of federally-regulated modes of transportation through formal adjudication. It resolves disputes between the travelling public, shippers and Canadian air carriers over terms and conditions of air carriage and new or revised air navigational charges imposed by NAV Canada; disputes between travellers and transportation providers over undue obstacles to the mobility of persons with disabilities within the federally regulated transportation system; disputes between railway companies, shippers, municipalities, road authorities, and landowners over rail infrastructure matters and level of service; and disputes between vessel operators and port and pilotage authorities over charges for pilotage or fees fixed by port authorities.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Federal Bridge Corporation Limited

Strategic Outcome

Safe and efficient transit on the infrastructure maintained, operated and managed by the Federal Bridge Corporation Limited.

Program Activity Descriptions

Construction of a new low-level bridge in Cornwall, Ontario as well as related infrastructure improvements

This program activity encompasses the construction of a new low-level bridge in Cornwall, to replace the deteriorating North Channel Span of the Seaway International Bridge, as well as related infrastructure improvements on Cornwall Island.

Marine Atlantic Inc.

Strategic Outcome

A safe, reliable, efficient, affordable and environmentally responsible ferry service between the Island of Newfoundland and the Province of Nova Scotia.

Program Activity Descriptions

Ferry services

Marine Atlantic Inc. is a parent Crown corporation that fulfills Canada's constitutional obligation to Newfoundland and Labrador (NL) to provide a year-round ferry service between North Sydney, Nova Scotia and Port aux Basques, NL. It also operates a non-constitutional seasonal service between North Sydney and Argentia, NL.

Office of Infrastructure of Canada

Strategic Outcome

Provinces, territories and municipalities have federal financial support for their infrastructure priorities.

Program Activity Descriptions

Strategic Outcome

Funding for quality, cost-effective public infrastructure that meets the needs of Canadians in a competitive economy, a clean environment and liveable communities is provided.

Program Activity Descriptions

Building Canada Fund—Major Infrastructure component

The Major Infrastructure component of the Building Canada Fund program activity targets larger, strategic infrastructure projects both at the national and regional level. It increases overall investment in public infrastructure and contributes to broad federal objectives of economic growth, a cleaner environment and strong and prosperous communities. The objective is to target two-thirds of the funding to national priorities of water, wastewater, public transit, the core national highway system and green energy. The Major Infrastructure component has 11 additional eligible categories of investment, and priority projects are identified through discussions with provinces. By providing up to 50% federal funding on a cost-shared basis, it levers additional contributions from other partners to promote increased investment in strategic infrastructure. Eligible recipients include provinces, local or regional govern-

ments, public sector bodies, non-profit organizations and private companies. Projects identified as a priority, must be supported by a business case reviewed against key program criteria. Once a project review is completed and a project is approved, funds are delivered through contribution agreements with eligible recipients to reimburse costs incurred. Projects under this program activity contribute to the construction, renewal and/or enhancement of public infrastructure. As part of the Economic Action Plan, the government made a commitment to accelerate funding under the Building Canada Plan, and as such, the department streamlined the federal evaluation and approval of projects under the Building Canada Fund-Major Infrastructure component, simplifying and developing a more efficient review process to help projects get started sooner.

Green Infrastructure Fund

This program activity provides funding for public infrastructure projects that promote cleaner air, reduced greenhouse gas emissions, and cleaner land and water. Project categories include wastewater infrastructure, green energy generation infrastructure, green energy generation and transmission infrastructure, solid waste infrastructure and carbon transmission and storage infrastructure. The objective of the Green infrastructure Fund is to improve the quality of the environment and to support a more sustainable economy over the long-term. The Fund provides up to 50% of eligible project costs to promote increased investment in infrastructure, in support of a more sustainable economy. Funding is provided on a cost-shared basis to provinces, territories, local or regional governments, public sector bodies, other eligible non-profit organizations and private sector companies, either alone or in partnership with a province, territory or a government body. Projects are assessed against criteria such as eligibility, leveraging financial investments and project benefits.

Canada Strategic Infrastructure Fund

This program activity provides funding to support large-scale projects in areas that are vital to sustaining economic growth and enhancing the quality of life of Canadians. It supports infrastructure projects in the categories of highways and railways, local transportation, tourism or urban development, water or sewage and broadband (telecommunications connectivity). Investments are made in cooperation with the provinces, territories, municipalities and the private sector to support the construction, renewal and/or enhancement of public infrastructure to build infrastructure capacity in partnership with recipients. The Canada Strategic Infrastructure Fund levers additional contributions from other partners by providing up to 50% of funded costs for eligible projects. The Fund benefits Canadians by promoting the safer and faster movement of people and goods on Canada's transportation systems, reduced green house gas emissions and pollutants, increased economic activity and innovative technologies.

Building Canada Fund—Communities component

The Communities component of the Building Canada Fund program activity provides funding to address the unique infrastructure pressures facing smaller communities focusing on project investments in communities with populations of less than 100,000. Working in partnership with federal delivery partners and recipients, program funding supports the construction, renewal and enhancement of basic infrastructure priorities such as potable water, wastewater treatment, local roads and other infrastructure needs of small communities. The fund levers additional contributions from other partners by generally providing federal funding of one-third of eligible costs. The Building Canada Fund focuses on projects that deliver economic, environmental, and social benefits to all Canadians. Priority funding categories for the fund are the core national highway system routes, drinking water, wastewater,

public transit and green energy. Other eligible investment priority areas include environmental projects (solid waste management), projects that support economic growth and development (short-line rail and short-sea shipping, connectivity and broadband, tourism and regional and local airports), as well as projects that contribute to the ongoing development of safe and strong communities (disaster mitigation, culture, sport, local roads and bridges, and brownfield re-development). Funding is used to support public infrastructure owned by provincial, territorial and municipal governments and entities, as well as private industry.

Border Infrastructure Fund

This program activity provides funding for investments in physical infrastructure capacity and intelligent transportation systems at surface border crossings between Canada and the United States, as well as several other crossing points in Canada. These investments help to reduce congestion and support the implementation of the Smart Borders Action Plan, and to enhance safety and security at border crossings. The Fund is critical to Canada's growing economic and trade relationship with the United States. Established in 2002, the fund provides up to 50% of funding for eligible project costs. Projects under this program activity are carried out in partnership with funding recipients and include the construction, renewal and/or enhancement of public infrastructure to build infrastructure to enhance border surface capacity. The Border Infrastructure Fund benefits Canadians by reducing border crossing times for trucks and cars travelling between Canada and the United States, more efficient movement of goods, thereby contributing to increased trade and production, increased safety and security and improved Canada-United States relations.

Municipal Rural Infrastructure Fund

This program activity provides funding for smaller-scale municipal infrastructure projects de-

signed to promote and improve quality of life in both urban and rural communities. At least 80 percent of funding under the Municipal Rural Infrastructure Fund has been dedicated to municipalities with a population of less than 250,000. Eligible project categories under this fund include water and wastewater treatment, and cultural and recreation projects for smaller communities. In May 2007, the Government of Canada announced an additional \$200 million for the initial \$1 billion program. For most projects, the Fund provides up to one-third federal funding for eligible projects, thereby promoting increased infrastructure investments. Projects funded under this program activity contribute to the construction, renewal and/or enhancement of public infrastructure, improving and increasing the stock of core public infrastructure. The program aims to promote sustainable economic growth, innovation and healthy communities.

Economic analysis and research

This program activity helps to ensure that Canada's infrastructure investment priorities and activities include the building, connecting and sharing of applied knowledge and research on infrastructure issues, projects and programs. It targets key gaps in infrastructure knowledge and information, promotes the development of an enhanced evidence base for sound decision making at all levels of government, and contributes to improved measurement of the impacts of infrastructure policy and investment decisions. This program activity supports strategic research capacity and knowledge generation and applications at the national level, as well as cooperation with other levels of government in addressing their unique research and capacity-building needs. It levers research resources and expertise across various levels of government and stakeholder groups to address the infrastructure challenges and proposed solutions for Canada's economy, environment and community.

Gas Tax Fund

This program activity provides municipalities with predictable long-term funding coupled with local decision-making to enable them to build and rehabilitate their core public infrastructure. Under this program activity, Canada has entered into Gas Tax Fund agreements with provinces, territories, the Association of Municipalities of Ontario, the Union of British Columbia Municipalities and the City of Toronto. These agreements establish an accountability framework allowing Canada to flow Gas Tax Fund monies twice a year to signatories which in turn, flow funds to municipal recipients based on an agreed upon allocation formula. For their part, municipal recipients decide which projects to prioritize within established investment categories that contribute to shared national outcomes of cleaner air, cleaner water and reduced greenhouse gas emissions, and increase community capacities to undertake long-term planning. Municipalities can pool, bank and borrow against this funding, providing significant additional financial flexibility. Eligible recipients are required to report annually on their use of funds and their compliance to terms and conditions of the federal-provincial Gas Tax Fund agreements. Budget 2007 added \$8 billion in new funding and extended the Gas Tax Fund from 2010 to 2014, doubling it to \$2 billion per year. Budget 2008 announced that the government will make it ongoing.

Provincial-Territorial Infrastructure Base Fund

This program activity provides a pre-determined level of base funding to provinces and territories for infrastructure initiatives, balancing the Building Canada Fund's per capita allocations. An equal annual amount of funding is flowed in support of each jurisdiction's Annual Capital Plan accepted by the Minister, except where provinces and territories have agreed to match accelerated federal funding. These Capital Plans outline infrastructure initiatives that support priorities in a given jurisdiction within the scope of eligible federal

investment categories, including the construction or rehabilitation of infrastructure in all the project categories eligible under the Building Canada Fund, including secondary provincial highway infrastructure. While payments are made to provinces and territories, ultimate recipients can also include local and regional governments or private sector bodies. The Fund provides a high degree of flexibility to provinces and territories. Payments are made in advance and provinces and territories may pool, bank, or cash-manage these funds in a manner that will afford them greater flexibility in implementing their Annual Capital Plans. The Provincial-Territorial Infrastructure Base Fund was designed to help restore the fiscal balance while enhancing Canada's public infrastructure system, promoting enhanced competitiveness and productivity of the economy, cleaner air, water and land, and stronger and healthier communities. Funding will be matched by provinces (50% federal share) and territories (75% federal share) to maximize investment by all orders of government. All provinces and territories benefit from this investment in modern public infrastructure, particularly jurisdictions with smaller populations.

Strategic Outcome

Construction-ready infrastructure projects are provided with federal funding support.

Program Activity Descriptions

Infrastructure Stimulus Fund

This program activity is intended to accelerate and increase the number of provincial, territorial and municipal infrastructure projects, as well as infrastructure projects submitted by not-for-profit and for-profit entities. It focuses on the rehabilitation of existing assets and new infrastructure projects that can be materially completed by March 31, 2011. Categories include water, wastewater, public transit, solid waste manage-

ment, highways, roads, culture, community centers and services, temporary shelter infrastructure, parks and trails, rail and port infrastructure. As part of the Economic Action Plan, the Infrastructure Stimulus Fund helps to provide timely, targeted and short-term stimulus to the Canadian economy by increasing the total amount of construction activity in Canada during 2008-2009, 2009-2010 and 2010-2011 through the funding of projects, and by leveraging funding of other levels of government and the private sector. The Infrastructure Stimulus Fund is designed as a broad and flexible program to include both new infrastructure and rehabilitation of existing assets. By providing up to 50% federal funding to projects that can be materially completed by March 2011, the Fund levers funding from other partners.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

See introductory text.

Royal Canadian Mint

Strategic Outcome

The strategic outcome of the Royal Canadian Mint (RCM) are to: elevate the RCM into a world-class brand that is recognized for quality, innovation and exceeding customer's expectations; ensure that Canadian circulation products and services are cost-effective, accessible, relevant and inspire Canadians to celebrate their history, culture and values; ensure that foreign coinage, bullion and refinery services, collectible and other related and services are leaders in their respective markets; generate a profit and maintain long-term via-

bility through an ongoing commitment to customer satisfaction, growth and efficiency; create an environment where all employees demonstrate the organization's values and celebrate their success; and ensure that health, safety and the environment are paramount considerations in providing an ideal workplace.

The Jacques Cartier and Champlain Bridges Incorporated

Strategic Outcome

Safe and efficient transit on the infrastructure maintained, operated and managed by the Jacques Cartier and Champlain Bridges Incorporated.

Program Activity Descriptions

Management of federal bridge, highway and tunnel infrastructure, and properties in the Montreal area

This program activity encompasses the operation and maintenance of the Jacques Cartier and Champlain bridges, the federally-owned section of the Honoré-Mercier Bridge, a section of the Bonaventure Expressway, the Melocheville Tunnel, and the Champlain Bridge Ice Control Structure by carrying out regular and major maintenance work.

Transportation Appeal Tribunal of Canada

Strategic Outcome

The Canadian transportation community is provided with the opportunity to have enforcement and licensing decisions of the Minister of Transport reviewed in a fair manner by unbiased hearing officers.

Program Activity Descriptions

Review and appeal hearings

Provides for the operation of an independent Tribunal to respond to requests from the transportation community for review of enforcement and licensing decisions taken by the Minister of Transport under various transportation Acts; and to conduct hearings into such appeals. At the conclusion of a hearing, the Tribunal may confirm the Minister's decision, substitute its own decision, or refer the matter back to the Minister for reconsideration.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

VIA Rail Canada Inc.

Strategic Outcome

A national passenger rail transportation service that is safe, secure, efficient, reliable, and environmentally sustainable and that meets the needs of travelers in Canada.

Program Activity Descriptions

Operation of a national network of rail passenger services

Provision of year-round services in the Quebec City-Windsor Corridor, transcontinental passenger services between Halifax and Montreal and between Toronto and Vancouver, and the regional and remote services in northern and outlying areas of the country.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Secretariat

Strategic Outcome

Government is well managed and accountable, and resources are allocated to achieve results.

Program Activity Descriptions

Government-wide funds and Public service employer payments

The government-wide funds and Public service employer payments program activity accounts for funds that are held centrally to supplement other appropriations, from which payments and receipts are made on behalf of other federal organizations. These funds supplement the standard appropriations process and meet certain responsibilities of the Secretariat as the employer of the federal public service. The administration of these funds falls under the Expenditure management and People management program activities, but their financial resources are shown separately in the Program Activity Architecture (PAA) for visibility and reporting purposes.

Management frameworks

The Management frameworks program activity establishes guiding principles and expectations for public sector management. It includes setting government-wide policy directions in targeted areas such as governance, regulatory management, the Management accountability framework (MAF), service, information management and technology. Working with all federal organizations, the Secretariat provides leadership, challenge, and a community enablement function in areas related to policy development, compliance, performance reporting, and functional community development. This work includes new and emerging issues and priorities related to the management of the Public service, and promoting a cultural shift in how to government deals with risk and innovation. In turn, this work informs the policies in the Expenditure, Financial, and People management program activities. This program activity is underpinned by a broad set of enabling legislation, including the Financial Administration Act (FAA).

People management

The People management program activity supports efforts across the federal public service to achieve strong leadership and a well managed workforce and workplace. These elements provide the foundation to drive employee engagement and a culture of excellence, leading to high quality policies, programs and services and a sustained and productive public service. In certain instances this program activity includes efforts that extend beyond the core public administration to separate employers and Crown corporations. This program activity undertakes direction-setting activities that include: developing and implementing people management related frameworks and policies; setting and monitoring departmental people management performance expectations; conducting research and analysis regarding the state of people management; and sup-

porting the effective management of the leadership cadre. The program activity also provides public service-wide leadership on managing compensation which it shares with the expenditure management program activity and includes: collective bargaining and associated labour relations and establishing and maintaining the public service pension and benefits regime. The People management program activity supports enabling infrastructure including the human resources functional community and the underlying business processes and systems, and is underpinned by legislation that includes: the Financial Administration Act: Public Service Employment Act; Public Service Labour Relations Act; Public Servant Disclosure Protection Act; Official Languages Act; and Employment Equity Act.

Expenditure management

The Expenditure management program activity helps ensure alignment of resources to achieve government priorities in a way that maximizes value for money and provides a whole-of-government perspective on matters related to direct program spending. Working with all federal organizations that are subject to budget appropriation, this program activity undertakes the review, analysis, and challenge of plans and proposals involving departmental spending, expenditure forecasting and strategies, compensation management, and results-based management. This work, as well as the production of government estimates documents and reporting to Parliament, is facilitated by the expenditure management information system. This program activity forms part of the expenditure management system, the framework for the development and implementation of the Government's spending plans and priorities within the limits established by the Budget, which is implemented in coordination with the Department of Finance and the Privy Council Office. The primary piece of legislation underpinning the program's activities is the Financial Administration Act (FAA).

Financial management

The Financial management program activity promotes good financial management practices across government to ensure financial activities are carried out effectively and efficiently. Working with all federal organizations, the Secretariat delivers on this role by: developing financial management, accounting, transfer payment and internal audit policies, directives and standards; assisting departments by providing leadership, policy advice and guidance; setting performance expectations and monitoring performance; capacity building and community development within the functional communities; planning horizontal audits and conducting audits of small departments and agencies; providing financial oversight and reporting; and advising central agencies and departments on financial authority issues associated with the Financial Administration Act (FAA) and Appropriation Acts, the primary pieces of legislation underpinning the Financial management program activity.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Canada School of Public Service

Strategic Outcome

Public servants have the common knowledge and the leadership and management competencies they require to fulfill their responsibilities in serving Canadians.

Program Activity Descriptions

Foundational learning

Contribute to building a professional workforce by enabling public servants to perform in their current job and take on the challenges of the next job in a dynamic, bilingual environment through the provision of foundational learning activities. Developing and delivering training aligned with public service management priorities and which meets the requirements of the Policy on Learning, Training and Development and associated knowledge standards.

Public sector management innovation

Enhance the performance and effectiveness of the public service by integrating individual development of public servants with organization-focused solutions for learning, change management and management innovation. Documenting and disseminating innovations and best practices in public management, and providing public service organizations with services for advice and support for learning, change management and innovation in public sector management.

Organizational leadership development

Strengthening the public service and contributing to Public Service Renewal by building strong leadership competencies for existing and emerging leaders through the provision of leadership development activities such as targeted courses, programs, seminars, and events.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Office of the Commissioner of Lobbying

Strategic Outcome

Transparency and accountability in the lobbying of public office holders contribute to confidence in the integrity of government decision-making.

Program Activity Descriptions

Review and investigations under the Lobbying Act and the Lobbyists' Code of Conduct

The Office validates information provided by registered lobbyists to ensure accuracy. Allegations of non-registration or misconduct by lobbyists are reviewed and formal investigations are carried out when required.

Registration of lobbyists

Lobbying the federal government is a legitimate activity but it must be done transparently. The *Lobbying Registration Act* requires that individuals who are paid to lobby public office holders must disclose certain details of their lobbying activities. The Office of the Commissioner of Lobbying approves lobbyists' registrations and makes them available for searching in an electronic registry that is accessible on the Internet.

Education and research

The Office develops and implements educational and research programs to foster awareness of the requirements of the *Lobbying Act* and the *Lobbyists' Code of Conduct*. The primary audiences for programs are lobbyists, their clients and public office holders.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

Office of the Public Sector Integrity Commissioner

Strategic Outcome

Wrongdoing in the federal public sector is detected, resolved and reported, while public servants are protected from reprisal, resulting in a greater integrity in the workplace.

Program Activity Descriptions

Disclosure and reprisal management program

To provide advice to federal public sector employees and members of the public who are considering making a disclosure and to accept, investigate and report on disclosures of information concerning possible wrongdoing. Based on this activity, the Public Sector Integrity Commissioner will exercise exclusive jurisdiction over the review, conciliation and settlement of complaints of reprisal, including making applications to the Public Servants Disclosure Protection Tribunal to determine if reprisals have taken place and to order appropriate remedial and disciplinary action.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Department

Strategic Outcome

Well-being of eligible Veterans and other clients.

Program Activity Descriptions

Compensation and financial support

Veterans Affairs provides, upon eligibility, pensions or awards for disability or death and financial support as compensation for hardships arising from disabilities and lost economic opportunities. Veterans Affairs has a comprehensive and integrated range of compensation and wellness programs to support its clients. These clients include: Veterans of the First World War, the Second World War, and the Korean War, Merchant Navy Veterans, Canadian Forces Veterans, Canadian Forces members, spouses, common-law partners, certain civilians, and survivors and dependants of military and civilian personnel. Veterans Affairs also

administers disability pensions for the Royal Canadian Mounted Police under a Memorandum of Understanding. This program activity is delivered through operating and grants.

Veterans health care and re-establishment

Veterans Affairs provides health benefits, a Veterans independence program, long-term care, and rehabilitation and re-establishment support to eligible Veterans and others. The Health care program is designed to enhance the quality of life of Veterans Affairs' clients, promote independence, and assist in keeping clients at home and in their own communities by providing a continuum of care. The program activity is delivered through operating and contributions.

Strategic Outcome

Veterans and other clients receive an independent and impartial review of Veterans Affairs Canada related complaints.

Program Activity Descriptions

Veterans Ombudsman

Provides War Service Veterans, Veterans and serving members of the Canadian Forces (Regular and Reserve), members and former members of the Royal Canadian Mounted Police, spouses, common-law partners, survivors and primary caregivers, other eligible dependants and family members, other eligible clients and representatives of the afore-mentioned groups with the opportunity to request independent reviews of their complaints by an impartial individual who was not part of the original decision-making process. The Veterans Ombudsman has the mandate to review and address complaints by clients and their representatives arising from the application of the provisions of the Veterans Bill of Rights; to identify and review emerging and sys-

temic issues related to programs and services provided or administered by the Department or by third parties on the Department's behalf that impact negatively on clients; to review and address complaints by clients and their representatives related to programs and services provided or administered by the Department or by third parties on the Department's behalf, including individual decisions related to the programs and services for which there is no right of appeal to the Board; to review systemic issues related to the Board; and to facilitate access by clients to programs and services by providing them with information and referrals.

Strategic Outcome

Canadians remember and demonstrate their recognition of all those who served in Canada's efforts during war, military conflict and peace.

Program Activity Descriptions

National and international memorial

This activity is responsible for the delivery of funeral, burial and grave marking benefits, the presentation of memorials overseas and cemetery and grave maintenance, nationally and internationally. VAC also has an international presence in Europe. The administration of funeral, burial and grave marking benefits is carried out in partnership with Last Post Fund Corporation and the maintenance of war graves and Memorials throughout the world is delivered in partnership with the Commonwealth War Graves Commission. This activity is delivered through grants and operating.

Remembrance outreach

Remembrance outreach is responsible for providing Canadians, especially youth, with opportunities to learn about remembrance subjects, via remembrance products, including printed and on-line materials, and activities. The Remembrance outreach program also provides leadership of and support to ceremonies and events, in Canada and internationally, that recognize and honour Canada's war dead and Veterans. Through the Partnership contribution program, non-profit organizations are able to apply for financial assistance to undertake remembrance initiatives that extend Veterans Affairs Canada's remembrance mandate. A new initiative, corporate engagement and marketing will help the Department extend the reach and capacity of its remembrance efforts. This activity is delivered through contributions, grants and operating.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.

Veterans Review and Appeal Board

Strategic Outcome

Fair and effective resolution of disability pension, disability award, and War Veterans Allowance appeals.

Program Activity Descriptions

Veterans Review and Appeal Board redress process for disability pensions and awards.

This program ensures applicants have an avenue of redress by an independent tribunal for disability compensation and War Veterans Allowance claims.

Ministry summary	27.3
Program activity	27.4
Transfer payments	27.5
Revenues	27.6

Internal services

The Internal services program activity supports all strategic outcomes and is common across government. Internal services are groups of related activities and resources that are administered to support the needs of programs and other corporate obligations of an organization. These groups are: Management and oversight services; Communications services; Legal services; Human resources management services; Financial management services; Information management services; Information technology services; Real property services; Materiel services; Acquisition services; and Travel and Other administrative services. Internal services include only those activities and resources that apply across an organization and not to those provided specifically to a program.

Strategic Outcome

The western Canadian economy is developed and diversified.

Program Activity Descriptions

Innovation

This program activity facilitates the West's transition to a knowledge-based economy. Through innovation, knowledge is translated into new products and services and to new ways of designing, producing or marketing existing products or services for public and private markets. This recognizes that innovation occurs at the firm level, through a highly complex interdependent system that includes elements such as knowledge infrastructure, basic and applied research and development, highly qualified personnel, access to adequate patient financing, technology commercialization facilities and support systems and mechanisms to link these elements to each other. The process of innovation is not linear or isolated but occurs within a broader context known as

an "innovation system". This will strengthen the western innovation system in order to facilitate the development of clusters and to enhance the potential of innovation to create value and wealth.

Business development

This program activity works with western Canadian businesses, industry and research organizations to undertake initiatives to enhance business productivity and competitiveness, support trade and investment attraction and penetration of western Canadian technologies, services and value-added products into international markets. Value-added production will be strengthened through support for initiatives in priority sectors to introduce new products, technologies, or innovations to existing production and processes. Access to risk capital and business services for entrepreneurs and small business will also be improved through programs and services offered in conjunction with other business services organizations and associations.

Community economic development

This program activity involves economic development and diversification initiatives that support communities to sustain their economies and adjust to changing and challenging economic circumstances. It includes facilitating economic recovery from depressed economic circumstances. It ensures that economic, social and environmental considerations are taken into account in initiatives designed to foster community growth and economic development. It involves projects that assist communities to assess community strengths, weaknesses, opportunities, and potential for new economic activity and to develop and implement community plans. It also involves investments in community infrastructure, coordinated with provincial and municipal governments to maximize benefits. The process involves community-based consultations to ensure federal programs, services and horizontal initiatives serve the need of western Canadian communities.

Policy, advocacy and coordination

This program activity arises from the Western Economic Diversification Act (1988), which empowers the Minister to advance the interests of Western Canada in national economic policy, program and project development and implementation, through the establishment of cooperative relationships with the western provinces and other stakeholders, and through the initiation of policy research. Through this activity, Western Economic Diversification Canada advocates for Western Canada in national policy discussions, resulting in effective strategies, policies and programs to address the economic development needs and aspirations of western Canadians. It also includes leading federal and intergovernmental collaboration to pursue key opportunities for long-term growth and diversification in areas of federal or shared federal-provincial jurisdiction. Finally, it includes undertaking research and analysis required to inform policy and program decisions.

Strategic Outcome

The following program activity supports all strategic outcomes within this organization.

Program Activity Descriptions

Internal services

See introductory text.
